

4.2
Generally I think the Govt. should
have had control of port administration
if so, the question is

of how the scheme should be financed.

[The Mr. Fitzgibbon is definitely
against the Erganon note & I think
it is likely the nothing more will
be said to it.]

If the money is to be found by

Govt. loan there will be no reason

for either Reid & Co or Boston Street

to be involved, both can be asked to supply

money for purchase

of the wharf, should be built.

It is no one but suggested Govt

construction. The work was offered

by the C.A. to a number of firms in 1914

and the same arrangements will

no doubt be adopted now. From

James Hamilton & Co.

the same to be put in the

other or some ready

for Erganon loan.

E. W. R. Bonden telephoned on Saturday that

S. E. Buchanan was now in this

country - suggested that the C.A.

should be in on Port Administration

I said I thought matters were hardly
ripe for this but that I would
put it as suggestion forward.]

22.3.20.

At the last meeting the Director & Co
was inf. that the Harbour Sub. Co
had unanimously decided in favour of
the first scheme - & that the Sub. Co
was now going into the question of how
the money was to be found for it.
When that has been settled it would be
the work to be put up - to be done
The Sub. Co. meets again on the 29th
night at 5 p.m.

KILINDINI HARBOUR

Reference is made to the interview with Mr. Robert Boulton
on the 12th March, 1920, and we wish to inform you that we
are the General Manager of East Africa, and
I am sure that you will be glad to hear that our
Government has decided at once that our
policy in East Africa shall be to develop and elsewhere cause
the development of the present and future development of
the East African coast, which will be utilised in assisting
the development of East Africa. It is important that if there is
any opportunity should be taken to utilise such resources as
are available in East Africa, and to prove a convenient method for
the utilisation of private enterprise to
the same time coming to an
arrangement, so that the Government does
not unduly restrict the control, or lose opportunities of benefiting

The [unclear]

the revenues of the Colony. It is quite possible to realise such a policy.

We have carefully studied the M'Baraki Creek proposition of Major Grogan, in conjunction with Sir George Buchanan, who is very favourably impressed with the possibilities of the site.

As the Government have already made plans for building a town in another direction it will be desirable for us to consider the M'Baraki Creek proposition before entering into any other arrangements. They prefer to keep their options open.

The Government have been informed that M'Baraki Creek is a very fertile and well watered site, more especially in the winter months. It is situated on the edge of the Colony and is a very desirable site for a town. It is also a very fertile site for agriculture. The Government have been informed that the M'Baraki Creek is a very fertile and well watered site, more especially in the winter months. It is situated on the edge of the Colony and is a very desirable site for a town. It is also a very fertile site for agriculture.

... terms with Major Grogan, and that a company might be eventually formed for the building of the town. The Government should be raised by the Government, guaranteed as to capital and interest by the Government.

We would suggest that the Government should consider the M'Baraki Creek proposition.
