ENTERIC FEVER

1914

20th June

Reports that the approximate total number of Europeans for the year 1912 was 5151 and for 1913, 6510.

Last previous Paper.

Mr. Read

At any rate this doesn't point to any increase in the prevalence of enteric - the cases were about .5% of the European population in 1912, & not quite .37% in 1913. Circulate to the Com. I. S. H. by AF 13/8/14

GOVERNMENT HOUSE,  
NAIROBI,  
BRITISH EAST AFRICA.

(No. 598.)

June 10th, 1914.

Sir,

I have the honour to acknowledge the receipt of your despatch, No. 487, of the 21st of May, on the subject of the incidence of enteric fever among the European population of this Protectorate, and to inform you that the approximate total number of Europeans for the year 1912 was 5151 and for the year 1913 was 8510.

I have the honour to be,  
Sir,  
Your humble, obedient servant.

*E. J. Houston*  
GOVERNOR'S DESPATCH

THE RIGHT HONOURABLE  
LEWIS HARCOURT, P.C., M.P.,  
SECRETARY OF STATE FOR THE COLONIES,  
DOWNING STREET,
