22662

FROM THE GOVERNOR TO THE SECRETARY OF STATE

further rec'd. in my letter of the 21st inst. Enclosed is no. 22662 for the recommendation of inclosure 1. I would like to refer to Governor's letter of information in reply to H of C question as to the situation at Schools.

Sir G. Rabeson

A sum in the sum of £100,000 will be available within the management budget. We shall have to agree with something cannot be less than £65,000.

In view of Mr. Hartwell's letter of

22662, I do not think that it is

necessary to say off the top of his head, when the matter goes to the

governor.

November 4th, 1914.

MAILED

470

SIR,

With reference to your despatch No. 581
of the 7th of July and in continuation of my
despatch No. 520 of the 26th of May, I have the
honour to transmit herewith a copy of a letter
from the Director of Education setting forth
the recommendations of the Committee of the
Native European School for the re-organisation
of that institution and the establishment of a
new school, so enclosed for your information
and to the suggestions to be...

With regard to paragraph 3 of Mr. Morris's
letter, I caused enquiries to be made from the
Land Officer whether any objections existed to
the encroaching of the site proposed. The land
in question appears to be admirably suited for
school buildings: it is situated on high ground

in

THE RIGHTEOUS HONOURABLE

LEWIS HARBOUR, M.P.,

SECRETARY OF STATE FOR THE COLONIES,

10 KING STREET, LONDON, S.W.1

171

in the vicinity of a scarcely inhabited residential area, and it is unlikely that it would ever be expeditiously utilized for other purposes. I have therefore given instructions for it to be earmarked for educational requirements.

3. The scheme as a whole, though ambitious, is an attractive one and, had it not been for the necessity of practising strict economy at the present time, I should have felt inclined to submit it to you with recommendations for its

execution next year. Under existing circumstances it must, however, stand over for the time being, but I hope to refer to it later on when the financial position of the Protectorate is more secure.

4. Take the opportunity of acknowledging the receipt of your despatch No. 594 of the 23rd of June enclosing a copy of a question addressed to you in the House of Commons on the subject of the playground at the European School Nairobi. The matter of a playground and a shelter had already been engaging my attention in connection with the general question to which I referred in my despatch No. 520 of the 26th of May. The Director of Public Works had estimated that the improvements considered necessary to the present buildings would involve an expenditure

in the vicinity of a sparsely inhabited residential area, and it is unlikely that it would ever be extensively utilized for other purposes.

I have therefore given instructions for it to be earmarked for educational requirements.

3. The scheme as a whole, though ambitious, is an attractive one and, had it not been for the necessity of practising strict economy at the present time, I should have felt inclined to submit it to you with recommendations for its

execution next year. Under existing circumstances it must, however, stand over for the time being, but I hope to refer to it later on when the financial position of the Protectorate is more secure.

4. Take up opportunity of acknowledging the receipt of our despatch No. 594 of the 23rd of June enclosing a copy of a question addressed to you in the House of Commons on the subject of the improvement at the European School Nairobi. The matter of a playground and a shelter had already been engaging my attention in connection with the general question to which I referred in my despatch No. 520 of the 20th of May. The Director of Public Works had estimated that the improvements considered necessary to the present buildings would involve an expenditure

472

expenditure of approximately £1,000, and
therefore caused the Committee to be asked
whether they considered this expenditure
advisable in view of the fact that the outlay
would probably mean the continuation of the
School in the present building for some time
to come, a contingency which I hope you do
not desire. The action of the Committee on
the subject will be appreciated.

I assure you that all necessary measures
possible will be taken in hand at the earliest
opportunity.

Yours faithfully & very
obediently

Hawley, Major

Board of Inquiry sta

at the

Boarding School should be separated from the
Day School and situated further up country at a
distance from a township. I also understand

that

that the Convention of Associations desires the establishment of separate schools for boys and girls. On grounds of economy, the School Committee is opposed to both of these recommendations. While fully agreeing to the practicability of reserving an area of land in another part of the Protectorate for future development, they are of opinion that only one well equipped Government School should be created at present. The reasons are as follows:-

(a) Population: - Omitting the establishment of small local schools, we do not consider that the ~~small~~ population of the country justifies the establishment of more than one school. Considered as a Government School should be established at Nairobi secondly, it is recommended that the school should be a centre of general education and should be concerned with the Health Department, the Native Affairs Department, the Native Education Department, the Native Police, the Native Courts and where possible, the Native Hospital. It is recommended that the school should be a native school, English being taught as a foreign language.

(b) Staff: - The expenditure involved in doubling the staff is unnecessary and undesirable.

(c) Provisions: - Nairobi is the centre of exchange and provisions of a better quality can be obtained with greater economy.

(d) Medical Attendant: - The best Medical advice and facilities are obtainable in Nairobi and

and would be difficult in a country area until the School had its own resident Medical Officer.

(e) Buildings.—Greater value would be obtained by the erection of one representative and fully equipped State School than by dividing funds between two Schools - a proceeding more costly and less efficient.

(f) Proximity to Nairobi.—The Medical Department point out that a town School is more liable to the ravages of epidemics than a country School. In reply it is pointed out that the virulence of meningitis - as was virulent in Hill districts as in the town at Nairobi, and where native servants are frequently sold as effectually close a space in the country as in a town.

Moreover, when a child's horizon is as limited as in East Africa, town life has an educative value. Most of the important functions of State and improvements in buildings, inventions, etc. occur in the Capital and children should have the opportunity of seeing and attending everything that is of national or imperial interest.

3. For the above reasons the Committee would ask Government to provide a thoroughly equipped School in Nairobi. They recommend that the 18½ acres recently set aside for School purposes by the Land Office be increased; that no bungalows be built on this site as at present proposed but that

that the whole area encircled by the houses of the Headmaster and Messrs. Hindle, Monson, Townsend and Tate be reserved for the State School. It should be completely fenced and suitably planted with trees in order that the School while contiguous to Nairobi may be out of it.

4. The additional grant of land is asked because while a large area is likely to be more healthy than a confined area, it is also a maxim that every great school should be self-contained and should be able to provide within its walls everything that contributes to the instruction and education of its pupils in order to prevent them seeking their amusement in the less healthy and more questionable attractions of town life. For this reason full space would be allowed for the erection not only of an attractive school building with boarding establishment and hospital but also of a gymnasium, boratory workshops, common rooms and fives court or will ample provision of playing fields.

On 1st June the school committee I asked the Director of Public Works to submit plans for a completely equipped Government School on the site above mentioned and gave him full information of my requirements. He estimates the cost of such a School at £45,000. The complete plans which will be forwarded to you by the Government Architect were submitted to the

Committee

Committee and were approved by them as suitable, subject to certain alterations. The immediate accommodation of the School will accommodate 150 pupils and 100 boarders and it is suggested that with adjustment the total seating accommodation could be considerably increased and allow for an increase of pupil without extending the buildings.

8. The Committee recommends that if the general plan is approved, a beginning should be made next year with the left or south west wing of the building i.e. the class rooms. The cost of this will be estimated to be £1000.

9. The Committee recommends that the alterations should for

the present be limited to the following alterations:

(1) To the first floor of the main building.

(2) To the ground floor of the main building.

(3) To the first floor of the left wing.

(4) To the ground floor of the left wing.

(5) To the first floor of the rear wing.

(6) To the ground floor of the rear wing.

(7) To the first floor of the rear wing.
