Previous Paper

Railway to Mount Kenya (proposed)

Cannot decide matter as of such pressing importance  
as to justify consideration at this juncture whether or how  
funds can be got for the construction of such a line. Suggests  
no steps shall be taken & that no concession of it to be granted than  
when a force with bolt drivers work at all, roads of  
such as apparently scarce and sufficient time would be given  
to fully working standards and

(Minutes.)

Mr. Antrobus:

With regard to the 4th point  
of the letter Capt. Stevenson has not  
been given a moving commission to  
examine the whole of the Uganda to  
the S. Afr. Port. <sup>for</sup> ~~for~~ <sup>for</sup> ~~for~~ <sup>for</sup>  
intercourse with a view to framing a  
general scheme of railway extension.

The 4th point for instruction is  
(herein) ~~for~~ <sup>for</sup> ~~for~~ <sup>for</sup> <sup>for</sup>  
unimportant schemes referred to in (4) & (5) of  
this note, his real work is to report on  
the two big schemes

(a) for connecting the Lakes Victoria & Albert

(b) for connecting the River front with the  
Uganda railway.

With regard to 5th - it seems probable that

22506

the construction of the first bridge of the railway  
at the head from Dingo to Kalgoorlie, will be  
immaculate, as the can be paid for one of  
railway outlays within a reasonable time?  
If the same amount of time of very completed  
quitting connexion between the two cities  
is demanded, we shall be faced with an expenditure  
of over £1,000,000, which can be paid  
back & allow our outlays balanced to  
accumulate for a considerable period as it is  
not probable that Parliament would vote a  
sum of this magnitude, & it seems therefore  
that a sensible purpose could be served  
by waiting for Capt. Stevenson to complete  
the full programme before considering  
Scheme (b). This will be the first  
scheme to be reported on & is ought to  
receive the report in 2 or 3 months' time.  
With the info before them the Directors  
will be able to decide whether they will find  
so many or at all as they other factors  
involve tenders from private companies or  
individuals

engaged to the bid price of the  
Tenders. It might be well to have the  
proposal in the 11<sup>th</sup> place (in 1<sup>st</sup> to  
the 28<sup>th</sup> May) & say that, apart from  
anyჩuria fixed, we consider that a  
railway along the Kimberley interior would  
pay for the services given by the Ministers  
as per Capt. Stevenson's report & that a  
Vander Kool Hall, although  
a very large sum, may fairly be paid  
out of the proceeds of the

district than the Kimberley, would be the  
rich & populous Subdivision to be  
opened up & secured to utilization of  
labor to the parts of the Kimberley  
that can truly need it - all the  
time I have been here has been  
strongly advocated by the formal  
Meeting of the Appala Kimberley  
Trust to the Directors in the sense of  
the time & on foot that when Capt.  
Stevenson's report on the two water  
ways has arrived, we should issue  
tenders for timber leases on the land  
proposed by Mr. Hutchins, one of which  
would involve the extraction of the  
timber by Kimberley interests, & the other  
by the Government by the sale of trees.  
and then decide what of the  
alternatives it would adopt.  
We should also send off a copy of the trust  
to + our reply to the Directors with  
reference to previous acceptance, & ask him  
for the former report so as to be the  
guide for the extraction of timber  
(p. 17 of W. Hutchins' reported report)  
for a report of possible as to  
make for a report of possible as to  
the practicability of getting timber  
from the river - described in  
the latter point as follows:

Very well - this is just an ordinary  
Treasury letter; it goes without a tip.  
nothing. Our price is very low  
to be paid.

Dear Comptroller  
Lord Mayor

John  
22.7

But not for long.

Against the Nigerian decision, only one  
fish can be caught in a hole at a  
time.

10 If the majority endorse the Nigerian  
steering, we shall find things quiet.

But if they make large to the  
rest, then the sky will be falling  
for a further request.

Meanwhile we are entitled to  
ask for offers from foreign  
powers. If the ~~the~~ <sup>the</sup> ~~British~~ <sup>the</sup> ~~Government~~ <sup>Government</sup>  
permits, he should be  
able to make the time he needs to  
negotiate & make a proper

1000000 like Mr. Remond  
and others in "Free Africa"  
giving up

11/24/7

11 Lord Harcourt, a most proper & an  
intelligent man. I replied I suggested that he  
should first take some views with an E. & G. agent  
& Railway, bearing in mind that R. Forest  
must remain a part of the ~~the~~ <sup>the</sup> ~~Government~~ <sup>Government</sup>  
of which he is now the ~~the~~ <sup>the</sup> ~~Minister~~ <sup>Minister</sup>.

## TREASURY CHAMBERS

10027  
07

June 1907

Sir,

I have laid before the Lords Commissioners of His Majesty's Treasury Mr. Astrob's letter of the 28th ultimo (18616/1907), submitting a proposal for the construction of a branch line of the Uganda Railway, at an estimated cost of £400,000, in order to work the forest areas on the slopes of Mount Kenya in the East Africa Protectorate.

In reply, I am to state that My Lords fully agree with the Earl of Elgin (a) that the forest must remain Government forest, (b) that it cannot be worked without a railway, and (c) that such a railway, as a trunk line, should, if feasible, be constructed by Government.

At the same time Their Lordships - who have in mind the recent request of the Secretary of State for a sum almost as large for railway construction in Northern Nigeria - cannot regard the exploitation of the forest on Mount Kenya as a matter of such pressing importance as to justify them at this juncture in considering whether, or how, funds can be obtained for the construction of such a line.

They are of opinion that as Captain Stevenson has now proceeded to East Africa for the express purpose of examining and reporting on possible railway extensions in the

Under Secretary of State,  
Colonial Office.

353-155

the protectorates of East Africa and Uganda, no steps should be taken in the matter of the line now in question until his report is received, when the question of further railway development can be considered as a whole.

In the meantime, while refraining from detailed comment, They suggest that no concessions should be granted in the Kenia Forest.

I am to add that My Lords would be glad to be informed whether the Earl of Elgin could definitely secure that, if forest concessions were granted on Mount Kenia, timber would be carried over the proposed new railway in sufficient quantities to pay the working expenses of the line.

I am,

Sir,

Your obedient Servant,

Walter Buxton
