A binder is shown here, all mechanism being operated by the power shaft of the McCormick-Deering Tractor.

Do You Know About the McCormick-Deering Power Take-Off?

Besides the belt and driver McCormick-Deering Tractors have a third power source—the power take-off, for running the mechanism of binders, maize-pickers, harvester-threshers, etc., direct from the tractor engine. This handy properly located, properly protected, power take-off always runs at the same speed whether the tractor is in high or low. It can be operated when the tractor is standing still, on a pulled machine can be cleared off changed. It is gear driven. It runs at a uniform speed. The McCormick-Deering is the original triple-power tractor.

McCormick-Deering tractors are specially designed to operate by means of their power take-off the following equipment

- 15-20 tractor £200
- 15-20 tractor £200
- 15-20 tractor £200

- McCormick Chaff Machine
- McCormick Binding Machine
- McCormick Chaffing Machine

If you are farming in maize or wheat the McCormick-Deering tractor is indispensable to you.

Remington Typewriters NOTICE

In view of a statement by a competitor claiming certain sales of firms and institutions in Eastern Africa to be of typewriters in Kenya and Tanganyika, we wish to notify that at least three quarters of the said sales are by our larger REMINGTON users—and in some cases 90 per cent. Remington users.

A list of REMINGTON USERS in Eastern Africa would occupy too large a space to be contained in a short notice.

HIGH-SPEED RELIABILITY TEST PROVES THE SUPERIORITY OF SHELL OIL AND SHELL PETROL.

The first time a London-Cairo flight has been completed in less than 24 hours.

The pilot, Colonel Minchin, C.B.E., D.S.O., M.C., Jupiter air-cooled engine, set up this new air record by flying a Bristol Bloodhound Biplane with Bristol July 30/31st.

The distance of this air route is 2,200 miles, of which 800 are over the sea. It was an arduous task for any engine. Shell Oil was used exclusively and gave dependable, unobscuring lubrication throughout the flight.

Shell Aviation Spirit was also used exclusively. This superior air record was made on that invincible combination—Shell Oil and Shell Petrol.

Land Policy Society.

In 5-pennier 1924 the Legislative Council discussed a great deal the absence of a definite land policy on the part of the Kenya Government. The Hon. Members of all shades of opinion were united in their criticism of the absence of Government aid of the society which had attended the distribution of some of the land of the Colony. During the debate, the Government minister became aware of the fact that some years before they had purchased and granted the members of an Advisory Land Board which had never functioned. It had been allowed to fall into the public hands by the Executive Council of purchased the old and precious contents of vitine and garnet, and perhaps were made and agreed to without any advantage to support the constitutional right of the Legislative Council to appear. This matter will be reported. It was wished on some of the Land which was still in motion. It would also suggest that the

and would only suggest that the society would like to be supported with money by the Government Council should be able to obtain property of the Government in a circumstance when there is no money to be lent by private individuals. It has been the custom generally, and particularly in regard to the position of the Legislative Council, we believe there is a need for greater knowledge of the White Paper and the nature of the boundaries of the various areas. It is not clear further money may lead to the creation of great trusts which would be the knowledge of the public or at least without the assistance of the Legislative Council. The Hon. Members of the Legislative Council should be able to see the importance of the knowledge of the public or at least without the assistance of the Legislative Council. The Hon. Members of the Legislative Council should be able to see the importance of the knowledge of the public or at least without the assistance of the Legislative Council.

UNIFICATION OF CONTROL IN NATIVE AREAS.

Defining Authority of Chief Executive Officers.

THE CHIEF EXECUTIVE OFFICERS of the various provinces have been asked to define their authority in native areas. This is a step towards unification of control in these areas. The Government is desirous of having a clear and definite authority for the Chief Executive Officers in these areas, and this is being done by asking them to define their authority in writing.

ANOTHER ATTEMPT ON MUSSOLINI.

Assault Lynched by the Crowd.

ANOTHER ATTEMPT ON MUSSOLINI was made in Rome yesterday. A group of men tried to assault the Italian Premier as he walked through a crowd. The attempt was quickly lynched by the crowd, and the men were arrested. This is the latest in a series of attempts on Mussolini's life.

A binder is shown here, its mechanism being operated by the power take-off of the McCormick-Deering Tractor.

Do You Know About the McCormick-Deering Power Take-Off?

Besides the belt and drawbar McCormick-Deering Tractors have a third power source—the power take-off, for running the mechanism of binders, maize-pickers, harvester-threshers, etc., direct from the tractor engine. This handy properly located, properly protected, power take-off always runs at the same speed whether the tractor is in high or low. It can be operated when the tractor is standing still, so a pulled machine can be cleared if clogged. It is gear driven. It runs at a uniform speed. McCormick-Deering is the original triple-power tractor.

McCormick-Deering tractors are specially designed to operate by means of their power take-off the following equipment

- 5-20 tractor 750
- 15-20 tractor 750
- 18-20 Harvesting tractor for ploughing and cultivating between rows of Oats or Wheat 750

- McCormick-Deering Harrow
- McCormick-Deering Harrow-Plough
- McCormick-Deering Horse Plough

If you are farming in maize or wheat the McCormick-Deering tractor is indispensable to you.
