"ASIN GISHU RAILWAY"

Trust's principle will be adherence of construction of Plateau Railway from Lay Summit & Nantui branch to lower Holo without awaiting details by despatch. Earthworks in first 20 miles from Lay village could be commenced at early date if authorized under local contract for these short sections with Griffiths thereby avoiding delay in commencement of work. Decision on these routes will not prejudice a failed survey for other extensions.

To Mr. President Colwell Army
I have asked the Board whether
work of construction required will
only extend to here, but I do not
care where the road is built in
that a local contract is required -
if Griffiths does not want to
contract to me, give me the paper
to others

Local Govt. agreed to maintain
fares of 2/- char. extra a bit
straight plateau roads going down
I do not mind about - the fact
now is that there is no up roads
nearly all, in up roads they have
poor
the population has got smaller and

Today I think day was a bad
one - and the day went so, so that the
water and salt - a capital one to the hotel
from the hills away - is unaffected,
but regards "bad wheat" I gather that
and he says it is to make a difference
over the general wheat so that we
can't get wheat from the west

the right sign to know where to look
so less of the work would have to be done
before it is again in operation. This
