# BUICK WINS

**European Classic** 

PARIS to NICE.

BUICK

2nd BUICK ALFA ROMEO

FARMAN

5th LORRAINE-DIETRICH

DISTRIBUTORS FOR BUICK Gilfillan & Company, Ltd.

 $\begin{array}{ll} \textbf{THE Grand International Paris-Nice Run,} & \textbf{where speed, acceleration,} \\ \textbf{braking power, hill climbing ability and all-round flexibility are severely} \\ \textbf{tried, is one of the classic motor car contests held in Europe.} \end{array}$ 

The 3 to 5 litre class, in which two Buicks were entered this year, attracted the finest and most powerful cars the continent produces.

A sweeping triumph for Buicks resulted in which these remarkable cars secured both 1st and 2nd places. They also outclassed all competitors in the Kilometre Acceleration Test, the Kilometre Braking Test, the De La Turbie Hill Climb and the Slow Run in High Gear, Trial.

It is a worthy achievement for a car to capture any single one of these honours from such a picked field of cars. To actually leave all competitors behind in EVERY SINGLE TEST OF ROAD PERFORMANCE is supremacy

The two Buick cars entered were strictly stock models as supplied by the factory—and identical to the models supplied to the public in Kenya.

YORK GARAGES Ltd., Nairobi.

How many cars, at any price, have dual ignition? Very few, other than thousand-pound cars and the Ford. Or planetary transmission? The Ford and two others, including one of the most expensive cars in the world.

# £185

Or all-steel bodies? Very few, other than the Ford though this latest method of construction has overwhelming advantages in lightness, strength, rigidity

It's not low price that sells the Ford—but high quality at low price. Only the immense Ford production, only supremely efficient factory organisation, can produce so expensive a car at so low a cost.

# Do You Know This?

Wise buyers have become shy of 'fickle' cars—the cars that change models every year. Stude baker cars are always kept up to date. Changes are made as improvements are perfected—without spectacular annual announcements. Your pride and your investment are both protected when you

1200 skilled inspectors make 96,000 inspections on the three types of Studebaker cars during manufacture and before delivery to you. There is no more rigid inspection in the industry than this.
 It ensures long. If ea and dependable service.

10. It costs Studebaker £120,000 a year to completely machine all its crankshafts. This is a practice usually followed only by the very highest priced cars. It explains why Studebaker

#### Introducing The New Gramophone

#### "His Master's Voice"

The New "His Master's Voice "Instrument en bodies entirely new discoveries relating to sour amplification. Hitherto the exproduction of tech-notes (high frequency) because the source of the quency vibrations) has been correspondingly was the result being Jack of balance. The "New H.M.Y. Machine adjusts this balance and give reproduction in which both base and treble is blett irow quistlon, as in the action performant

SIR EDWARD ELGAR says:
"The most important invention in the history of the Gramophone."

Externally, and in manipalation, the New H.M.V. Gramophone is similar to the standard Instrument. The secret of the amazing realism of its reproduction is the design of the special tone chambe taper arm and a new type of sound box. It reproduces details of orchestration that were formerly unheard. The tone is richer, rounder and mor true to the original than has ever before been heave from a Gramophone.

SIR LANDON RONALD says:-"The most amazing tone of any Gramophone I have ever heard:"

To give the Nairobi public au opportunity of hea ing this New Gramophone we are holding, durin this week, a series of Gramophone Recitals in on Showrooms where the latest Orchestral, Yoza Instrumental and Dance Music will be played Details of the daily programme will be given, a another page. Come and discover new beauties, you are not of the programme of the property of the ing to a mechanical reproduction.

ALBERT COATS says:-"Most remarkable in its faithful reproduction."

New Portable

Model

Shgs. 200-

This illustrates the New Portable H.M.V. Machin which embodies all the new features of reproduction. Surface noises are practically eliminate and among the many portable gramophones on it market this "H.M.V." Model is in a class by itsel

EUGENE GOOSSENS says:-

"A prodigious achievement in quality and

LORRAINE-DIETRICH

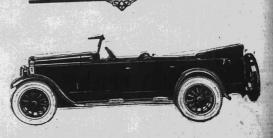

DISTRIBUTORS FOR Gilfillan & Company, Ltd. THE Grand International Paris—Nice Run, where speed, acceleration, braking power, hill elimbing ability and all-round flexibility are severely tried, is one of the classic motor car contests held in Europe.

The 3 to 5 litre class, in which two Buicks were entered this year, attracted the finest and most powerful cars the continent produces.

A sweeping triumph for Burcis resulted in which these remarkable cars-secured both 1st and Montages. They also outclassed all competitors in the Kilometre Acceleration The Kilometre Braking Test, the De La Turbie Hill Climb and the Slow Run in High Gear Trial.

It is a worthy achievement for a car to capture any single one of these behind in EVERY SINGLE TEST OF ROAD PERFORMANCE is supremacy

ck cars entered were strictly stock models as supplied by the i identical to the models supplied to the public in Kenya.

## Judge by Comparison!

How many cars, at any price, have dual ignition? Very few, other than thousand-pound cars and the Ford. Or planetary transmission? The Ford and two others including one of the most expensive cars in the world. Or torque tube drive? Not all, even now, though its superiority is universally recognised. Like three-point engine suspension, it was pioneered by Ford!

Or all-steel bodies? Very few, other than the Ford-though this latest method of construction has over-whelming advantages in lightness, strength, rigidity and long wear.

 $\dot{H}$ 's not low price that sells the Ford—but high quality at low price. Only the immense Ford production, only supremely efficient factory organisation, can produce so expensive a car at so low a cost.

# Do You Know This?

8. Wise buyers have become shy of fickle 'cars—the cars that change models every year. Stude-baker cars are always kept up to date. Changes are made as improvements are perfected—without spectacular annual announcements. Your pride und your investment are both protected when you

1200 skilled inspectors make 95,000 inspections on the three types of Studebaker cars during manifesture and before delivery to you. There is no more rigid impection in the industry than this it ensures long life and depondable service.

10. It costs Studebaker £120,000 a year to completely machine all its crankshafts. This is a practice usually followed only by the very highest priced care. It explains why Studebaker care always run smoothly—without vibration.

PARIS to NICE

BUICK

BUICK

ALFA ROMEO FARMAN

LORRAINE-DIETRICH

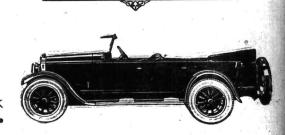

DISTRIBUTORS FOR Gilfillan & Company, Ltd. THE Grand International Paris—Nice Run, where speed, acceleration, braking power, hill climbing ability and all-round flexibility are severely tried, is one of the classic motor car contests held in Europe.

The 3 to 5 litre class, in which two Buicks were entered this year, attracted the finest and most powerful cars the continent produces.

the miss and miss poverfact cars are common with these remarkable cars. A sweeping triumph for Buicks resulted in which these remarkable cars secured both 1st and 2nd places. They also outclassed all competitors in the Kilometre Acceleration Test, the Kilometre Braking Test, the De La Turbie Hill Climb and the Slow Run in High Gear Trial.

It is a worthy achievement for a car to capture any single one of these honours from such a picked field of cws. To actually leave all competitors behind in EVERY SINGLE TEST OF ROAD PERFORMANCE is supremacy indeed.

The two Buick cars entered were strictly stock models as supplied by the factory—and identical to the models supplied to the public in Kenya.

# Judge by Comparison!

How many cars, at any price, have dual ignition? Very few, other than thousand-pound cars and the Ford. Or planetary transmission? The Ford and two others including one of the most expensive cars in the world. menuting one of the most expensive cars in the world.

To reare take derive? Not all, even now, though its originally is universally recognised. Like three-point engine augmenton, it was pinomered by Ford!

Or all-steel bodies? Very few, other than the Ford though this lasts method of construction has overwhelming advantages in lightness, strength, rigidity and long wear.

It's not low price, that sells the Ford—but high quality at low price. Only the immense Ford production, only supremely efficient factory organisation, can produce so expensive a car at so low a cost

THE BAST AFRICAN STANDARD sa Times & Uganda Argus

FRIDAY, MAY 21, 1926. THE KLIARE OUTRACE.

The terrible story of the exper indignation will be aroused sugbout the country culminat-we feel sure, in the conviction the strongest possible ures are now required in Kenya o deal with a situation which outsins all the elements of grave contains all the elements of grave danger to the relationship between the races. No decent person, whatever his colour, will seek to find any ecuse whatever for the outrage. Even in the minds of every "respectable African there

shment. The law in itself can enterely satisfy the demand nt and emotion loctrine of " an eye for an eye "
a not fully satisfied by the appliation of the law through the teel impelled to demonstrate

African community among they live that, despite the

ence with white women. The law is hedged round with conventions of civilisation not always suitable of civilisation not aiways suitable to primitive peoples and there are circumstances under which justice must be freed from the trappings with which it is invested in civilised communities and in a country like Kenya made manifest in all its stark and crude force and richtenenses are duty to human. righteousness as a duty to bunian ity. We earnestly hope that the day will not arrive when it will be found necessary in this Colony to resort to extreme methods of implanting a lesson in the minds of the African tribes but cases of bar the African tribes but cause of borrous brateally such as that which has occurred at Kljube will rake the issue if steps are not taken by the authorities who administer the law to exert the time force of their powers to infer the maximum purjakment. We large that the Government of this country will realise the vital recessive of the need for discipline among the country will realise the vital recessive of the need for discipline among the country will realise the vital recessive.

law, there are occasions upon which the most drastic steps must be taken by the public to impress on primitive peoples that under no circumstances whatever will British colonists tolerate interfer-

try will realise the vom-of the need for discipline among people who are reacting against contact with civiunsecustomed contact with civi-lisation. The absence of a real and sautary discipline is at the botton of many of our difficulties in th.

present stage of the evolution of the African. The traditions of bar bariam and licence—are still to the African. The traditions of har-bariam and licence are still discover and close to the present generation of the native peoples to be entirely similared from their conduct test which instance the made to understand, by the most drastic measures which justices differance—are not-vide the law—that respect for the European woman and child be demanded of the first things to be demanded and of the first things to be demanded and entored in this country. Only and enforced in this country (nil), a few days ago a salitie, we not more do eight years' impression ment for attempted rape on a Europe woman in the centry of Nanobi. We feel impelled to state our firm opinion this sentence of impression entitle sentence of impression entitle the sentence of impression entitle in itself a quite inadequate punishment for the gravity of

red on the grounds that it form of deterrent that be reserved for specific cases. The case of attempted rape was such an instance in which corporal punishment ought to have been added to the sen-tence. We have no wish to be brutal, or savage or inhuman in our views but we believe that not only one severe flogging but periodical floggings ought to be administered as an essential part of the punishment in all cases involving assaults on women and children. If our control in this Colony is going to count for any-thing at all it must have some semblance of authority behind it in dealing with certain aspects of native affairs and, although we native affairs and, although we regret to say so, we believe that the outbreak of indiscipline which is a noteworthy feature of the native life in Kenya to-day, native life in Kenya to-day, particularly in township areas, is seriously encouraged by the actions of the Courts in strictly interpreting the technicalities of legislation and the law of evidence without any regard to commo sense. That attitude helped to sense. That attitude helped to a great extent in spreading stock thefts; it is surely assisting now in the tendency to insolent deflance of authority which in a hundred minor ways is constantly observable among the native com-numity. A Township like Najrobi' is overflowing with loafers and exceedingly casual labourers and if the Police will turn their un-divided attention for a time to clearing Nairobi and other dis-

clearing Nairobi and other tricts of undesirables, and if at the same time the Government will find work for those leafers to per-form in the interests of the rest of the country and its inhabitants, there will be less opportunity for law-breaking. Within the past few months several cases have occurred in which armed attacks

#### Introducina The New Gramophone

#### "His Master's Voice"

The New "His Master's Voice" Instrument on bodies entirely new discoveries relating to some amplification. Hitherto the reproduction of trebs notes (high frequency vibrations) has been almost the production of the state of the

SIR EDWARD ELGAR says:

"The most important invention in the history of the Gramophone."

Externally, and in manipalation, the New H.M.V. Gramophone is similar to the standard Instrument. The secret of the amazing realism of its reproduction is the design of the special tone chambe daper arm and a new type of sound box. It reproduces details of orchestration that were formerly unihoused. The tone is richer, rounder and methods to the original than has ever before been heard from a Gramophone.

SIR LANDON RONALD says:-

"The most amazing tone of any Gramophone
I have ever heard."

To give the Nairobi public an opportunity of hearing this New Gramophone we are holding, during this week, a series of Gramophone Recitals in our Showrooms where the latest Orchestral. Yoos Instrumental and Dance Music will be played Details of the daily programme will be given on another page. Come and discover new beauties if a courter record and a new pleasure in listening to a mechanical reproduction.

ALBERT COATS says:-

"Most remarkable in its faithful reproduction.

New Portable Model

This illustrates the New Portable H.M.V. Machine which embodies all the new features of reproduction. Surface noises are practically eliminated and among the many portable gramophones on the market this "H.M.V." Model is in a class by itself.

EUGENE GOOSSENS says:-" A prodigious achievement in quality and

# BUICK WINS

### **European Classic**

PARIS to NICE

BUICK

and BUICK

3rd ALFA ROMEO

4th FARMAN

5th LORRAINE-DIETRICH

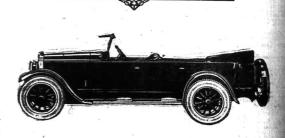

DISTRIBUTORS FOR Gilfillan & Company, Ltd. THE Grand International Paris—Nice Run, where speed, acceleration, braking power, hill climbing ability and all-round flexibility are severely tried, is one of the classic motor car contests held in Europe.

The 3 to 5 litre class, in which two Buicks were entered this year, attracted the finest and most powerful cars the continent produces.

A sweeping triumph for Buicks resulted in which these remarkable cars secured both 1st and 2nd places. They also outclassed all competitors in the Kilometre Acceleration Test, the Kilometre Braking Test, the De La Turbie Hill Climb and the Slow Run in High Gear Trial.

It is a worthy achievement for a car to capture any single one of these honours from such a picked field of cars. To actually leave all competitors behind in EVERY SINGLE TEST OF ROAD PERFORMANCE is supremacy indeed.

The two Buick cars entered were strictly stock models as supplied by the factory—and identical to the models supplied to the public in Kenya.

#### Judge by Comparison!

£185

How many cars, at any price, have dual ignition? Very few, other than thousand pound cars and the Ford.

Or planetary transmission? The Ford and two others including one of the most expensive cars in the world.

Or torque tube drive? Not all, even now, though its superiority is universally recognised. Like three-point engine suspension, it was pioneered by Ford! Or all-steel bodies? Very few, other than the Ford. though this latest method of construction has over-whelming advantages in lightness, strength, rigidity

and long wear. It's not low price that sells the Ford—but high quality at low price. Only the immense Ford production, only supremely efficient factory organisation, can produce so expensive a car at so low a cost.

### AFRICAN STANDARD

SATURDAY, MAY 22, 1926.

JUSTICE' AND THE MATIVE

In the course of a leading article yesterday on several aspects of parive indiscipline sug-rested by the brutal attack at Kijahe, we referred indirectly to Aljane, we referred indirectly to the effect of certain phases of the administration of justice upon the ninel and character of the Afri-can in this country. The Cham-ber of Commerce in Nairobi has ce given consideration to the ifficult problem of the adr cases and has taken the definite tap of appointing a sub-commit-ter to collect evidence with the object of bringing the facts before the notice of His Excellency the Governor. "The Chambers's of the opinion" the resolution con-cludes, "that this step is further rankews! necessary in the interto prevent his further No otternoration. No one who takes even a casual interest if the work of the Courts of Justice in Kenya can fail to discover numer-ous instances in which the judg-ment pussed by the Judicial officer ems to be seriously at variance with ordinary common sense. The Magistrate's Court in Nairobi ars to be the source of more one curiosities of justice than other part of the Colony But effere it is the case that, although there are exceptions, al-most every district in the Colony produce evidence of prosecu-s in which the decision of the rt has been against the weight of common-sense. Strictly speak-ing the decisions are generally based on some irregularity in the evidence or some flaw in the pro-cedure but the impression is left

doubtedly guilty and the accumu-lation of such instances is a definite danger to the morale of the native community. It is difficult for the layman to inter-nere in the machinery of justice sees in the mannery of justice especially when the procedure is as complicated as is the case in this country where the body of law does not have a common source and has been altered and amended to endeavour to meet 'changing conditions, but the frequency with which those curiosi quency with which those curiosities appear and tendency which seems to be apparent in some districts to our on the side of modification in passing sentence on a native eriminal suggress that the matter is one which has its foundation in something other than the law, that it in in fact, the sentence of temperament and outlook on the part of individual Magintane. Instances will readily be trate. on the part of individual Magin-trates. Instances will readily be recalled—the latest dealt with the presentation of a disputed tim of rigarettes to a native shop cun-ployee—and taken as a whole there can be no doubt that they have a serious effect upon the native population, particularly in the townships. The African, instead of taking his punishment from his employer in the oldfrom his employer in the old-fashioned way which was good for both of them, has been encourag-ed on the slightest provocation to run to the District Commissioner with his complaints. On the oth of them, has been er with his complaints. On the other hand the number of petry disputes which arise between an employer and his servants must lead to a policy of condoning offences rather than face the loss of time in taking the servants to a court only to discover that a

white employer is the subject of a lecture on conduct and the

a becture on conduct and the native is regarded as an injured party. We have no doubt that the position of Magistrates is peculiarly difficult and the readi-ness of the legal fraternity to take a case to appeal on the alightest fault in lewer court pro-cedum must framework defeated.

ends of justice after the Magis-tate has sentenced a guilty man. If the criminal law were revised, considered and sumpticed we believe that the fint of mentily guilty persons here justice products would be numinosed. But that does not account for the erg much graves, charge which the public teng against Mugistrates. Its needs of regarding the law as the medjam provided for the administration of paints, Magastrates some medjam provided for the adminis-tration of justice, Magatarishe seem to selopt a definite intragmism to the European in a case in which white and back are concerned, and an attitude of protection towards the accused instare on the ground that the African, being uneophisti-tector, requires the benevious care of the Magatarise in order than all his interests may be adventised. his interests may be safeguarded. Starting from that point of view. the Magistrate requires the most complete perof and obedience to the dictates of the law of evidence in the case of a native and carefully on is probely the platest days in the case. The native does not understant the precularities of western law or of the Indian Peaul Code we applied by white plates and the case of the cas son is probably the plainest fact in the case. The native does not gress towards the aim of becom-used citizens. In regard to Magistrate's Court in Nairobi. have noted than during out months the Magis-maths. we have mored mas curing recent months the Magis-recent months the Magis-trate has in several inst-suces rejected cases because of the inadequacy of the evidence brought forward by the Police. The work

ENLARGEMENTS

STRANGE STORY IN A GLASGOW COURT.

Scots marriage pseuliarities were revealed in Glasgow Sheriff Archibald Graham Steart, misies Archibald Graham Steart, misies for Gelder Park Church, Govan, was flound to egully of contra-ingly Act by performing a mar-riage ceremony in a better of the religious ceremony, but without a range ceremony. In a semantic of the contract of the contract of the annan having been produced. It was stated that on the even-no of February II a semantic on our for the contract of the con-units of the contract of the number of the contract of the con-tract of the contract of the number of the contract of the con-tract of the con-tract of the contract of the con-tract of the con-tract of the con-tract of the contract of the con-tract of the con-tract

the short court, of the a life's and formed them that the marriage could not take place that day, Mr. Stuart expressed regret that he could do nothing, as the hams had not been preclaimed, him that some special provision was made for saflors and soldiers during the war, and suggested that these provisions might still that the arrangement had ceased.

that the arrangement had ceased.

A SCOT'S MARIHAGE.

Mr. SUBART then proposed is Scott marriage, "He went to his study," said Mrs. Staart in the witness-box for the sake of the shift to take part "and I Epillowed Scott marriage."

Her husband finally agreed, and simple exerumy took place, only a few words being spoken while the man took a signer time from his own finger and put it on Mr. Staart afferwards offered.

From no own inger. and past to work of the Mr. Stuart afterwards offered up a prayer in his attist, He had drawn up a decurrent, in which it was stated that the couple has wide, and "in the sight of God and according to Scots" law are duly married. "as a signed by married." we as signed by the sailor and the woman and by Mr. and Mrs. Stuart. It was handed to the woman, but "Mr. handes to the woman, but "Mr. habadom" returned they should have been applied to the woman to the sail to the woman to the sail which was been and the sail to the woman to the sail to

4 NED CONTROLLED CONTROLLED CONTROLLED CONTROLLED CONTROLLED CONTROLLED CONTROLLED CONTROLLED CONTROLLED CONTROL

8. Wise buyers have become shy of 'fickle' cars—the cars that change models every year. Stude-baker cars are always kept up to date. Changes are made as improvements are perfected—without spectacular annual amountements. Your pride and your investment are both protected when you own a Studebaker.

1200 skilled inspectors make 86,000 inspections on the three types of Studebaker cars during manufacture and before delivery to you. There is no more rigid inspection in the industry than this. It ensures long life and dependable service.

It costs Studebaker 6120,000 a year to completely machine all its crankshafts. This is a practice usually followed only by the very highest priced cars. It explains why Studebaker cars always run

SIR EDWARD ELGAR says:
"The most important invention in the of the Gramophone."

Externally, and in manipalation, the New Gramophone is similar to the standard Inst The secret of the amazing realism of its rition is the design of the special tone laper arm and a new type of sound box produces details of orchestration that were unheard. The tone is incher, rounder at true to the original than has ever before be from a Gramophone.

SIR LANDON RONALD says:-"The most amazing tone of any Gram-I have ever heard."

To give the Nairobi public an opportunity ing this New Gramophone we are holding this week; a series of Gramophone Recta Showrooma where the latest Orchestral Instrumental and Dance Music will be Delails of the daily programme will be another page.
