## Veterinary Office

Amalgamated office at present owing to outbreak of rinderpest. 12000 head of cattle already inoculated & all cattle to Kavirondo to be inoculated. Veterinary Office hands coming to Harobi to discuss concerted action. Serum being produced especially to protect cattle from the disease.

Hi Read

I have discussed this with Mr Stockman. It is quite clear that in view of the outbreak of rinderpest no better prohibitory, or what an experienced man to send out temporally. I have asked Mr Stockman whether, in his opinion also, the Board of Agriculture and Animal Health a good man for a year or two, in charge of cattle point to his passage abroad

he long live at the end of his last  
days. He has promised to do what can be  
done, and to do at least a ready  
service [I have just heard from Dr. Saunders  
that he does not want to be called  
to a bishopric, & so that he could  
not do in any case.]

The Stockman tell us that the Board  
of Education have done their best but  
that they cannot find a man to fit at  
at \$400 per. This being so, we must  
fall back on a less esteemed man  
from our own list of candidates,  
and who is the man I concur with  
I recognize no authority whatever in you
