ASAI

submits further report on the present situation and the measures which are being taken to comply with instructions.

~~See also~~ ~~see also~~ ~~see also~~

We are not told (see para 19) how many of the Inter. Syndicate remain in the northern part of the land held by the East African Syndicate. We can understand the willingness of the Syndicate to allow these to remain on an unoccupied part of the Syndicate's property. They will of course graze the rank grass down and make the land much more useful for pastoral purposes later. We ought to ask how many of the northern cattle ~~are~~ ~~are~~ left outside their reserve, and whether the Governor is satisfied that no difficulties are likely to arise from their remaining there for the present.

It is very difficult to follow the changes of figures and positions so far as one can make out, the present position is as follows:—The extadion of the Southern

reserves originally proposed is at present fully occupied by

(a) Northern Reserve with 50,000 head of cattle and 100,000 sheep.

(b) South from the original Southern Reserve has now moved westward.

There still remain in or near the Northern Reserve the balance of the Northern stock. The figures given as to their holdings in cattle or sheep vary very much throughout

(c) The figures given above in Paragraph 2 of this report do not now show in paragraph 2 of this report the total holding of the

therefore, there in the trans-malva district accommodation for 52,000 cattle only, and ~~and~~ in the original extension of the Southern Reserve the accommodation for 133,000 cattle which will be vacated by the move ~~and connection~~.

At the same time the Southern herds from the original Southern Reserve are being moved back from the extended Reserve into their old quarters. According to Mr. McDonald this will liberate one million acres in the extended Southern Reserve, with a carrying capacity of one beast to six acres; in other words, accommodation for 166,000 cattle.

The total accommodation available ~~will~~ in the extended Southern Reserve and in the new extension ~~extension of the~~ referred to as the trans-Malva District is thus  $52,000 + 133,000 + 166,000 = 351,000$  cattle. It will be seen that this is not nearly adequate to the present holding of the Northern herds which will remain in the North, as described at (x) above. It is of course possible that there is some explanation hidden in the welter of facts and figures that has been presented to ~~us~~ us, but I think we should lay the above calculations before Mr. P. Grouard and ask him whether he can give satisfactory assurances as to the amount of accommodation available. We should at the same time remain with the Secretary of State in expecting a report from the Director of Public Works on the water supply of the trans-Malva district and we should also call his attention to what Mr. Hill says in his report upon this point, and ask what measures <sup>the Governor</sup> recommends for

maximizing the available water supply, suitable for pastoral purposes. It would also be well to remind him that one of the conditions laid down in our telegram of the 3rd of November (No. 34782) is that the trans-malva district shall be inspected by representatives of the A.F.C. and the A.M.C. New Hall express 11/10/1914

4050  
GOVERNMENT HOUSE  
NAIROBI  
BRITISH EAST AFRICA

EAST AFRICA PROTECTORATE.

24th November 1911.

No. 606

Sir,

With reference to my despatches No. 497 of September 6th and No. 548 of 30th idem, and your telegram of November 3rd, I have the honour to submit a further report upon the present situation and the measures which are being taken to comply with the instructions received in your above-mentioned telegram.

2. As I have already reported in my despatch No. 497, paragraph 5, those Masai who could not proceed into the extended Southern Reserve have returned to Laikipia, though some, I believe, as has been their former custom, have remained in the Northern end of the East African Syndicate's land. This is with the concurrence of the General Manager of that Company. As this portion of the property is at present undeveloped, I see no reason to interfere with this arrangement as it is for the benefit of all concerned.

3. In 1910 10,500 head of cattle moved into the Southern

THE RIGHT HONOURABLE  
LEWIS HAROURT, B.C., M.P.,  
SECRETARY OF STATE FOR THE COLONIES,  
DOWNING STREET, LONDON, S.W.

2.

Southern Reserve for the purpose of the circumcision ceremony. These, as I have already reported, have not returned. At the same time 10,000 head which still remained on settlers' farms near Naivasha also crossed into the extended Southern Reserve, and in the move which has taken place this year estimated 1,000,000 head of cattle and half a million sheep followed the preceding, so that in 1935 there was a herd of cattle and half a million sheep either to the Northern Masai or the Naivasha Masai, and now in the extended Reserve a herd of about 100,000 cattle and 500,000 sheep remain, the remainder of the herds having moved to the Trans-Amaka and to the Kajiado.

The original Southern Reserve have boundaries and entered the extended Reserve. In order to enable the grazing to recover, and provide for any further movement, if it is sanctioned, the Northern Masai who are now in the extended Southern Reserve are gradually proceeding to the one million acres in the Trans-Amaka, and those herds of the original Southern Reserve which are without their boundaries will be gradually returned to their own grazing ground.

5. - In your telegram of November 3rd you have laid down

N-3476

3.

down certain conditions which must be fulfilled before any further move can take place. I should desire to place before you the present position with regard to these conditions : \*

In my despatch No.624 of November 3rd I described the additional land which would be added to the Southern Reserve. The officer formerly in charge of the Northern Masai - Mr Collyer - has, on return from leave, been placed in charge of those Northern Masai who have moved into the extended Reserve, and has been instructed to at once utilise the area which I have described. The Masai who remained in the North are quite ignorant of the character of this country, and I have every hope that when they do become aware of its existence and value they will fully recognise the desirability of occupying it with their people. As I stated in my telegram of November 8th, no further move can take place until May next, and therefore ample time is available to thoroughly satisfy you or otherwise upon the conditions you have laid down.

6. With reference to my despatch No.497 of September 6th, Paragraph 8, Mr Ainsworth, who as I have already notified you was placed in charge of the move after its serious check, instructed all his officers to report upon any loss of life either to the Masai themselves or to their stock. No report indicating anything more than a normal deaadrage has been submitted.

\* I have the honour to be,

Sir,

Your humble obedient servant,

W. J. PHILLIPS  
GOVERNOR.

\* 38730  
N 81623

Gov/40370 East Africa Protectorate.

DRAFT.

Downing Street,

EAST AFRICA PROTECTORATE.

25 December, 1911.

753) SIR  
GENERAL PERIODIC BIRKBECK, R.C.A.  
B.S., R.R.

MINUTE

Sir,

Mr. Butler, 27/12/11.

I have the honour to acknow-

ledge receipt of your despatches

to Mr. J. J. Ward, Mr. J. Anderson and

Mr. Kinnell (dus) re. arrangement of November

relating to the removal of the  
northern Masai to districts south of  
the Uganda Railway.

2. I understand from the  
despatch which I have recently received  
from you that the present position is  
as follows:-

The extension of the Southern Reserve

originally

(34782)

the 30th of September. You there stated

that the number of stock owned by the

Northern Masai had been greatly under-

estimated and that they probably possess

200,000 cattle and 2,000,000 sheep. If

this estimate is accepted, there still

remain in or near the Northern Reserve

150,000 cattle and 1,500,000 sheep.

Takin' six sheep as equal to one head,

if either the equivalent of 400,000

cattle is still to be accommodated in the

South.

following

I gather that the dispositions

are being made. The Northern Masai

already in the extended Southern Reserve

are being moved westward to the trans-Amala

district. Their holding, as described

above, is 50,000 cattle and 500,000 sheep,

which equals 133,000 cattle. The trans-

Amala district, according to Mr. Macdonald's

report, can accommodate at present the

equivalent

equivalent of 185,000 cattle. This move will, therefore, leave in the trans-Amala district accommodation for 52,000 cattle only, and in the original extension of the Southern Reserve the accommodation for 188,000 cattle which will be vacated by the move. At the same time the Southern Masai from the original Southern Reserve are being moved back from the extension of the Southern Reserve into their old quarters.

According to Mr. Macdonald's report this will liberate 1,000,000 acres in the extended Southern Reserve, with a carrying capacity of one beast to six acres; in other words, accommodation for 166,000 cattle.

The total accommodation still available in the extended Southern

Reserve

Reserve and in the new extension referred

to as the trans-Amala district, is thus

DRAFT.

$52,000 + 133,000 + 166,000 = 351,000$  cattle.

This is not nearly adequate for the present

holding of the Northern Maadi (namely, the

equivalent of 400,000 cattle) who still remain in the  
wholes.

North, on the basis assumed above, a  
equivalent of 200,000 cattle  
should be glad, therefore, to learn whether,  
in the light of these figures,

they can give me satisfactory assurances

as to the amount of accommodation

available.

2. You will bear in mind that I am  
expecting important developments of

Public Works or the water supply of the

trans-Amala district. I observe that Mr.

J.K.Hill in his report states that although  
there is water in any quantity, in many

instances it is not in a form to accommo-

date thousands of cattle or sheep drinking

at the same time, and that to make the

abundant water useful for pastoral purposes  
certain

certain works will be required.

should be glad to be informed what measures you recommend for effecting this, and what the cost of such measures will be.

4. I presume that steps are being taken to comply with the condition stated in my telegram of the 3rd of November, to the effect that the (34782) trans-Amala district must be inspected by representatives of the Northern Masai and that they must express their satisfaction with it.

5. I have to enquire how many of the Northern Masai are still left outside their Reserve on the lands of the East Africa Syndicate or elsewhere, and whether you are satisfied there no difficulties are likely to arise from

from their remaining there for the present.

I have etc.,

L Haycourt.
