MONDAY'S CABLES.

NEW YORK HEARS CHIMES OF ST. PAULS.

Opening of Trans-Atlantic Telephone.

Trans-Atlantic's agency in London, January 8. The London-New York service is inaugurated today. The first message to be sent from New York through the chimes of St. Paul's strikes a quarter of eight through a special telephone link.

After the opening, George Murray, Secretary of the Trans-Atlantic Cable, returned to the president of the American Telephone and Telegraph Company, and the service was then opened for public use.

The Duke of Connaught. OFFICIAL VISIT OF HIS EXCELLENCY.

New, January 8. The health of the Duke of Connaught, who is wintering here, is unsatisfactory and the doctors have advised a complete rest. The Duke has cancelled all his engagements and is making no other plans.

An official communication from the Duke of Connaught says the Duke was unwell in Little Chiffley, but has now recovered. The health of the Duke is such that he is left in the unenviable position of being unable to attend to a very large number of engagements. In the short space of two or three weeks, the Duke has cancelled a large number of engagements and is left in a position of being unable to attend to a very large number of engagements.

Count of Living Committee. The Hon. Mr. Conroy, Member for the County, which has been appointed to enquire into the count of living. The Hon. Mr. Conroy has been appointed to enquire into the count of living. The Hon. Mr. Conroy has been appointed to enquire into the count of living.

Help the kidneys! What a lot of trouble is caused by diseased kidneys, yet frequently the more easily remedied symptoms are neglected.

This means that poison are allowed to spread the system, spreading the poison, inflaming the kidneys and starting the process of kidney decay. It is important to get the kidneys into a healthy condition. It is important to get the kidneys into a healthy condition.

REVOLTS IN NICARAGUA AND SUMATRA

Developments of Two Campaigns.

Trans-Atlantic's agency in Havana, January 8. The situation round Peking is still unsettled. The rebels have attempted to drive the population to attack their Government. The rebels have attempted to drive the population to attack their Government.

It is officially reported from Padang, Sumatra, that the district of Sibolangai is almost completely evacuated by the population. A leader of the rebels was shot dead in Sibolangai.

Nicaragua. Washington, January 8. The Navy Department announced that the fleet consisting of 2 cruisers, 4 destroyers, one minesweeper, and four hundred other men being despatched to the Pacific to enter Manila. All other letters should be posted at Manila.

LLANOFF CASTLE FULL FOR MOMBASA.

Latest Acquisition of the Castle Line.

LANZ TRACTORS DO IT

CHEAP EFFICIENT SIMPLE RELIABLE

MECHANICALISED FARMING and TRANSPORT

Experience in many districts in East Africa has proved that ploughing costs with these Lanz Tractors range from 30 cents to Shs. 2.25 per acre for an average ploughing, depending upon the nature of the soil, depth of ploughing and whether oil or non land.

Coffee cultivation with the 12 1/2 h.p. four wheel drive Lanz, and a 5 foot, 16 inch cultivator is done at the rate of 25-30 acres per day at a cost of from 25 to 35 cents per acre.

Sisal Cultivation with the 22 h.p. Lanz and larger cultivator is equally cheap.

Maize Shelling with power provided by the smaller tractors costs only 1/2 to 2/3 cents per bag.

Average Plough Capacities on medium soil are put two to three discs for the four wheel drive Lanz; four to five furrows for the 22 h.p. Lanz, and 6 to 8 for the 38 h.p. Lanz.

All Lanz Tractors operate on Crude Oil, costing about one shilling per gallon or less, according to district.

They are the most simple to operate, and thoroughly reliable tractors on the market. No cartwrights, distributors, wiring, mechanics, or sheet metal work is required for their construction. Their sturdy and exhaust valves to get out of order, or their construction, low R.P.M. and freedom from complicated means a low rate of depreciation.

THE ELECTION IN KIRUYU.

There is a great amount of interest in the election in Kiruyu in the East African Standard and with the results to be published. Mr. MacLellan Wilson, Captain Durban, is a good deal of revelation as to what the result will be. All these prospective candidates addressed a well attended meeting in Kiruyu on Tuesday last in the morning. It reached its acme about noon and was a most interesting and worthy physical appearance ...

THE BETTER CONTROL OF DOMESTIC SERVANTS. E.A.W.L. to Discuss a Registration Scheme.

The question of the control of domestic servants, including the duration of a proper system of registration of the same, was discussed by the members of the East African Women's League, held at the Hotel de Ville, on the 11th inst.

Following, a number of letters were read through the courtesy of the Vice-President of the League, and the following resolutions were adopted: That the League should have a committee to investigate the matter...

It is the opinion of the League that the present system of registration is not sufficient to ensure the welfare of the servants and the employers alike...

SUGGESTED LEGISLATION.

1. The term domestic servant shall include all persons employed in any household or establishment...

"Dona" Held Up.

This character book has held the title of best seller for some time past. It is a collection of stories by the author...

plate duplicate books of the owner. Books of this kind are valued by many of our people...

It is the opinion of the Commission that the best method of dealing with the problem is to have a system of registration...

The Commission also recommends that the Government should have a committee to investigate the matter...

LUBRICATOR PROBLEMS.

(Continued from page 17.)
 In the first place the question arises as to what the consumer can do to prevent such a situation from arising. The answer is quite simple. It is to buy a motor car of a make which is known to be reliable. It is to buy a motor car of a make which is known to be reliable. It is to buy a motor car of a make which is known to be reliable.

WHAT MEANS OF OIL?

Let us now consider the question of what the consumer can do to prevent such a situation from arising. The answer is quite simple. It is to buy a motor car of a make which is known to be reliable. It is to buy a motor car of a make which is known to be reliable. It is to buy a motor car of a make which is known to be reliable.

THE CHRYSLER CARS.

What is regarded as one of the most important improvements made in the motor industry in the past few years is the introduction of the Chrysler cars. These cars are known for their reliability and their ability to run on a very small quantity of oil.

STANDARD QUALITY.

It is further noted that the Chrysler cars are known for their reliability and their ability to run on a very small quantity of oil. This is due to the fact that the Chrysler cars are built to a very high standard of quality.

THE CRANKSHAFT.

The crankshaft is one of the most important parts of a motor car. It is the part which converts the motion of the pistons into the motion of the wheels. It is therefore of great importance that the crankshaft should be of a high standard of quality.

THE VALVE.

The valve is another important part of a motor car. It is the part which allows the fresh air to enter the cylinder and the burnt gases to exit. It is therefore of great importance that the valve should be of a high standard of quality.

THE PISTON.

The piston is the part of the motor car which is in contact with the cylinder wall. It is therefore of great importance that the piston should be of a high standard of quality.

THE RING.

The ring is the part of the motor car which is in contact with the cylinder wall. It is therefore of great importance that the ring should be of a high standard of quality.

THE BEARING.

The bearing is the part of the motor car which supports the crankshaft. It is therefore of great importance that the bearing should be of a high standard of quality.

THE OIL.

The oil is the part of the motor car which lubricates the moving parts. It is therefore of great importance that the oil should be of a high standard of quality.

Care of the Tyres.

The care of the tyres is one of the most important things that a motorist should know. It is to keep the tyres properly inflated and to keep them free from any damage.

THE MOTOR CAR.

The motor car is a very important part of our lives. It is the means by which we travel from one place to another. It is therefore of great importance that we should know how to care for it.

THE ENGINE.

The engine is the heart of the motor car. It is the part which converts the energy of the fuel into the motion of the wheels. It is therefore of great importance that the engine should be of a high standard of quality.

THE TRANSMISSION.

The transmission is the part of the motor car which allows the driver to change the gears. It is therefore of great importance that the transmission should be of a high standard of quality.

THE AXLES.

The axles are the parts of the motor car which support the wheels. It is therefore of great importance that the axles should be of a high standard of quality.

THE WHEELS.

The wheels are the parts of the motor car which are in contact with the ground. It is therefore of great importance that the wheels should be of a high standard of quality.

THE BRAKES.

The brakes are the parts of the motor car which allow the driver to stop the car. It is therefore of great importance that the brakes should be of a high standard of quality.

THE LIGHTS.

The lights are the parts of the motor car which allow the driver to see at night. It is therefore of great importance that the lights should be of a high standard of quality.

THE HORN.

The horn is the part of the motor car which allows the driver to warn other motorists. It is therefore of great importance that the horn should be of a high standard of quality.

THE BATTERY.

The battery is the part of the motor car which provides the electricity for the lights and the horn. It is therefore of great importance that the battery should be of a high standard of quality.

NEW BUICK MODELS.

Descriptions of the 1927 Cars.

SEVEN OUTSTANDING FEATURES.

1. **Smooth running**—The Buick motor is the smoothest in the world. It is the result of the Buick engineering department's constant research and development.

2. **Light weight**—The Buick motor is the lightest in the world. It is the result of the Buick engineering department's constant research and development.

3. **Low maintenance**—The Buick motor is the easiest to maintain in the world. It is the result of the Buick engineering department's constant research and development.

4. **High speed**—The Buick motor is the fastest in the world. It is the result of the Buick engineering department's constant research and development.

5. **Low fuel consumption**—The Buick motor is the most economical in the world. It is the result of the Buick engineering department's constant research and development.

6. **Low noise**—The Buick motor is the quietest in the world. It is the result of the Buick engineering department's constant research and development.

7. **Low vibration**—The Buick motor is the smoothest in the world. It is the result of the Buick engineering department's constant research and development.

8. **Low wear**—The Buick motor is the longest lasting in the world. It is the result of the Buick engineering department's constant research and development.

9. **Low cost**—The Buick motor is the most economical in the world. It is the result of the Buick engineering department's constant research and development.

10. **Low maintenance**—The Buick motor is the easiest to maintain in the world. It is the result of the Buick engineering department's constant research and development.

11. **Low noise**—The Buick motor is the quietest in the world. It is the result of the Buick engineering department's constant research and development.

12. **Low vibration**—The Buick motor is the smoothest in the world. It is the result of the Buick engineering department's constant research and development.

13. **Low wear**—The Buick motor is the longest lasting in the world. It is the result of the Buick engineering department's constant research and development.

14. **Low cost**—The Buick motor is the most economical in the world. It is the result of the Buick engineering department's constant research and development.

15. **Low maintenance**—The Buick motor is the easiest to maintain in the world. It is the result of the Buick engineering department's constant research and development.

16. **Low noise**—The Buick motor is the quietest in the world. It is the result of the Buick engineering department's constant research and development.

17. **Low vibration**—The Buick motor is the smoothest in the world. It is the result of the Buick engineering department's constant research and development.

18. **Low wear**—The Buick motor is the longest lasting in the world. It is the result of the Buick engineering department's constant research and development.

19. **Low cost**—The Buick motor is the most economical in the world. It is the result of the Buick engineering department's constant research and development.

20. **Low maintenance**—The Buick motor is the easiest to maintain in the world. It is the result of the Buick engineering department's constant research and development.

21. **Low noise**—The Buick motor is the quietest in the world. It is the result of the Buick engineering department's constant research and development.

22. **Low vibration**—The Buick motor is the smoothest in the world. It is the result of the Buick engineering department's constant research and development.

23. **Low wear**—The Buick motor is the longest lasting in the world. It is the result of the Buick engineering department's constant research and development.

24. **Low cost**—The Buick motor is the most economical in the world. It is the result of the Buick engineering department's constant research and development.

25. **Low maintenance**—The Buick motor is the easiest to maintain in the world. It is the result of the Buick engineering department's constant research and development.

26. **Low noise**—The Buick motor is the quietest in the world. It is the result of the Buick engineering department's constant research and development.

27. **Low vibration**—The Buick motor is the smoothest in the world. It is the result of the Buick engineering department's constant research and development.

IMPROVED MUFFLER.

The muffler is one of the most important parts of a motor car. It is the part which reduces the noise of the engine. It is therefore of great importance that the muffler should be of a high standard of quality.

IMPROVED TRANSMISSION.

The transmission is the part of the motor car which allows the driver to change the gears. It is therefore of great importance that the transmission should be of a high standard of quality.

IMPROVED AXLES.

The axles are the parts of the motor car which support the wheels. It is therefore of great importance that the axles should be of a high standard of quality.

IMPROVED WHEELS.

The wheels are the parts of the motor car which are in contact with the ground. It is therefore of great importance that the wheels should be of a high standard of quality.

IMPROVED BRAKES.

The brakes are the parts of the motor car which allow the driver to stop the car. It is therefore of great importance that the brakes should be of a high standard of quality.

IMPROVED LIGHTS.

The lights are the parts of the motor car which allow the driver to see at night. It is therefore of great importance that the lights should be of a high standard of quality.

IMPROVED HORN.

The horn is the part of the motor car which allows the driver to warn other motorists. It is therefore of great importance that the horn should be of a high standard of quality.

IMPROVED BATTERY.

The battery is the part of the motor car which provides the electricity for the lights and the horn. It is therefore of great importance that the battery should be of a high standard of quality.

GENERAL MOTORS.

Result of Standardization Methods.

REDUCTION OF COSTS

During the past few years the success of American industrial efforts have been the subject of wide-wide discussion and...
The result has been to reduce the cost of production of these parts in such a manner that the cost of the finished product can be made without a sacrifice of quality...

Standardization has resulted in many direct benefits to both American manufacturers and consumers. To the former it has meant decreased costs and increased profits, to the latter it has meant lower living costs and greater purchasing power.

One organization after another is establishing examples of the benefits to be realized from standardization in the General Motors Company. Composed of more than 100 different motor car and truck manufacturers...
The largest automobile body builder and numerous parts and equipment manufacturers in America had an opportunity to standardize parts and equipment which are used in every motor car and truck made today...

Standardization has resulted in many direct benefits to both American manufacturers and consumers. To the former it has meant decreased costs and increased profits, to the latter it has meant lower living costs and greater purchasing power.

[Special to "E. A. STANDARD"] [All Rights Reserved]

Saves the American Golfer the Strokes.

STUDY OF METHODS

(By Edward Hoy) I have come to the conclusion that the life of your clubbed ball is not a long one... The study of British and American golfing and on based upon my own experience...

A FINE ART

American have made a fine art of the high pitch which British golfers will attempt to match their efforts with the machine and the pitch and run... It is a reversal of a tradition which demands that an expression should be played with a club that will keep the ball running...

Veteran Golfers.

There is a possibility also that the pitch shot will stop for it can be executed only if the golfer employed an every ounce without exception that of most he played soft and I believe that we have lost it... I don't believe that I played the shot until I had it prescribed that I was to use a good putter... This year I have not been playing that old thing which is a sorry, old because of this though I have not been in the habit of ever being so badly hit myself... This is the explanation of my

THE AMERICAN GOLFERS

club shot for the average golfer and one that is likely to be an writing in the case of the best of us... HARDER HITTING... In America they play the ball without the left to get into it... They use a much more lofted club and hit the ball higher than, getting more than a hundred yards of back swing for every foot... They swing to give a full shot with a lofted wooden club or a mallet, and they follow up with a stick and pitch without it... It is the stick which the ball to be a drop ball, and enable them to make it so, not in this manner... There is a directness in the stroke that is a directness which is not to be found in the stroke of the average golfer... If we attempt to play this shot, we shall probably pull every ball because we have not to master the stalling method of hitting the ball... One who is mastered, however, need will prove to you do not only, although of course American greens that are as a matter of fact it is just as effective as following the right method... If the British golfer will adopt the method of the loop of the club put will vanish whether the greens be level or slope... It will be able to get over enough to the top to put and at the same time occur of holding... The all error in the hole is not bunkered, and there are no bumps and jumps to contend the comparatively well played run up shots... The ball up to the flag and avoid them... They will pull well and give the stroke as the American does.

BRITISH SATISFACTION

British players speaking generally are fairly satisfied to get what would be the work of the club with the British putter rather than the loop... It is a matter of the sort of the shot which saves the American... I do not think that I can find it said that they are on the whole better natured than British players... but they are such good players that they will run and make to do on the greens and the moulder that they have pulled badly if they were ever with a green... Then they are in a position to take this theory but even in his case it is the identical shot which is such a vital part in his game... It is a matter of psychology and becoming this much more though green is as the matter... American culture and therefore the most

There is a possibility also that the pitch shot will stop for it can be executed only if the golfer employed an every ounce without exception that of most he played soft and I believe that we have lost it... I don't believe that I played the shot until I had it prescribed that I was to use a good putter... This year I have not been playing that old thing which is a sorry, old because of this though I have not been in the habit of ever being so badly hit myself... This is the explanation of my

POSSIBLE VISIT OF U. S. A. TEAM

[From Our Own Correspondent.] London, January 11th. There is a possibility of another international golf contest between Britain and the United States at St. Andrews next year... This was announced at a meeting held in the Golfers Club London, for the purpose of forming the British Golfers Society, an organization which is open to players of 25 years of age and upwards... Lord Larnach presided over a well attended meeting, at which it was stated that a team of American golfers is probably visiting this country next year, and if they see with to stop a ball we play a match at St. Andrews against the British team.

A Letter from Paris

(By DIANA DEAN)

front with an elastic band. The only logical objection to this... getting well in season of February...

Yet it would seem, upon investigation, the theme here might not be so far from the truth... social experience. Truth comes...

It is not so much the amount of food you eat, but the amount of food you eat, but the amount of food you eat...

From the picture book, we know that the picture book... to most upon the head...

You can get a really good idea... from the picture book... to most upon the head...

Do not do your hair in many... ways, but just make it simple... with a few simple rules...

A Milanoise frock, to a soft, silvery shade, had a solid and a band down the front of blue, red and gold embroidery.

Worn with a black hat which had been lunched round the crown, the gown was waded "just right."

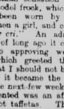

A house frock in bold rose chamois looks very dainty... with a long red shawl with a parchment colored sash...

Although the show's fashions have been widely copied and the French dress shows an almost unimpaired success...

Many really good designs are wearing quite low heels in the ball room... which are not only comfortable...

powder into a basin. Milk together in a saucetop two ounces of butter and brown sugar and four ounces of cream...

One reason the show recently caused a small sensation by presenting a model frock, which might have been worn by Grand Mammoth when a girl, calling it "a dresser."

PHYSICAL EXERCISE. In order to make the blood circulate and the various organs which secrete digestive fluids, it is necessary to exercise...

For the liver. Hoping on the right foot for a long time. Live carefree. Another good exercise is to stand on the toes alternately to the level of the knees...

HOME ATHLETICS. The Inter-University Cross-Country Race.

The "robe à style" expressed in simple lines and neat details. The full skirts are emphasized upon the full skirt, and one deep band forms the light tissue bodice.

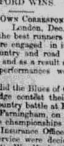

THE OCEANIC COMPANY. Oiler Delicacies. Here are four ways of making your own "ice-cream" cakes: Ginger Tarts. One pound of flour and two ounces of ground ginger and two ounces of sugar...

OXFORD WEEK. (FROM OUR OXFORD CORRESPONDENT) This year, London, Dec. 16, was the best season for the races on Saturday and as a result several unexpected performances were made...

At the Kentish event, which was being held so soon as possible in the face of the fact that the average gathering at the Christmas village.

offered a "bad time" and faded away into fourth place. W. A. M. Sullivan, the Blackbird Harrier, coming very early from G. A. H. Cooke with a 50 Downham bird...

At the Kentish event, which was being held so soon as possible in the face of the fact that the average gathering at the Christmas village.

At the Kentish event, which was being held so soon as possible in the face of the fact that the average gathering at the Christmas village.

COTTON SEASON OPENS IN UGANDA.

Prices Paid and the Prospects.

(From Our Own Correspondent.)

Kampala, Jan. 14.—The cotton season opens in Uganda to-day, and the prospects are generally good. The price paid for the seed is 10/- per cwt. and for the lint 15/- per cwt. The lint is expected to be of a high quality, and the season is expected to be a successful one.

The cotton is planted in the districts of Ankole, Kigezi, and Karamoja. The area planted is about 100,000 acres. The crop is expected to be ready for picking in about three months.

The price of cotton is expected to be high, and the prospects are generally good. The price paid for the seed is 10/- per cwt. and for the lint 15/- per cwt. The lint is expected to be of a high quality, and the season is expected to be a successful one.

Two Districts. It is the duty of the Government to provide for the welfare of the people. The Government has taken steps to improve the education of the people. The Government has also taken steps to improve the health of the people. The Government has also taken steps to improve the economy of the people.

FURTHER CONVINCENCE NEEDED CAN ANYTHING BE BETTER PROVED???

We have received the following letter from Tanganyika Territory regarding as follows:—

Messrs. F. E. Vivers, Esq., Game Department, I have tried the 9.3mm. long barrel on Elephant. It is undoubtedly a Superlative weapon. I have tried the 9.3mm. with the Short Barrel 9.3mm., and consider it a most efficient weapon on Elephant. The long barrel gun however is superior in Ballistics and I consider on this animal such as Elephants and Rhino, it is superior to the 318 or 400 grain and keep the 36" gun.

In my opinion the 9.3mm. barrel gun is the best medium bore on the market. Personally I have tried everything from a 600 downwards on Elephants and I consider the 9.3mm. long the ideal if weapon.

Yours Sincerely,
(sd.) F. E. VIVERS,
Game Department,
Tanganyika Territory.

EMPLOYERS LIABILITY FOR ACCIDENT.

Sisal Company's Appeal Holds Good. Will E.A.W.L. Support the Idea.

The Supreme Court gave judgment on Thursday in the Appeal brought by Messrs. Sissal Company against a conviction under Section 207 of the Indian Penal Code for using dangerous machinery in the appellant's factory during the absence of the operator.

The appellants were subsequently charged before the Magistrate with using dangerous machinery, but being covered by the factory inspector that the machinery, although pointed in in all other respects had no defects that were the cause of the accident.

The appellants were subsequently charged before the Magistrate with using dangerous machinery, but being covered by the factory inspector that the machinery, although pointed in in all other respects had no defects that were the cause of the accident.

DISPUTE OVER SALE OF ELDORT POT.

Decision of E.A. Court of Appeal.

It will be recalled that some time ago a copy of the judgment of the Chief Justice in the case of W. A. Shaw v. H. B. Barber was published in these columns. This decision has now been reviewed by the Court of Appeal for East Africa, and reviewed in the following manner...

This case is of the ordinary kind in which a party who has done an act is held to be bound by the result of that act, even if he was ignorant of the facts at the time...

It is my opinion that the Plaintiff's appeal should be dismissed and the defendant's appeal allowed. The question then arises as to whether it is necessary to set aside the agreement...

UGANDA FINANCES.
 1927 Budget Presented with a Surplus of £200,000.
SURPLUS BALANCES TO BE USED.

The Uganda Finance Department about a year ago was re-organized. The Hon. Mr. J. M. G. Cameron, who was then Minister for the Interior, was appointed to head the department. He has since then been in charge of the department, and has been successful in securing a surplus of £200,000 for the year 1927.

The Hon. Mr. J. M. G. Cameron, who was then Minister for the Interior, was appointed to head the department. He has since then been in charge of the department, and has been successful in securing a surplus of £200,000 for the year 1927.

The Hon. Mr. J. M. G. Cameron, who was then Minister for the Interior, was appointed to head the department. He has since then been in charge of the department, and has been successful in securing a surplus of £200,000 for the year 1927.

The Hon. Mr. J. M. G. Cameron, who was then Minister for the Interior, was appointed to head the department. He has since then been in charge of the department, and has been successful in securing a surplus of £200,000 for the year 1927.

The Hon. Mr. J. M. G. Cameron, who was then Minister for the Interior, was appointed to head the department. He has since then been in charge of the department, and has been successful in securing a surplus of £200,000 for the year 1927.

The Hon. Mr. J. M. G. Cameron, who was then Minister for the Interior, was appointed to head the department. He has since then been in charge of the department, and has been successful in securing a surplus of £200,000 for the year 1927.

The "Diamond" Light Petrol Lamps

50 Times More Light at Half the Cost.

The average and very common lamp consumes a gallon of kerosene in 22 hours. The Diamond Lamp gives 50 C.P. light for approximately 100 hours on one gallon of kerosene—a saving of one half!

This unusual result is made possible because the Diamond Lamp Burner embodies certain scientific features which enable you to get 50 times greater candle power service from an equal consumption of kerosene or gasoline than in any other style of light.

No. 100 C. One-door Bracket Lamp, fitted with hurricane type shade. Can also be used as table lamp. Shs. 50/50

No. 107 C. Diamond Hornet Lampers. Embodying the self-contained pump and increased draught resulting improvements this lamp is simply the most absolute perfection. Shs. 52/50

No. 102 C. Double Nickel Plated Hornet and Standard. Oval Shade as detail. Shs. 60/-

No. 103 C. Hurricane Lantern. In standard or kerosene without risk of fire or explosion. Shs. 42/50

Positively Safe.
Safety is one of the most important features of the Diamond Lamp. That it is absolutely safe is evidenced by the thousands that have been used for years in homes, stores, churches, etc., with great satisfaction.

All important metal parts in made entirely of brass. They can't possibly break even though accidentally dropped. Strongly built to give a lifetime of service.
Each Lamp and Lantern is finished in highly polished Nickel Plate, which adds greatly to their beauty and durability.
