Course proposed by Coms is not quite satisfactory - Suggests best course.

W. Reed.

By your direction I have spoken to Col. Siddle as to this.

The only possible objection to the course proposed by D.M. is that it would take a month or two longer to get maps containing the new info on role in E.A.P. Col. Siddle sees no serious drawback in this & thinks that as the D.M. is granting in a favour we should agree.

WAR OFFICE
WHITEHALL, S.W.

The Director of Military Operations presents his compliments to the Under Secretary of State for the Colonies, and begs to acknowledge the receipt of his Note of the 4th instant, enclosing a letter from the High Commissioner, East Africa Protectorate, No. 607, dated 21st December, 1906, relative to the T.S.G.S. maps of East Africa.

Major-General Swart is of opinion, that the course proposed by Lieut Colonel Sadler is not quite satisfactory.

It is most desirable that the Topographical Section of the General Staff should be kept posted up to date with the most recent topographical information, in order that it may be embodied in new editions of its published maps.

The best course to take is for the Cadastral Branch of the Survey Department of East Africa to send home the alterations which should be made to the map.

the old. The state can then at once be altered and a
new edition published.

In his letter referring to the T.S.O.P. map,
Lieut-Colonel Sadler states "There are no copies
obtainable locally and it would be a great boon to the
general public if copies could be offered for sale by
the Survey Department with the additional information
incorporated thereon". If the course proposed above
is followed, Major General Dewart is prepared to supply
the High Commissioners with the number of copies required
for official purposes, and could issue a stock to the
Survey Department for sale to the general public.
The Survey Department would account for these maps.

[Handwritten notes and scribbles at the bottom left of the page.]

It is the opinion
that the additional
information should
furnished by the
Survey Dept. should
be embodied placed on
the plates by the Typo-
graphical Section of the
Gen. Office rather than
embodied in the sheets of
maps in the hands of the
local Survey Dept.

I have to request that
you will inform me
what number of copies
of each sheet of the maps
will be required for
official use and what
supply should be sent
for public sale. Your
requirements estimates
should, of course, be
framed ~~around~~
the fact that the maps

will be required, periodically
and ~~that~~ therefore, no
more copies should be
obtained at one time
than are likely to be
exhausted by current
requirements.

I have etc.
