FROM THE SEASONS FESTIVITIES

The festive season makes large demands on ones wardrobe, and something fresh to wear is almost a necessity.

We are at present showing a complete range of new season Gowns for Day and Evening occasions. These feature all the new materials, colours and styles and are built in the best Paris and London fashions.

Evening gowns comprise new styles in satin, Liane, Georgette, Crepe de Chine and Nylon, in the softest colours, -poudre, Cydamon, Petunia, and Black with new trimmings in gold, silver or floral styles.

Among the Day Gowns will be found the newest of the latest Ninon and two perfect, gorgeous creations. Stockings in all colours, beautifully embroidered, and a wide range of new cloths in self colour.

And the prices are well within the reach of all. Call and give us the opportunity of showing these to you.

The New ROCKELEY IS NOW HERE

The Most Talked-of Car in the World To-day!

The new British made **BUICK SPECIAL DE LUXE TOURING** has been instantly recognized as one of the most outstanding accomplishments in motor car history—regardless of price.

THE unanimous crowd throughout the world who have inspected the new Buick De Luxe touring cars realized at once that Buick had produced a car which in performance, excellence of design and completeness in detail stands supreme.

DE LUXE TOURING
£445
Complete.

A point of comparison with any other make of car indicates the tremendous advantage of the Buick De Luxe even though the price of the other car be as high as £1000.

Self Elevating Top. The new Buick De Luxe has top which is entirely self elevating. When the top is down it is only necessary to unlatch the hold-down straps and the top will unfold and erect itself, going gently forward into position. Readiness for clamping to the wind shield supports.

Many other improvements make this new model unsurpassed in beauty, comfort and convenience, such as—Toric carriage cleaner—hardy genuine ray leather upholstery—wax-impregnated Tux-Tone Duro finish in alluring colours—servo-type four wheel brakes—and dipping head lights.

Adjustable Front Seats. the driving seats of this new model are adjustable. No more straining to feel cramped when driving. If more leg room is required the seat can be instantly moved back. For the average woman driver the car can be brought forward to position where the foot pedals can be easily and conveniently operated.

Rigid Type Side Curtains. The Buick De Luxe touring car is equipped with rigid side curtains which are held in place by the top. They can be driven with the top down but certainly when not in use these curtains are stored in a neat compartment in back of the rear cushion.

A vibrationless, soft, silent car. More than power enough for any emergency, or for any hill. Rugged in construction and with extra sturdy springs, you can drive it anywhere it is possible for a car to go.

The new **BUICK DE LUXE TOURING** is now on exhibition at our **Sixth Avenue Showrooms.**

MOTOR TOPICS

THE IGNITION SYSTEM.

Hints for Owners on Care and Repair.

THE SYSTEM DESCRIBED.

With the exception of the spark plug, the most complicated item on a motor-car, probably the most delicate, is the ignition system. It is the part to which the greatest care should be brought to bear, and which requires the most frequent attention. It is the system which, if it fails, will prevent the car from starting, and which, if it is not properly adjusted, will prevent the car from running smoothly. It is the system which, if it is not properly adjusted, will prevent the car from running smoothly.

IGNITION FAULTS.

Not a single engine, fully adjusted, poor insulation, and eroded or worn sparking plug, will run smoothly. The most common fault is a weak spark, which may be due to a number of causes. It may be a weak spark, which may be due to a number of causes. It may be a weak spark, which may be due to a number of causes.

THE TWO SYSTEMS.

There are two systems in use at the present time. The first is the battery system, and the second is the magneto system. The battery system is the more common, and the magneto system is the more expensive. The battery system is the more common, and the magneto system is the more expensive.

VALVE AND PISTON RINGS.

The valves selected for the last year were usually six in number, and the piston rings were usually of the type known as the "T" type. The valves were usually of the type known as the "T" type. The valves were usually of the type known as the "T" type.

THE HIGH SEASON.

The high season is now over, and the car is now in the hands of the owner. The car is now in the hands of the owner. The car is now in the hands of the owner.

The New LUXE IS NOW HERE

The Most Talked-of Car in The World Today!

The new British made BUICK SPECIAL DE LUXE TOURING has been instantly recognized as one of the most outstanding accomplishments in motor car history—regardless of price.

THE mammoth crowds throughout the world who have inspected the new Buick De Luxe touring car realized at once that Buick had produced a car which in performance, sturdiness of design and completeness in detail stands supreme.

DE LUXE TOURING £445 Complete.

Adjustable Front Seats
The driving seat of this new model is adjustable. No more need to feel cramped when driving. If more leg room is required the seat can be instantly moved back. The average woman when the foot pedals can be easily and conveniently operated.

Self Elevating Top
The new Buick De Luxe top which is entirely self elevating. When the top is down it is held in position by a spring. When necessary to adjust the height of the top, the top will self-elevate into position. It is easily, forward into position. It is easily, forward into position. It is easily, forward into position.

Many other improvements make this new model unapproachable in beauty, convenience, such as "Tools carried in a neat locker in right front door," automatic wind screen cleaner—leaves glass gray leather upholstery—valiant instrument board—motor-oil filler air cleaner—petrol filter—wheel brakes and tipping back lights.

A vibrationless, self-aligning car. More than power enough for any emergency, or for any hill. Rugged in construction and possible for a car to drive it anywhere it is required.

The NEW BUICK DE LUXE TOURING is now on exhibition at our Sixth Avenue Showrooms.

EDUCATION POLICY IN UGANDA.

Outlined on Speech Day at the Makerere College.
HIS EXCELLENCY'S MESSAGE.

The Meaning of "A Liberal Education."

A sense of Discipline, respect for seniors, High Moral Standard and Institute of Sportsmanship were outlined during Speech Day at Makerere College, Uganda, as the essential features of a Liberal Education (or motto).

Reference was made to **Qualitative** errors that the Uganda are committing daily on the surfaces of the Institution.

His Excellency the Governor, in his address to the students of Makerere College, Uganda, on the occasion of the opening of the new year, stressed the importance of a Liberal Education. He said that a Liberal Education is not merely a matter of books and papers, but it is a matter of the character and conduct of the student.

He said that a Liberal Education is one that is broad and liberal, and that it should be based on the principles of justice, equity, and good will. He said that a Liberal Education is one that is practical and useful, and that it should be based on the principles of industry, economy, and efficiency.

He said that a Liberal Education is one that is moral and ethical, and that it should be based on the principles of honesty, integrity, and respect for others. He said that a Liberal Education is one that is physical and athletic, and that it should be based on the principles of strength, endurance, and teamwork.

He said that a Liberal Education is one that is social and civic, and that it should be based on the principles of citizenship, responsibility, and service to the community. He said that a Liberal Education is one that is intellectual and scientific, and that it should be based on the principles of knowledge, truth, and progress.

The financial resources to the provision of such a Liberal Education in Uganda is a matter of great importance. His Excellency the Governor said that the Government is committed to the provision of a Liberal Education for all the children of Uganda, and that it is determined to do so as far as possible.

He said that the Government is committed to the provision of a Liberal Education for all the children of Uganda, and that it is determined to do so as far as possible. He said that the Government is committed to the provision of a Liberal Education for all the children of Uganda, and that it is determined to do so as far as possible.

JOHN BOYES
KING OF THE WAK-KIKUU.
(1924. EDITION.)

No more interesting book has been published for many years than this succinct record of an Englishman's adventures as a trader in East Africa. It tells how he gained an almost unerring ascendancy over the Kikuyu tribe, how he became their King, how he was captured and freed for his life by his own country, and, finally, how he was acquitted.

MOTURING TOPICS

THE IGNITION SYSTEM

Hints for Owners on Care and Repair.

THE SYSTEM DESCRIBED.

(Continued from previous page.)

Likes should vary other part of motor or engine of its make. The ignition may be set by following order of its make. It is a good rule to follow the order of its make in setting the timing of the engine. A faulty point in the timing of the motor may mean a similar lack of efficiency in the use of the fuel in the cylinder. It is a good rule to find out if any one of the points is faulty and to remedy it as soon as possible.

POSSIBLE MAJORIT FALTERS

In the complete system there are three main elements, the high tension and the battery. The most common fault in the high tension system is the spark plug. The spark plug is the most important part of the system. It is the spark plug that ignites the mixture in the cylinder. If the spark plug is faulty, the engine will not run. The spark plug should be checked and replaced if necessary. The battery is the source of power for the ignition system. It should be kept in good condition and recharged if necessary.

FAULTY SPARKING PLUGS

Coming back to the sparking plugs, the first thing to do is to see the points. These should be clean and free from carbon and soot. There should not be any small pieces of carbon or soot on the points. The points should be cleaned and the spark plug should be replaced if necessary.

BATTERY SYSTEM FAILURE

It is a good rule to check the battery system regularly. The battery should be kept in good condition and recharged if necessary. The battery should be checked for water level and for any signs of leakage.

THE REASON FOR THIS

The reason for this is that the carbon in the cylinder, when the spark has been very different from the one that is in the cylinder. The spark plug is the most important part of the system. It is the spark plug that ignites the mixture in the cylinder. If the spark plug is faulty, the engine will not run. The spark plug should be checked and replaced if necessary.

KEEP THE ENGINE HOT

Keep the engine hot during winter. The engine should be kept at a normal temperature. The engine should be checked for any signs of cooling and for any signs of overheating.

New Years Resolutions Worth Keeping

THE NEW LOOK FOR THE

BUICK SPECIAL DE LUXE

The Most Talked-of Car in The World To-day!

The new British made BUICK SPECIAL DE LUXE TOURING has been instantly recognized as one of the most outstanding accomplishments in motor car history—regardless of price.

THE manufacturer's words throughout the world who have inspected the new Buick De Luxe touring cars realized at once that Buick had produced a car which in performance, excellence of design and completeness in detail stands supreme.

A point by point comparison with any other make of car indicates the tremendous advantages of the Buick De Luxe even though the price of the other car be as high as £2,000.

DE LUXE TOURING £445 Complete.

Self Elevating The new Buick De Luxe has a top which is entirely self elevating. When the top is down it is only necessary to unfasten the top straps and the top will unfold and erect itself, going gently forward into position in readiness for changing to the wind shield support.

Adjustable Front Seats The driving seats of this new model are adjustable. No more need to feel cramped when driving. If more leg room is required the seat can be instantly moved back. For the average woman driver the seat can be brought forward to a position where the foot pedals can be easily and conveniently operated.

Trunk A folding type trunk rack at the rear is supplied for carrying luggage while the spare tyre is carried on the right hand running board.

Rigid Tyre The Buick De Luxe touring car is equipped with rigid side car Spire Curtains which are made of wire mesh. The car may be driven with the top down but curtains up. When not in use these curtains are stored in a neat compartment in back of the rear cushion.

Many other improvements make this new model unsurpassed in beauty, comfort and convenience, such as—Tools carried in a neat locker in the trunk. A new "one-step" automatic wind screen cleaner—happily genuine grey leather upholstery—new motor—new Duo Tone "Duo-tone" oil filter—air cleaner—petrol filter—new Duo Tone "Duo-tone" in striking colours—Servo-type four wheel brakes—and dipping head lights.

A vibrationless, rust, silent car. More than power enough for any emergency, or for any hill. Bugged in construction and with extra springs, you can drive it anywhere it is possible for a car to go.

The new BUICK DE LUXE TOURING is now on exhibition at our Sixth Avenue Showrooms.

COST OF LIVING—WHEAT PRICES

To the Editor, "E.A. Standard." Sir:—In your issue of the 4th inst. you refer to the cost of living in your issue of 27th Nov. I have not considered this position from the consumer's point of view, which it is a mistake to ignore, especially in the case of wheat.

The present fluctuation in the price of wheat is undoubtedly due to the supply not being equal to the demand.

Millers, it must be admitted, do not take advantage of the shortage to increase prices as we have done. However who can blame them for this? It is a fact that the supply available is small, a fact which is not likely to change.

Now, the only remedy is for farmers to grow sufficient wheat to meet the increasing demand, or permit millers to import duty free wheat to make up the deficiency. The importation could be restricted to the Department of Agriculture so as to insure that the local supply apparatus is not damaged. This would require the demand to be met satisfactorily.

My wish is that the Government should consider the wheat situation. It is a fact that the supply available is small, a fact which is not likely to change.

I thought you or some of us, by a change of law or some other means, to do something to help the small farmer. It would be a pity if the Government should not do something to help the small farmer.
