EAST AFRICAN OFFICE IN LONDON.

Huge Attendance at its Inauguration.

THE COUNTRY EULOGISED.

[FROM OUR VIEW CORRESPONDENT]

The inauguration of the East African Office at Trafalgar Square drew a large attendance in the Hotel Metropole and the fact that the office is housed with such an excellent central situation in London was commented upon.

Mr. J. H. Thomas spoke in high approval of the establishment of such East African trade offices in London.

MOTING TOPICS

ENGINE KNOWS.

Distinguishing Causes of Outward Notes

THREE CUES

Nothing is more aggravating than to be unable to trace a knock originating from the engine. Much may be done by the application of the following cues, given in the order in which they should be followed.

The average serious motorist is apt to be greatly distressed if the common knock from his engine. Often he will manifest the desire to support a more bearing when the trouble is with the bearings. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

ING A STEP

In such a case the remedy is obvious. The cylinder head should be removed, or the combustion chamber of the head if not detachable, and the carbon scraped off the head. The piston, every trace of wood, paper, grease, etc., should be removed. The cylinder head should be removed, or the combustion chamber of the head if not detachable, and the carbon scraped off the head. The piston, every trace of wood, paper, grease, etc., should be removed.

The average serious motorist is apt to be greatly distressed if the common knock from his engine. Often he will manifest the desire to support a more bearing when the trouble is with the bearings. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

IN THE CASE

In the case of a cylinder engine with the opening, gas will have some distance to travel before it can reach the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

The average serious motorist is apt to be greatly distressed if the common knock from his engine. Often he will manifest the desire to support a more bearing when the trouble is with the bearings. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

LOCKING AT

locking at rest, but, providing the bearings are of good quality, the engine will run smoothly. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

The average serious motorist is apt to be greatly distressed if the common knock from his engine. Often he will manifest the desire to support a more bearing when the trouble is with the bearings. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

WHEN SMALL-ENP BEARING

A worn gland-end or little-end bearing is generally the heaviest of the bearings. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

The average serious motorist is apt to be greatly distressed if the common knock from his engine. Often he will manifest the desire to support a more bearing when the trouble is with the bearings. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

PISTON SLAP.

Piston slap is a tapping sound set up by the side thrust on the piston rings when the latter are in contact with the cylinder wall. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

The average serious motorist is apt to be greatly distressed if the common knock from his engine. Often he will manifest the desire to support a more bearing when the trouble is with the bearings. PINKING AND KNOCKING

It is difficult to detect a form of knocking but generally what is known as "knock" has a rather hoarse and heavy sound, though which is described as "pinking" or "knocking" on a steel cylinder. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

INSURABLE FUEL

The use of an insurable fuel may produce a similar effect, high compression engine. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

WHEN SMALL-ENP BEARING

A worn gland-end or little-end bearing is generally the heaviest of the bearings. The bearings are the primary cause, such as the crankshaft, in the combustion chamber. The bearings are the primary cause, such as the crankshaft, in the combustion chamber.

PISTON SLAP.

Piston slap is a tapping sound set up by the side thrust on the piston rings when the latter are in contact with the cylinder wall. TO-DAY is one of motorised living and working—of swifter movement—of increased accomplishment. The problem, squarely up to motorcar designers, engineers and manufacturers, has been the construction of a type of engine and motorcar to meet the vital and urgent needs of this new day.

Such a motorcar is now here. Certainly no modern development in motor car design so completely answers the needs and requirements of the new-day driving as the new Buick.

Decide now to see and drive this epochal motorcar at the very earliest opportunity. Nothing will so surely emphasize the vast difference between you, yourself, first the time you drive a Buick, equal to the new Buick has a flashing pick-up which no other car can responsiveness to the lightest touch of the magical accelerator pedal which the new Buick is handled will impress one at once.

You may expect much from the new Buick, you will not be disappointed, for the new Buick is the result of 25 years' careful and painstaking development. The new model Buick has swept the past all the inefficiencies and limitations of the motorcar as we has known it before. For economy, speed, power and safety, rugged roads, capacity for heavy loads, ease of control, the new Buick is a revelation and stands as the recognized leader in new-day design.

Buick 24-35 Sport Touring

No other car in the world offers all these important advantages.

- Four-wheel Brakes, Oil Filler, Air Filler, Fuel Filler, Fully equipped sealed Chassis, Dipping Head Lights, Power, Light-light Steering, Light Pressure Clutch, Valveless Head Engine, Remarkable Fuel Economy.

There are more Buicks registered throughout the world than any other car, except Chevrolet and Ford. Buick performance in registrations means extra miles turned in by old Buicks built. The oldest cars in regular operation in East Africa are Buicks. Buick engineering has accomplished this by their unique superior stamina and placing it in every Buick, through the use of Buick's famous Sealed Engines. All Buick operating parts are barricaded from dirt and air to insure longer life with less sleep.

"SAFETY FIRST" IN AVIATION.
Exciting Fire Scenes at Mombasa.
Dog Detectives.

Ingenious Inventions Recorded.
Important Buildings in Danger.
Coastal Garage, GUTTED.

A novel safety device, designed by a French inventor, is being used in a small airplane, which is being used for the purpose of testing the strength of the material used in the construction of the aircraft. The device is a small, cylindrical object, which is attached to the engine of the aircraft. It is designed to detect any fire which may occur in the engine, and to automatically shut off the fuel supply to the engine, thus preventing the fire from spreading. The inventor claims that this device is a great improvement on the existing safety devices, and that it will be of great value in the future.

GERMAN TESTS BREAK
DOG DETECTIVES.

In connection with the Police Dog Training School at Mombasa, the following results have been obtained in the tests conducted by the dog detectives. The dogs were able to detect the presence of a small amount of opium hidden in a box, and to locate the box in a large room. The dogs were also able to detect the presence of a small amount of opium hidden in a bag, and to locate the bag in a large room. The dogs were also able to detect the presence of a small amount of opium hidden in a car, and to locate the car in a large street. The results of the tests show that the dog detectives are of great value in the detection of opium, and that they are a great improvement on the existing methods of detection.

Cruden's Historical Crudeuns No. 12

George Washington, as a British subject, and before he became a patriotic American, was noted for his truthfulness. On one occasion he fell asleep but if "was he who had broken apart a case of Cruden's Soap just arrived from Bristol. To his father's surprise he replied, "Please I cannot tell you" and forthwith added, "I fell down upon the box with my little unshank, for I thought it was something else. But when I found it was CRUDEN'S SOAP I felt it for I never wash myself."

CRUDEN'S SOAP

Made in Kenya.

MOTORING TOPICS

THE HEADLAMP. Getting the best from the Lighting System.

HOW TO FOCUS.

How often one hears the remark: "My lamps are not good at all."

POSSIBLE METHODS ADAPTED.

In general, headlights are focused on very shallow lines. The shafts in most of the headlights are parallel to the axis of the beam.

THE TYPE OF HEADLAMP USED.

It is a mistake to generalize that one headlamp type is superior to another. The type most commonly used is the parabolic type.

It is, of course, necessary that the greater part of the light should be concentrated in the beam parallel to the reflecting, for the light is only reflected in the beam of a parabolic beam if it is situated at the correct focal point.

HOW TO ADJUST THE BULB.

The procedure when lamping headlights is to select a standard road width tyre, buldging or overinflating to suit the tyre on each axle.

Side-Car Connections.

INVENTION OF FLEXIBLE COUPLINGS.

It will be clear from this that the cycle may be fixed to increase the lever either towards or away from the passenger attachment.

THE FLEXIBLE COUPLING.

The flexible couplings are of simple construction, each side-car connecting arm being attached to a rod free to slide endwise through a metal ball, but checked by springs on either side of the ball.

side might on account of the flexibility of the special couplings. On the inside tube connection is mounted ball cranks, one arm of which is attached to a nut on the cycle, such as the tank rail.

It will be clear from this that the cycle may be fixed to increase the lever either towards or away from the passenger attachment.

WHEAT GROWERS USE RHODS AND BE FREE OF RUST.

The following is an extract of the Manufacturer's Report: "Rhodes gives vitality to plant life, enabling it to resist more successfully diseases of all kinds. In one recent experiment in the Argentine with a Wheat crop the area treated with Rhodes was entirely free of 'Rust' whereas the neighbouring areas were affected to the extent of 25 per cent."

Rhodes can be had from the Sole Agents:

J. G. ARONSON, P.O. Box 468, NAIROBI.

TO-DAY is one of motorised living and working - of swifter movement - of increased accomplishment.

The problem, squarely up to motorcar designers, engineers and manufacturers, has been the construction of a type of engine and motorcar to meet the vital and urgent needs of this new day.

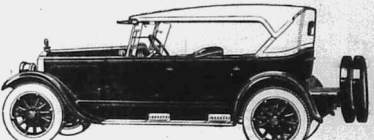

Such a motorcar is now here. Certainly no modern development in motor car design so completely answers the needs and requirements of the new-day driving as the new Buick.

Describe now to see and drive this epochal motorcar at the very earliest opportunity.

Nothing will so surely emphasize the vast difference between ordinary motorcars and the new Buick Six as an afternoon's test. Yourself, feel the first time you drive a Buick.

The new Buick has a flashing pick-up which no other car can equal. Its driver will enjoy it from the first moment. Its responsiveness to the lightest touch is amazing. The magical ease with which the new Buick is handled will impress one at once.

Do not expect much from the new Buick; you will not be disappointed. For the new Buick is the result of 25 years careful and painstaking development. The new motorcar has swept away all the inefficiencies and limitations of the motorcar as one knew it before. For economy, speed, power on hills, rough roads, capacity for heavy loads, ease of control, the new Buick is a revelation and stands as the recognised leader in new-day design.

No other car in the world offers all these important advantages.

- Four wheel Brakes, Oil Filter, Air Filter, Exhaust Filter, Completely Sealed Chassis, Cantilever Springing, Draining Head Lights, 7 Horse Power, Finger Light Steering, Light Pressure Clutch and then made in Valve-in-Head Engine, Remarkable Fuel Economy.

There are more Buicks registered throughout the world than any other cars except Chevrolet and Ford. Buick pre-eminence in registrations means extra miles turned in by old Buicks build. The oldest car in regular operation in East Africa are Buicks.

Gillilan & Company, Ltd. DISTRIBUTORS

Standard Insurance Co., Ltd. All Risks underwritten.

Make a point in the year of buying a motor building plot and investing through the South African Insurance Company, for whom we act as agents.

Owning your own means security of investment.

The investment is a soundest nature. It is house is infinitely cheaper than paying rent and under the influx of investment to this country equals points to a steady rise in higher values.

When going on leave it is no difficulty in getting a house let either furnished or unfurnished.

Many tenants are seeking where to live and by leasing your house you can easily get a fair return on your investment capital.

Then make a point of consulting us without delay. We have the choice of all the properties and are always ready to dispose of any information.

We also have a wide range of farms to offer in all districts at all prices and for every purpose of farming.

We arrange mortgages expeditiously on any security, and have ready available for this purpose ranging from £500 to £5,000.

We are valuers of property, businesses, and insurance, etc.

Cruden's Historical Crude's No. 12

George Washington, as a British subject, and before he became a patriotic American, was noted for his trials. On one occasion he fell. "Will you let me know who has fallen, apart a case of soldiers' shoes, and several more. To his father's aid, he replied, "Father, I cannot tell a lie" and forthwith added, "I did once upon the day with my little muskadeer, for I thought it was something else. But when I found it was CRUDEN'S SOAP, I lost my head." (See next page)

CRUDEN'S SOAP Made in Kenya.

WHEAT GROWERS USE EBROS AND SE FREE OF RUST.

The following is an extract of the Manufacturer's Report: "Ebro gives vitality to plant life, enabling it to resist more successfully diseases of all kinds. In one recent experiment in the Argentine with a Wheat crop the area treated with Ebro was entirely free of 'Rust,' whereas the neighbouring areas were affected to the extent of 25 per cent."

Supplies are still available from the Sole Agents: J. G. ARONSON, P.O. Box 468, NAIROBI.

CHESS PROBLEMS

PROBLEM No. 780 By P. S. Roberts. From the Chess Amateur Black 4

White to move. White has a pawn on f3, a knight on g3, a rook on h3, a king on g1, a queen on d1, a bishop on c1, a knight on b1, a rook on a1, a king on e8, a queen on d8, a bishop on c8, a knight on b8, a rook on a8.

PROBLEM No. 781 By R. H. Cameron. From the Chess Amateur White 4

DEATH OF ANON RUBEN

Chess players throughout the British Dominions will learn with profound regret of the demise of Mr. Anon Ruben, existing after a long illness, at the age of 77. The late Mr. Ruben was a most kind and generous friend to the Editor of this paper.

At the death of a son through a player he raised with the great master's assistance and his tournament record is very fine. His greatest achievement probably was his victory in the masterly tournament at Cologne in 1906, which he won with 14 points out of 16 possible.

Mr. Ruben passed away at the age of 77, after a long illness. He was a most kind and generous friend to the Editor of this paper.

THE MOSCOW TOURNAMENT

Being to the major players who came to Moscow to play the tournament. The tournament was held in Moscow from July 1st to July 15th.

It is understood for Ashton, who is only the third player to have won the tournament, that he is the most successful player of the tournament.

SOLUTIONS: Problem No. 779. White to move. White has a pawn on f3, a knight on g3, a rook on h3, a king on g1, a queen on d1, a bishop on c1, a knight on b1, a rook on a1, a king on e8, a queen on d8, a bishop on c8, a knight on b8, a rook on a8.

Problem No. 780. White to move. White has a pawn on f3, a knight on g3, a rook on h3, a king on g1, a queen on d1, a bishop on c1, a knight on b1, a rook on a1, a king on e8, a queen on d8, a bishop on c8, a knight on b8, a rook on a8.

TO-DAY is one of motorised living and working - of swifter movement - of increased accomplishment. The problem, squarely up to motorcar designers, engineers and manufacturers, has been the construction of a type of engine and motorcar to meet the vital and urgent needs of this new day.

Such a motorcar is now here. Certainly no modern development in motor car design so completely answers the needs and requirements of the new-day driving as the new Buick. Decide now to see and drive this epochal motorcar at the very earliest opportunity.

Nothing will so surely emphasize the vast difference between ordinary motorcars and the new Buick Six as the new delight you, yourself, feel the first time you drive a Buick. The new Buick has a flashing pickup which no other car can equal. Its driver will enjoy a new mastery of the road. Its responsiveness to the lightest touch is amazing. The magical ease with which the new Buick is handled will impress you at once.

You may expect much from the new Buick, you will not be disappointed, for the new Buick is the result of 25 years careful and painstaking development. The new model Buick has swept past all the inefficiencies and limitations of the motorcar as we have known it before. For economy, speed, power, on high-speed roads, capacity for heavy loads, ease of control, the new Buick is a revelation and stands as the recognized leader in new-day design.

No other car in the world offers all these important advantages.

- Four Wheel Brakes, All Lillies, Air Filter, Fuel Filter, Completely Sealed Chassis, Cantilever springing, Dipping Head Lights, 22 Horse Power, Finger-Light Steering, Light Pressure Clutch, Valve-in-Head Engine, Remarkable Fuel Economy.

There are more Buicks registered throughout the world than any other car - except Chevrolet and Ford.

Buick predominance in registrations means extra miles turned-in by old cars that would not be running at all. Buicks were not Buick-built as only Buick built. The oldest cars in regular operation in East Africa are Buicks and it is worth it in every Buick part, and then, by playing around that Second Engine, and the "Trade-In" Buick operating parts are barricaded from dirt and wear to insure longer life with less upkeep.
