With reference to your despatch No.1127 of November 9th, I have the honour to inform you that the problems of Native Education have received and are receiving very full and careful consideration, more especially in connection with the points referred to in the Report of the Parliamentary Commission.

2. Dealing with these separately :

EXPENDITURE ON NATIVE EDUCATION:

As possited out on page 175 of the Gommission's Report, there is an increased expenditure of £9,000 on this head in 1925, and the increased expenditure in the 1926 Estimates is £16,492. The largest increases under this head are:

The increase under this head amounts to

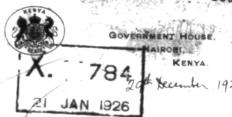

£7148. In the original traft Estimates
a further sum of £4500 was included and
this amount was only struck out in Select

Committee/

Committee as it was considered that further reports were required in respect to the schools for which the additional amount was provided. No full inspection reports have yet been made on It was agreed that as soon as cases were made out supplementary provision would be in-These grants-in-aid were based on the cluded. recommendations of the Committee appointed by Mr.Denham, while Acting Governor, to consider the whole question of grants-in-aid to Mission Schools with a view to their being placed on a more liberal scale than hitherto and such as would "enable a continuous programme of develop-"ment to be undertaken." It was felt that no continuity of effort on the part of the Missions would be secured unless some guarantee was given them of a continuous measure of support increasing relatively to the efforts made by them. I enclose, for your information, copies of

- (a) Report of the Special Committee appointed to enquire into the Grants-in-Ald.

 The first Appendix to this Report gives the terms of reference and shows the lines on which it was suggested that angulary should be made. The recommendations in the Report were unanimous.
- (b) A statement furnished by the Director of Education showing the expenditure which would be involved by the adoption of the scale of grants in respect of the larger Mission Schools.
- (c) The Report of the Select Committee of Council to whom this Committee's Report was referred.

The adoption of the Report was moved at a meetin of Legislative Council on the 11th of December and was accepted without a division.

No refirmled

Acknowledgment

Asknowledgment has been made by Dr. Arthur, on behalf of the Native Missions, of the work of this Committee, and of the considerable assistance which the augmented scale of grants will now afford to the Missions' educational work. It should be recognised that though the increase in grants this year does not amount to more than £7,148, the adoption of these scales will lead to considerably larger increases in the future as the Missions will now be in a position considerably to increase their staffs and programmes of work.

I may mention, in this connection, that the African Inland Mission, the Seventh Day Adventist Mission, the Church of God Mission; the Reman Catholic Mission of the Hely Chust, the Friends' African Industrial Mission, the Gospel Mission, and, in fact, all Missions which have not hitherto been willing to accept grants-in-aid from Government, have now expressed their willingness to some into the scheme. Th€ advantages of bringing all Mission schools under the description of "Grants-in-Aid Schools" are that Government supervision and the adoption of Government schemes of work are accepted while the increased financial assistance afforded by Government, combined with the inspection of results, should ensure increased efficiency, fuller co-operation, and additional effort on the bart of the Missions.

Syllabuses for work in these schools
have been approved by the Advisory Board on
Native Education and will now be adopted throughout the country. The establishment of local

local School Committees will enure increased attention to the subjects which are set out in the forefront of native educational work and make it "imperative that in every native Primary School" instruction should be given in hygiene, sanitation, "agriculture, carpentry and other handicrafts which have calculated to stimulate native industries."

(2) Provision has been made for a <u>Supervisor of</u>

<u>Technical Education</u> who is to be resident at

Kabete and in charge of the Native <u>Industrial</u>

Training Depot there while he will also visit all

schools throughout the country where <u>technical</u>
instruction is being given.

There is also new provision for two
Inspectors of Schools, who will be employed
principally in the Native areas. There is a
further appointment of Inspector of Native Education which has still to be filled.

As you will learn from my despatch on the Salaries Proposals, it is proposed to recruit these officers on the same scale as is suggested for Administrative officers and it is heped to secure officers of the same type and calibre.

The success of any proposals for education in native schools must depend very largely on the nature of the provision which can be made for their inspection.

(3) Provision has been made for Grants-in-Aid of £1270 towards staff and £1970 towards buildings for the Alliance High School at Kikuyu.

This ds a new departure in Native

yor 62,90

8 mot 621/200

The buildings were originally Educa tion. constructed out of the Red Gross contributions and other war Runds for Africans, and were intended for medical training for Africans. It has been found, however, that the first step to be taken is to provide somewhat higher education than is now obtainable for Africans which will lead on to more advanced agricultural. technical and scientific studies. It is, therefore, proposed to use these buildings - with the full approval of the Alliance of Mission bodies as a Higher Elementary School for Africans, under the supervision of a Board, which is to be composed of three Government representatives. two Elected Members! representatives, seven Mission representatives, and two presentative of Donors.

This is the first step taken in the Colony towards higher native education and I am grad to be able to report that it received the full approval of the Advisory Board on Native Education, and represents a co-operative effort on the part of Government and the Missions to provide for this need union the supervision and with the assistance of the Educational Department.

(4) A further provision of £1500 has been made for the <u>Huts and Equipment of the Jeanes</u>' Teachers' School at Kabete.

that has been made with this school

which, as you are aware, is intended for the training of African teachers who, after leaving the school, will act as travelling instructors throughout the native schools in the country and who, it is hoped, will impart to other native teachers the lessons they have learnt at Kabete. There are now 14 teachers in residence and the number will be increased to 40 as housing accommodation is provided This school is under the care of Mr. J.W.C.Dougali late Secretary of the Phelps-Stokes Commission; the curriculum includes agricultural Agriculture, Hygiene, Handierafts, and the teaching of classroom subjects. There has been some difficulty in deciding on the type of building which is considered most suitable for the housing of these teachers, the idea being to give them houses of better type and construction than is found in the Reserves and yet not of as expensive a design as to discourage imitation and adoption of a similar form of construction by the teachers themselves on their return to their Reserves.

The impartance of instruction being given to native women in Housewifery, Infant Welfare, etc. which is emphasized in the Report of the Parliament ary Commission - has not been everlooked at the Jeanes School, where the wives of the teachers are being trained by a qualified Buropean Mursing Sister (who is in residence) in general knowledge of maternity and child welfare.

The importance of the training of teachers is fully recognised, and I would refer you in this onnection, to despatch No.810 of June 20th, 1924 (anniexure 3). in the 3 bout / The

TH.

In 1919, in view of the expansions proposed by the Edwartion Commissioner, Government took up the question of the training of teachers. Mission stations, viz., the C.M.S., Maseno, the Church of Scotland Mission at Kikuyu, and the Buxton High School at Mombasa, were invited to bring out Masters of Method whose whole salaries have, since then, been paid by Government. Boarding and Capitation Grant amounting to Sh. 150, per annum is paid in respect of each teacher in training, and Government contributes one-third of the expenditure on equipment. In addition to this, grants are being paid for the training of teachers for the Church Mission at Kikuyu and the Church of Scotland Mission at Tumm Tumu.

The Jeanes School is a first step in the establishment of a Sentral Training, School and it is hoped it will be followed by other moves in this direction.

Dealing with the other points raised in the Report of the Commission, I would refer you to despatch No.804 of 27th June, 1925. The Training Depot for African artizans at Kabete is proceeding on satisfactory lines but it is felt that to secure the success aimed at and to achieve the objects desired, it is easantial that there should be in residence a Senior fully qualified European Officer who will be able to exercise a moral influence and personal supervision which are highly desirable and which will help to secure further missionary co-operation in the work of this Depot. Technical education is generally making considerable progress throughout the Celony, but this

14 Mu. 35663

suffers to some extent from the fact that the technical instructors, while generally intelligent and hard-working men, are lacking in the attributes required in Headmasters. especially those who are responsible for the conduct and discipline of African students. The Inspector of Schools, Mr. Biss, and the Chief Technical Instructor Mr. Stubbs, were recently instructed to visit all the technical schools throughout the Colony and to report on It was suggested to them the work being done in them. in the instructions issued by Government that attempts should be made to classify students according to their capacity in the different branches of work on which they are engaged. It was pointed out that boys left Mission Technical Schools with varying degrees of skill and without any pass certificate which would give to an employer some clear indication of the relative degrees of knowledge they had reached in the different branches of their work result being that complaints were frequently made in respect of the industrial teaching provided based on experience of inefficient apprentices. I enclose a copy of the valuable report received from these officers. Their resemmendations will be found in paragraphs 6, 14, 23-26, and steps will be taken to carry them out as far as possible; they are, in fact, being made to a great extent possible by the new proposals in regard to increased grants-in-aid and the appointment of a Supervisor of Technical Education, to which I have referred above.

- 4. Very considerable interest is being manifested by
 the Native Councils in all branches of education, as is
 shown by the following resolutions passed by Native Councils:
 - (1) The Machakos Council resolved that an annual poll tax of Sh.2/- per head be imposed from the 1st of January, 1926, of which one fourth should be devoted to Education.

^{(2) - ... +} NW refulled

- (2) The Digo Council recommended the building of two native achoels.
- (3) The Baringo Council recommended the establishment of a school at Kabarnet.
- (4) The Masai Council approved of the salaries of Headmasters for Kajiado and Narok Schools and other expenditure on staff and equipment amounting to \$655 to be met from Native Council funds.
 - (5) The Nandi Council voted 2200 to be expended on the Nandi School.
 - (6) The Central Kavirondo Council voted a contribution of £1,000 to a central school for Nyanza and a grant to Wissions for schools of £500.
 - (7) The North Kavirondo Council resolved to contribute a sum of £1000 towards a central school in North Kavirondo.
 - (8) The Kyambu Council voted £500 for a central school at Kyambu.
 - (9) The Kericho Council agreed to a grant-in-aid of £100 to the Kericho Technical School.

The following recommendations in connection with agricultural training have been made by Native Councils:

- (a) The Central Kawirondo Council woted £100 towards the expenses of an Agricultural Show.
- (b) The Embu Council voted a sum of 2434 for an Agricultural school and recommended that a teacher be engaged.
- (c) The Meru Council voted a sum of £70 for the expenses of sending 4 youths for instruction at the Masai School in ghee-making and for the building and equipment of a dairy.
- (d)
 The Masai Council voted £55 for the expenses
 of the farm and dairy attached to the Narok
 School.
- (e) The Machakos Council has recommended that a ploughing school be started for the purposes of training both natives and their aren, and after training to assist them by loans to expurchase ploughs for themselves.

It has been decided by Government, and accepted by the Native Gouncils that all expenditure on education from funds provided by these Councils shall be regarded as

supplaner tary

supplementary and additional to votes made by Government
for native education while they shall be spent under
Government control with the advice of the Education

Department. It is hoped to establish a system of
central schools in each district to which more advanced beys
from the ordinary "bush" schools may proceed and where they
may obtain elementary instruction in English as well as in
hygiene, sanitation, agriculture, darpentry, and other
handisrafts. The funds provided by the Native Councils
should permit of an early start being made in this direction.

by Government, unofficial representatives, and Missions.

The Conscience Clause, which is referred to in the Parliamentary Commission's Report, is working satisfactorily. Objections were at first raised by some of the Missions to the wording of the clause, which they felt to be too wide. They feared it would give the idea that the Christian children the Mission Schools were not expected to attend religious instruction and that such did not form part of the school programme. This clause has been re-worded to meet these objections and is now, I understand, satisfactory to the Missions.

6. The education of women undoubtedly presents considerable difficulties and more must be done in the future in this direction. The first step was taken last year in the provision of a grant to Missions for Home Training and Child Welfare. This grant has now been incorporated

in the total grants to Missions and I would refer you in this connection to paragraph 55, XvIII (b) on page () with page 19 of the Report of the Committee on "Grants-in-Aid".

I consider that much can be done in this direction when the increased provision for medical services comes into effect. This scheme, as you are aware, provides inter alia for the placing of murses in certain Mativa I should like to have seen the number further districts. increased and shall shortly be putting forward proposals I believe that in the instruction to you to this effect. of native women by European women will be found the only certain means of raising the moral and physical standards of the native races in the Colony. Nothing, therefore, is of greater importance in Native policy than this. The appeal which it makes goes home to one of the strongest instincts in human nature, and I am hopeful that in comparatively few years the response to it will surprise even those who have advocated it from the first.

I have the honour to be,

31r,

Your obedient Servant,

Edward Stigg

A CANAL PROPERTY.

COLONY AND PROTECTORATE OF KENYA.

COMMITTEE OF THE LEGISLATIVE COUNCIL ON GRANTS-IN-AID FOR EDUCATION.

Proceedings of a Moeting at the Treasury on 4th September, 1925.

PERSENT :-

THE HON THE THEASURE, Mr R. Ulifton Grannum, C.M.G. (Chairman),

PRIS HON. THE ACTING CRIEF NATIVE COMMISSIONER, Lt.-Col. O. F. Watkins, C.B.E., D.S.O.

THE HOR, THE DIRECTOR OF EDUCATION, Mr. J. R. OIT, O.B.E., B.A.

THE HON. LORD FRANCIS SCOTT, D.S.O.,

THE HON AND REV. DR. J. W. ARTHON, O.B.E. M.D.

THE HON. MR. B. W. B. ROBERTSON-EUSTACE (absent in the afternoon).

THE HON. CAPTAIN J. E. CONEY,

THE HON. MR. W. C. MITCHELL.

THE HON. MR. SHEMS-UD-DEEN.

Mr. E. E. Bras, M.A., Inspector of Schools (Secretary)

THE HON. MR. R. S. NERBA.

- The Charman explained the york of the former committee on Grants in Aid, and applify went through the salient features of their Report.
- The Secretary then rend the Report paragraph by paragraph, returning to the new schedule of grants Opposity Di when necessary.
- After the Committee had approved paragraphs 13.30 of the Report, and accepted Resolutions I to XII in at
 - (a) The Honourable Mr. Shams-sid-Doon asked that this disagreement with making grants for technical education at all he recorded.
 - (b) It was resolved by the rest of the Committee see
 - (i) That grants in a spect of vocational training for male papits in junior high schools should be limited to a period of three years and should be conditional on an indenture for five years, terminable as the discretion of Government as the and of three years, and containing a clause allowing Government to send selected pupils on to the Native Industrial Training Depot as Kabete, or to any other smaller institution, for the last two years and
 - (ii) That grants is aid for vocational training for female pupilinding high schools should be limited to a maximum period of three years.

A Paragraph 26 was passed.

- It was thought this the meaning of paragraph 27 and Appendix D.
 B 3 Salaries; (a) Europeans
 was not clear and might bear three possible interpretations, either:
 - (i) That Government should pay four fifths of the actual salary paid by a Mission to a missionary; or
 - (ii) That Government should pay the whole salary paid by a Mission to a missionary, provided the amount of the grant-m-aid thus paid did not exceed four-fifths of the Government scale; and that, if the amount paid by the Mission as salary should exceed four-fifths of the Government scale, then four-fifths of the Government scale, then four-fifths of the Government scale and no more should be paid as a grant-in-aid; or
 - (iii) That four-fifths of the Government scale should be paid as a grant-in-aid irrespective of what was actually received by the missionary in question.
 - (s) The Committee resolved that of these alternatives (ii) was the best and should be adopted;
 - (b) The Committee further resolved that a missionary's position on the scale should be decided by the number of years' service he had rendered to the Mission; and
 - (c) That grants for passages should only be paid for actual travelling purposes.
- Paragraph 27, as explained above, and paragraphs 28 to 32 were then passed.
- 9. A long discussion then arose upon the possibility of raising additional revenue for schools from (s) fees, (b) cosses, (c) sales of books, stationery, etc., and (d) sales of articles made by the pupils of the aided achools, and remuneration for services rendered by them. The funds of Missions were seen to be divisible into: (i) private funds for strictly religious purposes; (ii) sums set aside by the Missions for school purposes; and (iii) proceeds of sales, fees, etc. It was felt by all members that its would not be right for fovernment to call for a statement of (i), or for a Mission to withhold a statement of (iii). A difference of opinion emerged as to (ii). It was eventually resolved:—

That during the coming year the whole question of increasing evenue from all possible sources, and of reducing expenditure (e.g. on boarding costs), should be examined with a view to formulating suitable regulations on the subject.

- 10. Paragraphs 33 to 36, containing Resolutions XIII to XXIV, were then approved by the Committee.
- 11. In Resolution XXV (paragraph 37) it was decided that the words for Europeans . Indians in India should be omitted, and that the words at institutions to be approved by the Governor in Council should be substituted,

12. The Committee finally resolved :-

That the principles and conditions for grants-in-aid as agreed to above, should be put into force in 1926, but that the grants should be paid on the clearly inflered od additional condition that the necessary new instructors should be brought out as quickly as possible, and, in any case, within two years.

- Proceeding with the Report the Committee passed paragraphs 31 to 24.
- 5. On passgraph 25 and Appendix D B 2 (a) Tools, the Committee accommended that the words up to should be anserted before She. 40. per annum per-boy
 - 6. Paragraph 26 was passed.
- It was thought that the meaning of paragraph 27 and appendix D.
 B 3 Salaries, (a) Europeans was not clear and might hear three possible. interpretations, either ;-
 - (i) That Government should pay four-fitths of the actual salary paid by a Mission to a missionary; of
 - (ii) That Government should pay the whole salary paid by a Mission to a missionary, provided the amount of the grant-in-aid thou paid did not exceed four fifths of the Government scale; and that, if the amount paid by the Mission as salary should exceed four-fifths of the Government scale, then four-fifths of the Government scale and no more should be paid as a grant in aid; or
 - (iii) This four-fifths of the Government scale should be paid as a grant-in-sid irreluctive of what was actually received by the missionary in question
 - (a) The Committee resolved that of these afternatives (ii) was the best and should be adopted;
 - (b) The Committee further resolved that a massionary's position on the scale should be decided by the number of years service he had a rendered to the Massac and rendered to the Mission; and
 - (c) That grants for passages should mily be paid for actual travelling purposes.
- 8.: Paragraph 27, as explained above, and puragraphs 28 to 32 were then passed
- 9. A long discussion them are upon the possibility of raising additional revenue for schools from (4) fees, (b) choice, (c) sales of books, stationary, etc., and (d) sales of articles made by the pupils of the aided schools, and remuneration for services rendered by them. The funds of Missions were seen to be divisible into 2 (1) private funds for strictly religious purposes: (ii) auros set aside by the Missions for school princess; and (iii) proceeds of aller, fees, etc. It was felt by all increases that it would not be right for floverament to call for a statement of (II), or for a Mission to withhold a statement of (II). The many control of (II) is the statement of (III) and the statement of (III) are the statement of (III). It was eventually menived &
 - That during the country was the whole question of increasing revenue from all-prosible sources, and of reducing expenditure (e.g. on boarding costs), should be examined with a view to formulating suitable regulations on the subject."
- Paragraphs 38 to 86, containing Resolutions XIII to XXIV. were then approved by the Committee
- In Resolution XXV (paragraph 337) it was decided that the words Indians in India " should be omitted, and that the for Europeans words " at institutions to be approved by the Governor in Council " should be substituted:
 - The Committee finally resolved i-

"That the principles and conditions for grants-in-aid as agreed to above, should be put into force in 1926, but that the grants should be paid on the clearly understood additional condition that the necessary new instructors about he brought out as quickly as possible, and, in any case, within two years.
