give, expect the arrival shortly of our first shipment of the New McCormick Deering Narrow tread Sisal and Coffee Tractors. Absolutely Tractor constructom. Its main features are identical with those found in regular McCormick Deering Tractors. Years of gruelling on have proved very feature. Such proved dependability plan the narrow tread makes this new Tractor extremely desirable.

#### Some Reasons Why Practical Men Select McCormick-Deering Tractors

Powerful Engine. These tractors have ralve-in-head, heavy-duty engines. They are suilt to deliver an abundance of power over a ong period of years. Working parts are horoughly protected from dust and dirt.

Removable Cylinders. Each cylinder is east separately and fitted into the engine block which makes it possible to place a worn cylinder easily and economically. New cylinders make practically a new engine. Crankshaft. The heavy-duty two-bearing rankshaft runs in large ball bearings.

Throttle Governor. The throttle governor guilates the fuel to the load and keeps the seed practically uniform.

Pirans. The pistons are closs fitting ave four rings which insure good compon and most power from the fuel

Gear Drive. The power is transmitted to the drive wheels through high-grade gears that ren in oil.

en in oil.

Pigh-Tension Magneto. The high-tension requests supplies a hot spark for starting and a ning. Engineers consider this the best the of ignition for a farm tractor.

Oil-Pump. The oil is kept in circulation by gear oil-pump which assures proper lubri-ation on grades, hillsides, etc.

Penders. Strong, durable fenders protect tractor and operator from dust and dirt. Platform. The platform adds to the com-ort of the operator and provides carrying

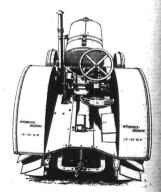

space.

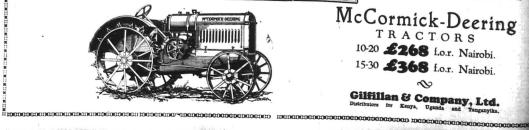

Oil Air Cleaner. Air that reaches the cylinders must pass through the oil air cleaner which removes the dust and dirt.

One-Piece Main Frame. The main frame is a single casting. There are no weak joints bolted together. It is dustproof and oil-tight Gears Run in Oil. All gears run in a bath of

High-Grade Bearings An unusually large umber of ball and roller bearings are used thich are easily bearings are used thich are easily bearings are used thich are easily bearing to the con-nd save power for the terms expenses as the Cooling System. The therm-explose system of cooling maintains uniform engine tempera-

readily accessible by removing handhole rovers and plates. Clutch. The multi-disc clutch is large and insures proper transmission of the power. IHO Service. International Harvester ser-vice covers the country, and it is easy to get extra parts or assistance whenever necessary.

## The Greatest Values in Motor Car History

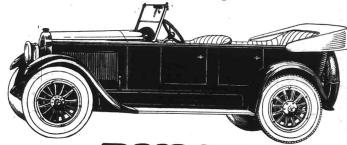

#### $T^{\mathrm{HE}}$ new Buick models for 1926 now offer the greatest values in motor car history.

Important improvements in chasis contraction add to strength, simplicity and performance. Refinements in body designs increase attractiveness and comfort. The Buick you buy to-day is unmatched for power, speed, and case and safety of control. No car of its size and power can rivel it in economical petrol consumption.

consumption.

Quality, refinement and surpassing finish is found at every point. Lift the bonnet and you will be surprised at the beautiful sleek, clean design of the engine. Its gleaming finish is in marked contrast to other engines. gleaming finish is in marked contrast to other engines. Not even a spart plug is visible—bot they are concealed by a quick detachable cover which projects them from injury and moisture. A few trans on the wing nuts and the valve cover is removed and all the overhead valve mechanism is exposed to view. Each valve is instantly accessable and easily adjusted. Every part of this besuitful mechanism is as carefully made and finished besuitful mechanism is as the project of the project type of valve constitution known.

And so it is with every detail of construction—each part carefully machined—painstakingly finished, but possessing strength and wearing qualities beyond all belief.
