Wireless Tel. Stations
Salaries of operators.

Report arrangement by which operators shall be apptd. on fixed salary of £250 p.a. with duty allow of £50 if employed at Keessama & £100 if employed at any of the Island Stations Kismayu

Mr. Butler

We left the salaries to be settled by the C.E. (see $\frac{C}{12987}$ + letter to C.A. on 15738), & I do not see that became reasonably question their views.

Mr. Caine's division of salary + duty allowance is useful + may be accepted. In his last para: £300 is the minimum of Mr. Ireland one of the 3 "Engineering Posts" posts approved in 1916 (he is on £300 + 50 = £400). £350 is the initial salary of the Telegraph Engineer (Mr. Graydon) and the C.E. (Mr. Ridley) who of

has a special written allowance of
£150. W. Cairns has recently proposed
that another of the "Engineering Acad."
books should be filled at £400,
so I fear his attempt at a
consistent arrangement will not
go far.

However,

? City to CA & say he
concur in the proposed arrangement,
& inf. his Cairns.

Sir

Recd
Recd

With reference to the appointment of wireless telegraph engineer operators for Jubaland and the N.F.D. I have the honour to inform you that in order to conform as closely as possible to the present scale of salaries ruling in East Africa, I have recommended to the Consulting Electrical Engineers that the salaries of £300 and £350 recommended by them for the above appointments should be divided up as follows:

2. All the wireless operators to be appointed on a fixed salary of £250 p.a. with a duty allowance of £50 if employed at Kismayo and £100 if employed at one of the inland wireless stations

3. If their salaries were registered as £350 they would apparently rank equally or above many of the more senior officers in East Africa. For instance the commencing salaries of the Assistant Telegraph Engineer is £300 and that of the Telegraph Engineer £350.

I have the honour to be

Sir

Your obedient servant

R. E. Coates
Asst. Chief Tel. Eng.

Secretary of State
