As I look that in shall be good

Generally the East African Regulations
my own there is no point that I
should like to raise - and that is the
information in para 20 of African as 775
by the Commission (suitability of conditions for Indian immigrants
in the Natalaland Area, African as 886, as
information on this head is given) This

para was drawn up some time ago and
in CO/1228708 and I doubt whether
it accurately represents present day conditions. It does
not of course want to discourage officers
to take out their wives to places where
the conditions of life are entirely hostile
to them, but on the other hand we do
not wish to discourage them if they can
be shown why they should not do so.

Capt. Shanker, who recently went out to
Lyons as a special mission & took
his wife out with him was very incident
on this point. He told me that he thought

that is made a great mistake in
 an enormous price for taking her home
 at 15 years. He said that he thought
 that her husband's health was
 was perfectly able to have a great part of
 her. It is said that she is a very
 boy of 10 years old but I would
 I would suggest sending a letter to the
 three last African institutions at the
 if they consider that the British in Africa
 account accounts present our conditions
 and of what they would suggest
 the suggestion of course has nothing to do
 with the question of providing support for
 Africa now. All that I want to do
 at is to get information as to the
 suitability of conditions for European labor
 the possibility of accommodating them if
 they accompany their husbands. As an
 other thing which we are doing for the

information, and the only information
 special information that we can find
 them at present is Section 21 of
 African 7th which is definitely
 discouraging. In the past one of the
 factors after the end of the war from taking
 her wife and with him to the
 & the day and been to the
 there was no objection to the doing so
 that we can hardly get any more

 I agree that we should
