

and published in the Official Gazette of the 1st of Aug 1913.
 He ~~points out~~ ^{points out} that the rates ^{although} may appear to be high, but ~~points out~~ that the customs sheds at Mombasa are intended for transit & not for storage, that 8 days free storage is allowed as against 22 hours in other places, that the imposition of the rates was necessitated, necessary ~~was~~ to check delay in clearance in order that the Customs & Railway Dept. might not be unduly congested. He adds that, notwithstanding the rates imposed, the clearance of goods is comparatively slow & that ~~of consignees~~ ^{of consignees} do not as a rule appear to object to the payment of rent at the rates fixed.

3. The Gov states that in accordance with the regulations the rate was tabled in the third week & that this increased rate remained in force until the goods were cleared.

Proposed New European Hospital at Mombasa

To copy memo by Principal Sanitary Officer which it is thought will considerably improve the building. Working plans are in preparation & suggested alterations are being made thereon.

Mr. D. L. ...

H. J. R.
 29/11/15

Mr. Reed

These changes seem like improvements. I think we need not hurry, but simply let Prof Simpson see, with Mr. Maus.

At 29/11/15

 H. J. R.

29/11/15

Mr. Reed

Please see note from Professor Simpson attached. As he appears, there is no reason for its disapproval, but perhaps we need not do more than act, saying the proposed changes appear satisfactory.

Jan. 27th 1896

Dear Mr. Addison.

The suggestions
have been accepted, and
I consider the plates now
satisfactory.

I have been unable so
far to discover the other
duplicate you write about.

Yours sincerely

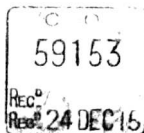

W. J. Simpson

EAST AFRICA PROTECTORATE

No. 310

10th November 1915.

Sir,

I have the honour to acknowledge the receipt of your despatch No. 426 of the 4th of June regarding the proposed new European Hospital at Mombasa, and to transmit herewith for your information an copy of a memorandum by the Principal Sanitary Officer drawn up in conformity with your request.

2. I am of the opinion that the suggestions made by Mr Redford will improve the building considerably. The working plans are in course of preparation and the suggested alterations are being

THE RIGHT HONOURABLE

ANDREW BONAR LAW, P.C., M.P.,

SECRETARY OF STATE FOR THE COLONIES,

DOWNING STREET, LONDON, S.W.

being made thereon.

I have the honour to be,

Sir,

Your humble obedient servant,

Albion B. Bishop

GOVERNOR.

ENCLOSURE

In Despatch No. P1001 25-11-1915

Nairobi, July 31st 1915.

59153

Rec^d
Reg^d 24 DEC 15European Hospital, Mombasa

Ref: S.M.P.7515 dated 26th July 1915

Enclosing Secretary of State's No.426 of 9/6/1915MEMORANDUM.

In order to meet the opinions expressed by the Advisory medical and Sanitary Committee for Tropical Africa, the following alterations and additions to the proposed plans are suggested:-

1. Expansion of Sisters' dining & sitting room.

To remove the partition wall shown as existing between the Sisters' dining and sitting room, and the Medical Officer's room.

By so doing an additional space will be provided of 17' x 10' 6" inclusive of wall space; this will materially add to the comfort of the occupants. I propose that the intervening wall be removed, and not a doorway knocked through it.

2. Medical Officer's room

This to be placed where the Microscopic Room and Dispensary is now shown. If this conversion takes place attention should be paid to the lighting

The Principal Medical Officer,

and

Nairobi.

and ventilation of the room.

3. Mortuary & Laundry.

The site for the Laundry is shown on the block plan, probably this may have been overlooked by the Committee.

This building should contain-

- a. Drying room
- b. Ironing room
- c. Washing room, boiler house
- d. Sorting room.

a. Drying room. to have radiators provided, and hanging lathes worked by pullies. This room is an essential as proximity to the sea and the two monsoon seasons maintain the saturation point for a long period.

b. Ironing room. Electric irons should be used.

c. Washing room. Should be provided with mechanical washers and ringers, and attached to the boiler house means should be provided for disinfecting clothing and apparatus.

d. Sorting room, to be provided with shelves and cupboards.

The entire building to be lighted with electric light, and its drainage carried down and connected with the main drainage between the Hospital and administration block.

All rooms in this building should be provided with louver windows and be rendered mosquito proof. Floors, walls and ceilings to be of impervious material.

4. Mortuary.

Provision should be made for

a. Receiving room with tressels for 3 coffins.

b. Post Mortem room, drained to centre gully, trapped, provided with 2 slats slabs guttered and drained, sinks and sloping slabs for examination of organs, and shelves for specimens, and disinfectants. Water to be laid on to all parts.

c. Medical Officer's room provided with furniture and lavatory accommodation.

5. Dispensary.

I propose that this be placed in the position of the kiosk now described as the admission officer's room situated in the fore court.

S/d. W. Radford.

Principal Sanitation Officer.
