NOTICE

Under the auspices of the Department of Agriculture, and the Horticultural Society of Kenya, model ester trials will be held near Nakuru about the middle of January, 1926, shortly before the Agricultural Show at Nairobi.

The trials will be conducted under a Supervising Committee consisting of one or more practical farmers, officers of the Department of Agriculture, and an engineer from the Ministry of Lands.

For purposes of publication particulars will be taken of each mixture and comparative records will be kept showing the results of the trials.

Entries on a prescribed form will be received by the Secretary to the Agricultural and Horticultural Society, Memorial Hall, Nairobi, on December 15, 1925. An entry fee of £10 for each tractor will be charged.

[FROM OUR OWN CORRESPONDENTS.]
Rangoon News.
The rain which continued on for days last week continued on Saturday. For some days we had cold weather with a drizzle of rain starting during the night. On Saturday, however, through all the day there have been showers of two small bursts of rain towards the night, and these have gone further into the ground than the previous rain, and have been accompanied by a strong breeze from the North-West, considering the number of days and showers that have had there has not been a great deal of rain in all. It is surprising how clear the air is, everything is looking fresher than it has done for some time, and the coffee trees are showing a decided improvement.

The wise man seeks
to maintain health in every changing circumstance. The foolish man procrastinates until he has lost health, perhaps, for ever. The wise man avoids this by the occasional dose of Andrew's Liver Salt, the remedy that stood on the family shelf when he was a child—with good reason. Time has passed on, and Andrew is valued more than ever for freedom because of its cleansing, invigorating, blood-purifying properties. Andrew's Liver Salt is particularly acceptable in this climate, being a cooling, refreshing Saline.

RESUME.
Development in Kenya has shown a steady advance in the Highlands, and to a certain extent the Coast. Such advances have been noted in the fact that the agricultural lands are much better cultivated and the soil is being reclaimed by the use of manure. OLDSMOBILE-SIX

Special Sports Touring

The refined Oldsmobile special touring model is a car that attracts favourable attention wherever it is seen.

Steel disc wheels and nickel plated bumpers front and rear give it a smartness of appearance seldom found in cars of even greater higher cost.

Windscreen wings add to the driving comfort, and in the rear is placed a trunk for carrying luggage and the necessary equipment of those who like to spend their holidays in the open country.

In color is beige, made especially attractive by reason of the Duxco finish. Distinctive beauty is the only term that will describe this Oldsmobile.

The price is £312—only slightly more than the price of the Standard Touring Model.

Standard Touring

Many people have wondered how a car as good as Oldsmobile can be purchased for so little money.

The reason is found in the idea on which Oldsmobile is founded—the desire to produce a Six to equal other Sixes in performance and appearance and yet to sell low enough to be within the reach of everyone.

Only General Motors Corporation could have carried out this ideal... With its vast resources, its enormous purchasing power and its staff of skilled engineers it was able, in conjunction with Oldsmobile Works, to build the Oldsmobile and to offer it at a price below that of any other Six.

A General Motors product, Oldsmobile has behind it the stability and permanence that only such a vast corporation can give. Built into it are the results of years of research, and the best of materials are used in its construction.

COFFER AND KILINDINI FIRES

To the Editor of "E. Standard."—A statement was made recently in the House of Lords that a Kikuyu harbour charges an acre nearly half the price of an acre in London. The charges per ton on coffee are 10s. Kikuyu (from Nyansa) 12s. 0d.; transfer to ship 10s. 0d.; Osondu 6s.; and London docks 8s. 0d. The noble Lords should not be too hasty in order to be trying to force Kenya to spend more money on coffee which can not handle cargo as cheaply as England. The income over 10s. per ton due from railway rates was not made for reduction of height on the foot, that is, the amount of tonnage is 50 per cent for most of height. These charges can therefore afford any decrease due to the use of lighter gauge than the Kenya gauge. It is a very serious business for the Kenya Government to build a line at £200,000 a year. Putting the cost of railway rates at the long run of the present Government of Kenya.

The railway man does not view the matter in this way. The farmer, the former had a lighter gauge line, the latter has a heavier gauge line. The railway man has his own way when he has a heavier gauge line. The railway man has his own way when he has a heavier gauge line. The railway man has his own way when he has a heavier gauge line.

THE GREAT NATIVE PROBLEM.

To the Editor, "E. Standard."—In the Weekly Times of July 16 last appeared a report of a meeting of the Native Affairs Committee of the House of Commons. The object of promoting emigration to South Africa was mentioned by Field Marshal Lord Plumer and the Colonial Secretary. The latter in his speech mentioned the following remarks to the effect that the native population of the whole of the sub-continent of Africa from north to south face the various settlements of white men.

It was noted the fact of the white man's coming to Africa. It was noted the fact of the white man's coming to Africa. It was noted the fact of the white man's coming to Africa. It was noted the fact of the white man's coming to Africa.

It was not a mere pound of flesh, but it was a pound of flesh. It was not a mere pound of flesh, but it was a pound of flesh. It was not a mere pound of flesh, but it was a pound of flesh.

The Tinga Tinga

IN HARDING STREET

Every native servant in Nairobi knows it. It has recently been thoroughly overhauled. New buildings erected, new paint installed, and new stocks imported. It is now a veritable store of industry which you are welcome to inspect.

Resides being known among the native population as the Tinga-Tinga the business is officially recognized as

HARTZ BELL & LAWSON L
 Plumbers, Tinmen, Sanitary Engineers.
 BOX 125, PHOENIX, 105. GRAHAM'S "HARTZ."

the natives are not only insolent and defiant, but they are also very cunning. They are very cunning. They are very cunning. They are very cunning.

Our Paris Letter

[From PARISER CORRESPONDENT.]

Black and white are worn more than ever. A black satin frock is almost as popular as a white organdy. A dress from pastel embroidered in black, or a white dress with black geometrically will probably prove itself with white organdy or georgette.

Large white hats are lined with black georgette and trim with large black bows. Black hats are lined with ivory silk or organdy, and trimmed with white and silver brocade, or black and white with a narrow silver lining. A large white straw hat lined with black may be adorned with a shower of red roses or feathers.

VIRTUES OF BLUE.

Various shades of blue are creeping back into favour. Kuba is the most popular. It is a soft, cool frock, and powder-blue kuba is used for blouses and frocks. Evening blue materials—satin and tulle—have been used, and even—tortoise blue is liked, or perhaps blue above other shades with the bromine letter.

WHELED GOWNS FOR EVENING WEAR.

Very charming gowns for evening are being obtained by sewing a silver lace band along the neck and across the shoulders. More gowns in a flame colored shade with a gold lace band.

LACE FROCKS.

Flank pink and rose pink frocks are being made in tulle, satin or soft silk and covered with fine lace. A black tulle frock with an ornate lace yoke and a charming gray and white tulle frock with a gold lace band are also being made.

Forty and Twenty

COMPENSATIONS OF MIDDLE AGE

(By Marie Chen.) The thing we see less than ever is the average compensation. The man who is forty and twenty is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty.

MERE MATURITY

The thing we see less than ever is the average compensation. The man who is forty and twenty is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty.

THE SUPERIOR PERSON

Every man has a deficiency. The superior person is the one who is not aware of his deficiency. He is the one who is not aware of his deficiency. He is the one who is not aware of his deficiency.

OTHER INDUSTRIES

But of course there was quite a bit of other industries. The man who is forty and twenty is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty.

BANOMETRIC IMPULSES

After many weeks of our and the banometric impulses. The man who is forty and twenty is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty.

MADDERN HART

Maddern hart is a good deal of the man who is forty and twenty. He is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty.

Good for Hoop Cereus

If you are making your own good for hoop cereus. The man who is forty and twenty is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty. He is not as well paid as he was when he was twenty.
