# African Standard

MOMBASA TIMES & UGANDA ARGUS. WITH WHICH IS INCORPORATED THE LEADER.

First Established Newspaper Published in Kenya and Uganda.

Official Organ of the Royal E.A. Automobile Association, Agricultural & Horticultural Society of Kenya, etc.

S. 1918

REGISTERED AT THE GENERAL POST OFFICE AS A NEWSPAPER.

NAIROBI, SATURDAY, JULY 4, 1925.

Price 50c per annum. Postage locally, 5c; Postage British Possessions 10c; Postage Foreign 4s.

The Car for the Country

## THINK!

Before buying your car just exactly what you want it to do for you. If you want it to transport your friends or if you want utmost luxury and comfort we can import for you a "FORD MODEL" the name of luxury refinement and beauty but if you want just reliable transport for yourself, your family and your supplies combined with all reasonable comfort, good service, economical running costs and low first outlay

## COMPARE!

In the first place, the appearance, the running expenses of the latest model Ford Touring Car, the Ford "Service" Car, and Ford closed models with those of more expensive makes. Judge actual Ford performance in this country and

## INVESTIGATE!

Service arrangements—doubts what to buy. If you want best value for your money? State the importance of continued service, and if it is reliable, economy, and low priced transport that you require you will then "buy a Ford and bank the balance."

The Service Company, Limited.  
FORD IMPORTING DEALERS & DISTRIBUTORS  
(Nairobi & Mombasa).

WE NOW HAVE IN STOCK.

## THE CEDER PROVINCE.

Views from Kansas

**Provincial Commissioner's House, Kismayu**

Personalities of the Colony—  
Right (front row)—Lt Col F. N. L. King,  
G.H.Q., R.E., Senior British Commissioner in  
charge of British interests.  
Centre (front row)—Mr J. G. W. Hope,  
C.M.G., the second British Commissioner and  
now British Consul at Kisumu.  
Centre (back row)—The Hon. Major R. W. B.  
Robertson-Eustace, D.S.O., Legislative Council  
member for the Coast. The group also  
includes Mr R. Dick, Manager of the Halawad  
Cotton Estate.

what. Many should be done at once, not least in regard to the teaching of personal and social hygiene. Those who are adequately acquainted with the needs of each Colony, and with the educational system, will have a better knowledge of the stability of the institutions of their countrymen. And we have the means at our disposal if we wish to attempt in each of the different Colonies.

We are impressed by the fact that more generalisation on the subject are not possible than on the subject of education.

In regard to the administration of its state and women's welfare, there are no great problems, but many differences in breed and character of those who must decide what is best for the welfare of the home, among whom the first essential is that they should be well educated. It is expedient, at least, to have them fit for the service of the State.

The high rate of infant mortality in Africa, and the relatively small number of qualified midwives, make instruction in hygiene, particularly the treatment of the common diseases of childhood, a vital factor in the welfare of the home, among the first essentials, and which would be taught by well qualified women teachers.

On the other hand, the education of children, the primary consideration for children, should be given enlargement to the extent of adult men. Otherwise there may be a lack of interest in the welfare of the children in the community.

The representative of the late Mr. H. M. Ode (who have kindly consented to supply the names of their agents) has said that the children he has seen in Tanganyika are much the same as those in the Club House, taken place on Friday evening, July 3, 1920.

It should take the opportunity offered to him to say that the Club House is not a long journey from Nairobi as it is only a mile from the Port Hill Road, and with an almost full moon, makes for a safe walk home.

The donations and post we have had in Kenya are now quite large, and the result of a good evening's work in every part of the country, where the people are anxious to combat this will be the same as those in the Club House.

(4) No other commercial industry exists than agriculture, which will be dependent on the extent of the new education.

As and so it is hoped that Friday night will prove to be a success, and that many social events will be held in Nairobi.

**FOOTBALL, NOTICES.**

The following notices have circulated throughout East Africa during the last few days:

(1) "An Officer will be present during the week beginning July 6, 1920, to collect National Hail Tax."

**ORGANISATION OF SCHOOL SYSTEM.**

School systems in their structure will differ from Colony to Colony. It is suggested that when completed a general scheme of organization following educational opportunities as far as the conditions permit should be drawn up in the Colony concerned.

(2) Primary education both for the adult and child, and the education of young children. (3) Secondary or intermediate education, which will be of one type of school and several types of schools.

(4) Technical and vocational schools.

(5) Institutions, some of which are not yet known, such as teacher training colleges, etc., which will vary according to local conditions.

(6) The question of what is to be done with the education of each Colony as far as possible, a scheme should be drawn up, and traditional traditions by interesting the people in the education of their children for the benefit of the Colony.

The education of the visitors of the community.

We have pursued for enough quarters where they were on statistically to know that the disease has been extinguished with information picked up from many stations and from those who have well defined lines of supply. The results were then made on which the contractor responsible for the enterprise to its ultimate completion. The results were at least as good, before they sent the Zeppelin to Europe. The results were so good that we had to add to the resources of the contractor to meet the demands of a world-wide field of work.

These two milestones, the one of labour and the other of disengagement from the contractors, were the cause of an annual increase in demand for labour, which was met by the contractor approaching the "absolute maximum" of his capacity and native family members, and Native, who were a mere notch above the former.

It is written, the future will support the requirements of the contractors, the future will support the future requirements of the contractors.

INTERVIEWED.—Q.

Klausen, June 25, 1926.

#### THE SCHUTZHEERL

To the Editor.—Sir.—I would like to convey to you my thanks for your very warm article in your paper, the very appreciative appreciation of which many happy years in Kenya will bring me.

Very sincerely, I am, etc., H. E. S. STRAIN

Holy Trinity, June 25, 1926.

#### Answers to Correspondents.

A little bit of London Tenant Farming.—"Dear Sirs.—Please accept my thanks for the wood, no. 2."—Editor.

BRITISHER.—In both cases the restriction owing to the lack of space was removed, and under these circumstances it is now possible.

LOCAL RECEVIES.

An interesting point is that the vaccine is made locally and has now been dispensed to some two members of the various teams.

It is now being carried out in addition to the Medical Officer's services, and the service is rendered to the medical officer's service which is self-contained.

The local section is equipped with clothes, ration books, and other articles, and leaves at any moment to deal with a reported outbreak.

Yours, etc.,

H. E. S. STRAIN

Nairobi, July 2, 1926.

WATERFALL FORECAST.

To the Editor.—Sir.—

May I request you to print

your opinion on Weather Forecast

and the letter in which Mr.

"T.G.M." expresses his

view of the work and expense

involved in running a meteorological

station?

In the fact, as you state in your letter, that the cost of

running such a station

is about nearly run away,

the farmer is negligible.

If, as Mr.

"T.G.M." states in his

letter, the cost and expense

are considerable, one could require

an explanation of the

cost of the

station.

But in the case of weather forecasting, the cost of the equipment

is not the only item.

There seems to be sufficient

material for local observa-

tions, and the weather reports of the meteorological

stations were sent in to head-

quarters.

Yours, etc.,

H. E. S. STRAIN

Nairobi, July 2, 1926.

### CORRESPONDENCE

The Editor does not accept responsibility for the views expressed by his correspondents in their comments, and in all cases the name and address of the writer must accompany a letter, but necessarily for publication, but as a guarantee of good faith it is also essential to receive confirmation.

### KENYA MEDICAL OFFICERS OF THE COLONY

To the Editor. — E.A. Standard. We are most interestedly pleased to learn that the Kenya Medical Officers of Health, in today's issue of the E.A. Standard

have published in the "new country" such an account of the duties of the M.O.H. and the work of his subordinates in the medical and that the most of necessity is a certain amount of experimental work in that connection. But there is no doubt whatever, that it is illegal and morally wrong to inflict illegal and painful treatment upon a patient to pass a certain kind of work and I hope the undertaking to scrap it is still further experiment!

I have lately installed a water borne sewage system at the address and a cordon tank is part of that system.

Before the work was finished, I had to give an undertaking that the system would have to be altered in the event of a nuisance arising, and this is a case where some thoughtless persons have been very unfortunate to be the cause at Mogni.

I believe mine is a similar system to that recently installed at Government House, and other areas to be interested in the Government's work who will give a similar undertaking and upon being asked, whether they agreed or otherwise to an arbitrary condition?

It certainly is not a business proposition front my personal view that it is better to have no cordon tank than one or two, there is no encouragement to hang one's own cordon up opposite to that of one who has no security.

It appears that progress which everyone is so anxious to make, is the result of numerous small difficulties and obstacles, such as this must be the lot of many misundestandings and obstacles as between the Health Department and the property owner, or whoever is responsible for such interminable delays.

The same state of affairs exists in respect to houses and latrines. They have, within the past few years, been improved upon. This has brought about an increased number of insanitary types, but it hardly justifies the scrapping of former types, which were passed in

accordance with the then existing municipal pattern.

When the water-borne sewage system is a fault somewhere in the system, it affects every household on property owned or managed by the State, or by individuals, in at least one case where such an impossible situation exists and it was blocked up the next day. The native should be educated up to the use and convenience of conveniences, and a native before they are educated and placed at a distance without proper instruction.

With regard to Makers quarters, it is now the policy to construct windows at a certain height from the ground and a certain distance from the ground.

In most cases, a window of a house is built in such a way that it obscures the road, or other boards are put across it, so that a person can see through them.

I fully understand that there have been threats to leave because they had to move to another quarter. I venture to suggest what is most needed in a town like Nairobi is an architect of approved medical experience attached to the staff of the M.O.H. and in addition he should work under the aegis of the Municipalities Town Planning and General Purposes Committee, whose special duty it should be to provide the ratepayers with a decent expenditure in connection with continual improvements more often than not, in regard to the same works.

Yours etc,

### LORD OLIVIER'S SPEECH

To the Editor. — E.A. Standard.

Sir.—Lord Olivier in his speech to the House of Lords as recorded in your issue of the E.A. Standard, said—  
"Let us not be too hasty in pronouncing his [Lord Balfour's] able and useful services."

As any rate, he has done much for the rest of us. Many members of the House of Commons sympathise and one could almost believe that he was not far wrong when they left him many glaring misstatements unchallenged.

Lord Olivier said that according to the Commissioners report the number of adult males over 15 capable of labour was 243,575 and that the Hot and Poll Tax amounted to £375,000 or more per annum per head. The rest of the world are worth £200,000. It is to be paid not only by every able-bodied male but in respect of wives in respect of parents who are unable to labour any more and in

respect of unfreighted and indigent relatives who receive the Hot and Poll Tax.

So that every able-bodied male who goes to work in Kenya Colony has got his Hot and Poll Tax two or three times on account of those who are dependent upon him.

He has to pay all the wages earned by this wife and girls who can and do work what about the money earned by toto under 15 years of age. Does Lord Olivier believe that the wives and children are allowed to remain in the colonies or does it go to pay the Hot and Poll Tax to the poor "indolent" able-bodied male who does not work?

Judging by the average peregrinations of these half-educated workers in this district the amount of money earned by them toto pay the £575,000 must be very large and doubtless in districts nearer the Reserve the per capita is much higher.

Even if after deducting the cost of the table-held men tax is work for two or three months in the year, is that a hardship? What settler would not be immensely happy if he could earn £500 or eight thousand pounds a year by the payment of tax, etc., whilst his wife and children were keeping home fires burning?

The whole of the speech is biased as it is impossible to tempt to refuse to allow a settler to work for two or three months in the year, the rest of the time to work for the table-held men tax is work for two or three months in the year, is that a hardship? What settler would not be immensely happy if he could earn £500 or eight thousand pounds a year by the payment of tax, etc., whilst his wife and children were keeping home fires burning?

Yours etc,  
F. WATKINS, J.M.

Nakuru, July 20.

### ON THE WRONG ROAD

To the Editor. — E.A. Standard.

Sir.—Oscillating with my reading the debate in the House of Lords on East Africa, a shabby, half-baked old man, who had seen the world, took a walk and a talk the drama of race, politics and the like, but unfortunately has not quite got round to it and is still muddling these few lines to reveal all the facts as he sees them from it. For he is almost too terrible to bear.

He is a very slight old man, but might be forthcoming. His address is the reading of the debate appears with all its shallowness, which doesn't seem to fit in with such a tragedy as is being acted.

This old man is simply told that mother with a small ill-fated old baby appeared at X's farm. The old baby had fallen into the fire and was burnt to death the next day previously, and we were told the burnt all down the hillside. The woman had been in the aid of X, told the woman she would give a note and she was to go with baby to the hospital in Nairobi only about 17 miles. Some time later the woman returned to X, who had not been to the fire, but noted the bone protruding from the stump. It was so terrible a sight that told the mother that she was to go to Nairobi at once and on her return to pay the bill to X. The next day I met her at another neighbour's house a few days later. The woman turned up there and exposed a enormous bill, which she had never received no medical care, in fact, the name of the nurse at one time the night was awful.

The terms of the house when she the state of the child, went to a mission station, the house there was a daily charge. I hear that the woman did not know what she could do; the woman travelled for six hours, the last hour was the most terrible, and I understand nothing says the life of this poor old woman below awaits her end.

This is life in Africa. The people are most part in that debased condition that the Home of Lords know that things go on daily out of control, venture to say anything, and they did not say that they could not perceive that there was an unbroken chain of slavery, but their silence would force them to every name available to prevent recognition.

I wonder about the people who have their time having a hypothetical title of slavery doesn't, as I have already said, the Hot and Poll Tax for twelve hours a day, is not slavery, even if it is of some kind, but it is slavery. Is it any if it would be could be nation of life drunks?

## THE CENTRAL LOUNGE

SHOP ASSISTANTS, TAILORS.  
Many of these are at present in England and South Africa, and  
therefore have no difficulty in finding work. Those who  
have been here before and are now employed with pleasure  
will be able to find work again. Those who have not  
been here before may obtain employment by applying to their  
nearest Agent or to the Royal Standard Office, Nairobi.  
B.R.A.T.O., Royal Standard Office, Nairobi, Kenya Colony.  
Telephone 100.

## TYPEWRITERS

### COMPARE THE WORK

"Compare the Work" is more than a slogan. It is a fair invitation and an appeal to the intelligence of the typewriter buyer and user. It is also an expression of confidence by the Royal Typewriter Company in their products. The Royal is a special type writer designed and built to answer the last word for that office efficiency which aggressive business organizations must have.

The most responsive elastic key action over a devised under-slide system is built with much less effort.

It is this special product has a distinction which makes one letter stand out among many. "Royal" clear-cut type impressions reinforce the lasting power of your typed correspondence. Perfect quality writing is every user's right.

The typewriter itself, "Royal," features illustrated and described in the booklet give graphically an insight of the master mechanical achievements which have given the Royal typewriter its world-wide fame.
