Map of Sobek and Lumbwa

In copy letter from Director of Survey is request for -  
Recommendations to be allowed to communicate direct with  
Ordinance Survey to save delay.

(Minutes.)

Mr Ellis

We had better have an additional  
half dozen copies for our own use.

As regards direct communications  
with the O.S., the present rule was mainly  
intended to cover the case of raw  
material requiring compilation in I. D.  
before a check on existing maps rather  
than that of completed maps merely  
requiring reproduction. But the  
question is to what extent

? Copy of map, 1 encl. to I. D. with  
the usual packet, for reproduction  
or ask for O.S.'s views as to Capt.  
Smith's proposal.

EAST AFRICA PROTECTORATE

No. 106

(Incluse)

My Lord,

I have the honour to enclose herewith for favour of transmission through the Director of Military Operations to the Director General of the Ordnance Survey a copy of a letter from the Director of East Africa Pro-terrate Surveys covering a packet of tracings for the map of Sotik and Lumbwa.

As regards the last paragraph of Major Smith's letter I would venture to recommend that, in order to save delay, he should be allowed to correspond with the Director General of the Ordnance Survey as he suggests.

I have the honour to be,  
With the highest respect,

My Lord,

Your Lordship's most obedient,

humble servant,

*[Signature]*  
Acting Commissioner

Principal Secretary of State

for the Colonies,

Downing Street,

LONDON, S.W.

No. 16

Director of Survey Office,

NATOGH,

23rd February 1907.

Sir,

In pursuance of the instructions contained in No. 2973 of August 1905, I have the honour to forward tracings of the map of Setik and Lumbwa on the  $\frac{1}{250,000}$  scale which I have recently completed.

I have the honour to request that they may be transmitted to the Colonial Office for transmission to the Director of Military Operations and for further transmission to the Director General of the Ordnance Survey.

I have the honour to request that the hermetically sealed packet should not be opened until its arrival at its final destination.

The map consists of four tracings each containing one colour only, viz:

Black, for names, printed as.

Blue, for rivers.

Green, for forests.

Brown, for hill features.

The corners of each are marked and the lengths of the sheet lines are written in pencil.

L.M.'s Acting Commissioner,  
(through the Commissioner of Lands.)

2.

I understand that this system is the one preferred by the Director General Ordnance Survey, should he prefer to have in future one finished tracing containing all colours on one sheet, it is of course equally easy for me to execute.

I think that an edition of 100 copies sent out here would be likely to meet all our requirements for some time.

I have the honour to suggest that in future I should be allowed to correspond direct with the Director General Ordnance Survey on this subject, as the numerous steps through which the maps and letters have at present to go cause delay and also increase the possibility of loss or damage in transit.

I have the honour to be,

Sir,

Your most obedient,

humble servant,

Major. R.E.,

Director of Surveys.
