(Transcript of a speech in the House of Commons, March 4)

The Premier announced in the House of Commons that the budget will be introduced on April 11. The Army Estimates for 1927-28, which were presented to the House on March 4, show a maximum number on the establishment of 366,000 men and a total cost of £71,000,000. The reduction in the Army Estimates is largely due to a decrease of pay, saving £8,000,000 notwithstanding an increase of personnel by 7,000.

Supplementary Army Estimates were announced to Mr. Macdonald, during the dispatch of troops to the Chinese front in China.

**TO FIND OUT LIQUOR CONSUMPTION.**  
An Education Class Enquiry.

In accordance with the general instructions of the League of Nations, the Government is making provision for the collection of statistics to discover in what proportion the Indian and European population consume drink (alcohol) liquor. On enquiry the following information is published in the Statistical Section of the Government Office:—

It is quite understood that the statistics for the month of March will be ready only on an approximate scale in the early part of April. It is expected to make more complete returns in the early part of May. A fairly accurate estimate of the total consumption of drink in the month of March is as follows:—

It is only intended to give the figures for the month of March and not for the whole of the Colony on the assumption and the total population of the Colony is 1,000,000. It is hoped that the figures will be of some interest to those who are interested in the subject of liquor consumption.

**WEATHER AFFECTS UGANDA COTTON CROP.**

**Prospect of Much Smaller Crop.**

(From Our Correspondent.)

Kampala, March 8.—The hot and weather conditions all over Uganda and the rest of the East Africa region is an indication of the fact that the cotton crop will be considerably smaller than last year. It is not only the weather but the fact that the cotton plants are not so healthy as last year.

Cotton picking has practically stopped in Uganda but in general it is more and more certain that the crop is very much below last year. The cotton plants are not so healthy as last year. The cotton plants are not so healthy as last year.

COOLING PROBLEMS.

Their Bearing on Modern Efficiency.

OBSERVATIONAL TESTS.

Accurately measured results have enabled the present stage of efficiency probably more in comparison of years of practical observation than in the part of modern calculations as a result of theoretical researches and the theory of cooling. There was a doubt in the mind of the present writer, that degree of efficiency which is periodically made, is not a true test of the system of cooling.

There are, of course, many different methods of cooling, and it is not possible to compare them on a common basis. The writer is aware of the fact that the most efficient cooling system is that which is adapted to the particular conditions of the engine and the work to be done.

ALL-COOLING SYSTEMS.

The writer is aware of the fact that the most efficient cooling system is that which is adapted to the particular conditions of the engine and the work to be done. It is not a simple matter to compare different systems, as each has its own advantages and disadvantages.

**55 Fine After Unusual Contest.**

**A ROAD RIVALRY**

Mr. H. of K. Way of London was the choicer of a race under the Motorist's Hooper Cup on Monday. He was charged with driving to the common danger January 27. He was defeated by Mr. Daines and finished 4th place.

Col. C. F. Daines, the O.C., K.A.R., said he was in charge of a portion of a London proceeding along the "Laurier Road" near Sotherly. While on a road search he was riding at the head of the column between the hand of the 1st Battalion and the hand of the 2nd Battalion.

**THE RIVALRY**  
Mr. Way in his opinion said he was driving in the class of 500. He got into second gear before the machine of the 1st Battalion and headed all the way. His speed was not more than 100 m.p.h. per hour. He saw several cars waiting by the hand and only continued when he saw that they had not passed the hand.

**Mrs. M. Wiggins, who was a passenger in Mr. Way's car, had boarded his machine. She had driven a car in London all the way. She estimated the speed of the car to be 100 m.p.h. per hour.**

**FINED 50.**  
The Magistrate in giving judgment said he must award evidence of Col. Daines, and was satisfied that the correct book had taken proper care in view of 150 feet that the Band had made and a crowd of natives always accompanied it. Even if the second was being taken into account as he said, he did not consider there was any charge under the circumstances. He believed the accused statement that he finished but this was lost in the room of the 1st Battalion. He would fine 50.

# A LANDSLIDE TO THE BUICK SIX

(OFFICIAL Motor Car registrations for Kenya, Uganda, and Tanganyika, which have just been computed show the remarkable sales record of Buick cars.

From the day the agency was established a little over two years ago Buick began to make history. Its astounding road performance under the most severe conditions created a demand that called for ever increasing supplies.

In an incredibly short space of time Buick registrations in Kenya, Uganda, and Tanganyika have mounted until to-day they are MORE THAN DOUBLE those of ANY other six cylinder car, not only at its own price class, but regardless of price.

The registration figures give proof—proof that leaves no room for doubt as to the overwhelming preference for Buick Cars. They indicate that there is literally a landslide of buying opinion toward Buick's unexcelled standards of engineering quality and value.

Yet, the most impressive phase of this outstanding success lies not in its magnitude—but in the ever growing satisfaction freely voiced by the hundreds of Buick owners in their cars, and the unbounded enthusiasm of those who have driven and purchased the new 1937 model—The Greatest Buick Ever Built.

Committee appointed by Council. The result is a report which the parent was read, and out of the 120 members of the Executive Committee, that was an encouraging position and shows the Committee is well constituted. It is hoped that it should be strong to aid the Commission. It would not be sufficiently strong to report to make it stronger. Mr. Conway Harvey (The Labor) suggested the idea of a sub-committee to be appointed. It was not that the Finance Committee was in any way opposed to the plan, but that the Commission had to be considered. It had been agreed for years that the Committee should be strong. It is felt, however, that Honorable Members should have every opportunity to voice the pro and con of individual issues involving the expenditure of public funds and it was in view of this that the Commission was appointed to be a Member of Council. The Acting Colonial Secretary said that in view of the representation of the Federal Member the committee would be referred to the sub-committee, the composition of which was later announced. His Excellency as follows:—  
The Treasurer.  
Mr. Conway Harvey.  
Captain Schwabert.  
Mr. G. M. Galloway.

**COMPASSIONATE PENSIONS**  
The Treasurer moved, in consideration of the destination of the widow of the late Mr. M. Galloway, D.M.A., who after twenty-five years' service in the Kenya Colonial Police died on the 1st of October, 1925, that the Honorable Commission should award her a compassionate pension of £400 a year for the period of 50 years (which represents one-sixth of the emoluments drawn by her deceased husband last before her retirement) with effect from the 1st of October, 1925, inclusive.

Mr. T. J. O'Brien (Holon) said that the Government had no authority to award a pension of £400 a year for the period of 50 years to a widow of a man who had been in the service of the colony for 25 years. The Government had no authority to award a pension of £400 a year for the period of 50 years to a widow of a man who had been in the service of the colony for 25 years.

## A Letter from Paris

A dressy model for afternoon wear is developed in periwinkle blue crepe, with cut neck and a small bow forming the waist and sleeve caps. The semi-circular skirt drapes at the side and the lower half falls in deep, artful pleats.

Woolen under has been a success, and one of the most beautiful and elegant in the market. It is a fine, soft, and warm fabric, and is well adapted for the cooler months of the year.

The jumper suit is a popular one, and with a slight difference in cut and design, it is well adapted for the cooler months of the year. It is a simple, practical, and comfortable garment.

Most of the afternoon models show the popular feeling. With some three-quarter length, some with long sleeves, and some with short sleeves. The designs are simple and practical, and well adapted for the cooler months of the year.

On a broad band of pink silk are worn shaded silk loop details to form the deep back of thick of pink lilies. The shaped waistline, daintily gaped, is worthy of No. 1.

For every time we are advised to do this or that, it is often a good idea to follow the advice. It is often a good idea to follow the advice. It is often a good idea to follow the advice.

### MODERN USES OF ELECTRICITY.

Electricity is now used in many ways, and is becoming more and more important in our daily lives. It is used for lighting, for heating, for cooking, and for many other purposes. It is a very convenient and efficient source of energy.

For the "ingress" is this dainty little dress in crisp white spotted net, adorned on the bodice with a circle of patent pink combs. The soft chiffon skirt is white, and suitably trimmed with little pink bows.

From this does not complete the list of regulations for the use of electricity. It is important to use electricity safely, and to avoid overloading circuits. It is also important to use electricity for the most efficient purposes.

Almost all these applications of electricity, while proving most successful, are also very effective in saving power. It is important to use electricity efficiently, and to avoid waste. It is also important to use electricity for the most efficient purposes.

### THE PRESERVE COOPARD TWO USEFUL HINTS

Preservatives are used in many ways, and are becoming more and more important in our daily lives. They are used for preserving food, for preserving clothing, and for many other purposes. They are a very convenient and efficient way of preserving things.

**Lister Electric Lighting Plant**

No Dirty Lamps to clean and trim.  
No need to carry a lamp from room to room.  
A BRILLIANT LIGHT INSTANTLY AVAILABLE IN EVERY ROOM AT ANY TIME.

We can supply models of every type and in all sizes, either from stock or at the shortest notice, so why continue with the old and obsolete lamp from the new and up-to-date method of illumination is worthy of the best.

### THE 1 1/2 k.w. DIRECT COUPLED, RADIATOR COOLED PLANT

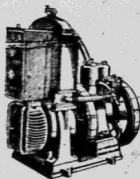

Is an ideal set for the moderate size house, takes up very little room and is most economical to light. It starts on the turn of a handle and operates for both battery and Direct Lighting.

The slow speed stroke engine is automatically lubricated, and is governed to its normal speed by a highly sensitive governor and the two heavy flywheels ensure steady and even running, resulting in a flickerless light.

The engine develops 3 B.H.P. at 725 R.P.M. and consumes 70 parts of petrol per B.H.P. hour or 2 1/2 pints per hour in full load.

A power pulley is a standard fitting on every machine to enable other work to be performed when the electric lights are not required.

Price of Complete 1 1/2 k.w. set, comprising Engine 32 V. dynamo, radiator for cooling, and with switchboard as illustrated, 70/- Nairobi.

### THE BUTTER SHORTAGE

**To the Editor: "E.A. Standard."**  
Mr. Lord Dunsborough is a little unkind and not very fair in his editorial on the butter shortage. The butter in the market is not so scarce as he says. It is only in the case of the best quality butter that there is a shortage. The butter in the market is of a good quality and is of a good price. The butter in the market is of a good quality and is of a good price. The butter in the market is of a good quality and is of a good price.

A WIFE'S DUTY

THE MAJOR IDEA as to the duties of a wife varies beyond limitless in the variety of her mind and fortune. There is a big enough variety to meet the needs of a man. Most wives realize they have duties to themselves although they do not realize it until they are very old.

HOW OFTEN is overlooked, or may be thought of and then dismissed as a whim for her to live a life of the animal kingdom. And so the years go on until she is old and feeble.

A WIFE SHOULD SEND to her husband a part of the annual income. It is a duty which she should perform. It is a duty which she should perform.

THE VALUE of an Endowment policy, which is payable at a specified age or previous death, is higher than that of a policy which is payable at the end of its term. It is a duty which she should perform.

IT IS A WIFE'S DUTY to send and pay costs only £215 per £100 each year, and if death occurred at age 40 years of age there will, including the profits, a sum of about £1,800 payable on a £1,000 policy.
