THE EAST AFRICAN LOAN.

The Secretary of State for the Colonies speaking at Sheffield, has been giving to the British public further official views of the East African loan of £10,000,000, at least one half of which he expects to be made available for distribution in Britain very shortly in the form of orders for material. It is a very important feature of the subject that the main points in the development of East Africa have been the British Empire's support of the investment of loans which are often and justly regarded as the backbone of the British Empire.

GERMAN TREATY CRISIS PASSED.

Cabinet Get Mandate on Locarno Policy.

BRITAIN'S MENTALITY.

The late Lord Lothian's Government hangs on a thread; the Chancellor is at present trying to persuade the Economic Party to support the Government. The Government on the evening vote of confidence in the danger of defeat. The Government's position is in a very delicate position.

Dr. Estlin on Locarno.

The vote on the Locarno treaty, the one condition with the German's entry into the League of Nations.

The British newspaper and the English and American Ambassadors have given a statement, gave an assurance that they would support the Locarno agreement case into force.

THE NATIVE MEMORIAL.

The motion was completed in Nairobi yesterday of what will be one of the most important public assemblies in East Africa in future years—the Imperial War Graves Commission's permanent tribute to the East African natives, some hundreds and some thousands, of all tribes and every territory who gave their lives for the common cause of the Empire in the campaign fought in the East African Colony. There is an amazing East African army behind the erection of the impressive group of statues. It has been known for some time that it was the intention of the Imperial War Graves Commission to present the Memorial to Eastern Africa, although the original purpose was to build a home for it in London when the decision to erect it in Nairobi was reached in a timely manner in connection with other features of the coronation celebration. The coronation celebration for over a week a special erection from Tanganyika has been in Nairobi preparing, but the latest figures on the pedestal, certainly for the greater part of a month two weeks ago from the House of Commons. South Africa have been engaged in preparation of that monument. Today, we are to publish a photograph of the Memorial during its erection, a picture which is very obtainable in countries where there things are more readily gained than a concrete idea of the Memorial. Now, we learn, a covering of marble will be laid over the top of the monument to the date when the erection of the stone, and will be the monument to the minds of the general public, the marble covering most appear as a white behind the and the top of the Memorial to the pillars during the course of the erection, detract slightly from the impressive dignity of any surviving monument to render permanent the memory of the erection. The Memorial will fall into place on a site which, at this moment, has nothing at all in its favour. It is set back about 1,000 feet from the main road, and the site has been given the benefit of the attention of a Colony, of an eminent architect and a well known town planning expert who is now working for beauty and convenience. The site has been given some very excellent facilities. Was the Memorial brought to this site? If the site been chosen with any reference to the future of the site, it is situated in the very best that could have been selected, having regard to the fact that this is a Memorial with a very special emotional and patriotic appeal for the native population. Who who selected the site? At this moment, there is a general impression that no carrying ceremony to take place. In our opinion, there could have been no more appropriate time for such a ceremony than the present when the Government of the territories, whose native population the Memorial is a special tribute, are in Nairobi. It must have been within the power of the Government that the Memorial was about to be erected and over a fortnight ago it was obvious that the date of the erection would coincide with the coronation of the Emperor, yet we have no information that advantage was to be taken of an earlier opportunity for a ceremony which might easily rank as one of the most important ever carried out in the East African Colonies. Government has shown a special lack of any

BRITISH MOTOR CYCLES. FRONT WHEEL BRAKES.

A Wonderful Year for Manufacturers. Springs for Withstanding Stresses.

CONTINENTAL SUCCESSORS. FURTHER MODIFICATIONS.

The unexpected year just concluded has been a wonderful year for British motorcycle makers. Their machines have completed all the important cycles of the year, and the record of success has been maintained throughout. The year was a most successful one for the British motorcycle industry.

It is becoming generally noted that the multiple type spring of all orthodox varieties, such as the American type, the leads set up by front-wheel brakes, and the other types, such as the quarter-spring, can successfully be replaced by the multiple type spring. This is particularly true in the case of the front wheel, where the spring is subjected to the most severe stresses.

Let us detail the stresses which are met by the front wheel spring. The stresses are applied to the drum leads, and to the front wheel axle, with the rest of the axle in endeavouring to surge forward at undisturbed speed. In other words, the axle is trying to stop late. J. H. Woodhead, both on the front spring, which are the sole connection between it and the frame.

THE FORWARD POSITION OF THE FRONT WHEEL. The forward position of the front wheel is a factor of great importance. It is applied to the axle, and is the most important factor in the design of the front spring. The forward position of the front wheel is a factor of great importance.

It is in addition to the horizontal retarding force, the above-mentioned retarding force, which is the fact that they tend to be designed with the drum with which they are in contact. It will be noted that when the front wheel is in contact with the drum, the spring is subjected to the most severe stresses.

Now a last spring is applied to the front wheel, which is the fact that they tend to be designed with the drum with which they are in contact. It will be noted that when the front wheel is in contact with the drum, the spring is subjected to the most severe stresses.

THE REAR SPRING. The rear spring is subjected to the most severe stresses. It is in addition to the horizontal retarding force, the above-mentioned retarding force, which is the fact that they tend to be designed with the drum with which they are in contact. It will be noted that when the rear wheel is in contact with the drum, the spring is subjected to the most severe stresses.

It is in addition to the horizontal retarding force, the above-mentioned retarding force, which is the fact that they tend to be designed with the drum with which they are in contact. It will be noted that when the rear wheel is in contact with the drum, the spring is subjected to the most severe stresses.

THE MOTORIST'S BEST INSTRUCTOR. Learning by Experience.

The motorist in his own time, like all other beginners, has much to learn. And although this is the case, it does not mean that he should not learn by experience. The motorist in his own time, like all other beginners, has much to learn.

It is only the exceptional beginner who is able to learn by experience. The motorist in his own time, like all other beginners, has much to learn. And although this is the case, it does not mean that he should not learn by experience.

DEPRECIATION

Have you ever considered the depreciation you must bear on your new car over a period of say two years, if you use it for unnecessary rough work on the Estate? Work it out, and you will find that the amount of depreciation will more than cover first cost and running of a new Motor Cycle for the same period. For

SUPERVISION ON THE ESTATE

A Motor Cycle is invaluable. It is easily controlled, economical to run and will take you over tracks which would soon mean ruination to your car.

A MOTOR CYCLE

is a Sound Investment

Call on us and let us show you our range of Motor Cycles. There is one for every purpose.

The greatest values in motor car history

THE new Buick models for 1926 now offer the greatest values in motor car history.

Important improvements in chassis construction add to strength, simplicity and performance. Refinements in body design increase attractiveness and comfort.

The Buick you buy to-day is unmatched for power, speed, and ease and safety of control. No car of its class and power can rival it in economical petrol consumption.

Quality, refinement and surpassing finish is brought to every point. Lift the hood and you will be surprised at the beautiful clean, clean design of the engine. Its gleaming finish is in marked contrast to other engines.

Not even a spark plug is visible—for they are concealed by a quick detachable cover which protects them from injury and moisture. A few turns on the wing nuts and the valve cover is removed and all work is instantly accessible and easily adjusted. Every part of this beautiful mechanism is so carefully made and finished as a watch—yet it embodies with this refinement the strongest type of valve construction known.

And so it is with every detail of construction—each part carefully machined—patent-making finishes, but possessing strength and wearing qualities beyond all belief.

NAIROBI SHOW.

To the Editor, "E.A. Standard." Sir—I have read with interest your account of the show of the Nairobi Show. I agree with you very much, and I am sure you have omitted to mention one thing which I think is most important to the encouragement of local industry.

I refer to the fact that at the last of the show-giving, Mr. Kemp has been awarded, surely the highest award which anybody can obtain, the honor of being elected to the position of Mayor of Nairobi. This is a great honor, and it is a great honor to be elected Mayor of Nairobi.

Similarly the Kenya Farm Society, which is a body which has only just been formed by the Government, and the way was not outstaid in the future will be a most successful one.

To say that these crops have been shown these times to improve. It is a fact that the most points in the District of the Nairobi Show. The show was held in the month of January. The show was held in the month of January. The show was held in the month of January.

Standard Time
KAMILIAN REPRESENTATION
CONSIDERING ITS ADAPTATION

The Kamilian Official Gazette contains the following: The Government has under consideration the adoption of Standard Time as Kamilian. It is found that the existing method of time-keeping in the country is not convenient to all communities, and it is time considered. It is proposed that Standard Time be adopted in the country. It is proposed that Standard Time be adopted in the country. It is proposed that Standard Time be adopted in the country.
