(Subject.)

Survey Dept. - Supp. Estimate 1906-7

Submits for £3,325 with observation  
Asks sanction.

Mr. Reed

(Minutes.)

The despatch asks for a supplementary grant of £3325 made up as under:-

- Eng<sup>t</sup> Transport £212
- Materials 215 %
- Purchases 151
- Costs Add. Transport 180 %
- Other Allow. 344 %
- Transport 189 %

Change marked % would appear to be entirely on account of work in Sotik and the charge for Eng<sup>t</sup> Transport appears the smaller & part the necessity of less heavy work.

From the ~~total~~ amount of colonial work in Sotik for this year's stage was not contemplated in despatch (see memo of 8.10.05 & 16 Aug 05) and the estimate submitted to the Treasury was based on that report. It might be desirable to enquire why work was started in Sotik and was not contemplated by the despatch.

MEMORANDUM

My Lord,

I have the honour to submit copy of a letter from the Director of Surveys giving cover to a supplementary estimate for the current year, amounting to £3,325.

Director of Surveys No. 180  
Enclosure  
In Rite.

B. Your Lordship is aware of the great importance that is attached to the Survey in British East Africa, and it is essential that the progress of its work, intimately connected as it is with the settlement of the land, should be made as expeditious as possible.

C. That it would be necessary to frame a supplementary estimate for the present year was fore- shadowed in the previous correspondence. The estimate has been prepared and checked by the Treasurer and I have

marks to page 11. It will be a

item 10.

1896

Sir,

I have the honour to furnish to you Supplemental Estimates for the current year. I have framed them at a figure which will enable me to utilize the existing Staff to the utmost.

I have the honour to draw your attention to Home Office despatch No. 147 of the 21st March 1896, in which, in consequence of my representation in England, supplementary estimates were contemplated as a probable contingency; and which shows that the Office is likely to approve of them.

There is however one exception to this general principle, that is to say, I propose in them an increase of Cadastral Staff, in view of the commencement of cadastral work in the Sotik region on the 1st of January 1897, at which date I hope that the trigonometrical work in that part will be complete. Having decided to begin in Sotik it is essential that work should be continuous until completion of the same, and the staff of the Cadastral Branch is fully employed already.

About the 1st of January I propose to transfer the Trigonometrical Staff from Sotik in order to commence the work more

important work in this region. The... from that... days
