These prices make Buick the outstanding value in the motor car world to-day

- | | |
|---|------|
| Buick Standard Model Touring: | |
| 24 h.p. Valve-in-Head Motor—Top speed 70 mph. | £389 |
| Buick Standard Model 5-Pass. Sedan: | |
| 24 h.p. Valve-in-Head Motor—Top speed 70 mph. | £450 |
| Buick Master Model Touring: | |
| 28 h.p. Valve-in-Head Motor—Top speed 75 mph. | £465 |
| Buick Master Model Sports Touring: | |
| 28 h.p. Valve-in-Head Motor—Top speed 75 mph. | £498 |

While a Buick is in no sense a racing car, its ability to reach the high speeds indicated above with smoothness and ease is striking evidence of the tremendous reserve power which is available at ordinary touring speeds.

The Buick owner who tours at low or moderate speeds has the assurance that an enormous reserve power is instantly available for the steepest hills—the deepest sand—or the roughest roads.

The B.S.A. range now has a new 350 h.p. overhead machine, in the build of which has a detachable cylinder having large valve access direct to the cylinder and roller bearing rockers which are closed. A pusher gear is also provided to lift the fuel from the lead to the fuel...
Of this new "Mini" model, one has a delivery rate of 300 c.c. capacity, which is an a.v.c. "Super" model of 300 c.c. capacity. It has two large inlet valves operated by roller valves push rods by roller overhead rockers, the valves being safely actuated and...
Quite one of the biggest items of the show was the Triumph with its six h.p. engine, in which the roller rocker gear is lubricated automatically. Though capable of high speeds, the machine is perfectly suitable for ordinary work by reason of the freedom of such features as roller bearing overhead rockers and roller valves.
