60% OF NAIROBI WATER WASTED

SERIOUS MENACE TO HEALTH OF KENYA CAPITAL.

SEGISTERED AT THE SENERAL POST

Selfish Consumers Neglect Interests of Sufferers.

FACTS ABOUT THE WATER SHORTAGE.

The increase in the number of consumers is placing a gro-stain on the available quantity of water and the solution does lie in blackguarding the Corporation staff, however easy and as-graying that may be.

type set may or.

The position is that the water supply when taken over by the Tawn Council of Nairobi from the Rollway, was primitive and in some respects antiquated. It was obtained from a reservoir at Sikhyay which has required constant attention to maintain a standard of parity. It has since been augmented by springs but its expectify a strictly limited.

The main source of trouble has, however, been the system distribution. The piping was old and of a small size. The reduction area of the town have spread and there is a constant deman on the part of new applicants for a supply,

The large building programme now in progress is also a serious in on the limited resources. The Town Council has, so far, failed to find near at hand an rustive source of water for the Capital although it is still trying

It should not be assumed that no steps have been taken to deal with the situation.

win the situation.

The only palliative which the Council itself can apply is improvement in the system of distribution. That is not a job that can be performed oversight. For a year the Corporation has been used by intelling larger piping and the end of that work is not in dist.

Other experiments are also being undertaken. Last night for stance, a valve was introduced with the object of drawing from the Muthalga, supply the quantity to increase the supply to portion of Parklands most seriously affected. The value of that aperiment will be assessed to-day.

It is a fact which is not appreciated by the public that had the approvement in the distribution system not been undertaken last at the whole of Parklands to-day would have been without water.

the wayse of rareasons no-day would nave been without water. But the real remedy for the immediate difficulty lies with the consumer. Those who are largely to blame for the suffering and inconvenience of many people are the fortunately situated consumers who are unable or unwilling to think of those inadequately supplied.

Those selfish people water their gardens liberally while someone a stone's throw away is unable to bath the children or find ugh water to sook an ordinary dinner.

Others, particularly those with outside stand pipes, allow every sual African, in addition to their own servants, to make free use the water.

of the water.

There is far too much waste in Nairobi, particularly in the dry sassons. Mr. Davidson, the Town Engineer, declares that sixty per cent of the water of Nairobi goes to waste.

It has got to stop—in the interests of public health if for no other reason.

reason If economy is not practised voluntarily there are other and less pleasant methods of enforcing it. The thoughtles householder has his choice He won't have it long.

On Tussidity the Town Council appointed as ware it song, whose 500 it is to impect and report waste.

The East Arises Steadard is continuing investigation of the position and will see the facts planity before the public. Those who are sufferers or will support the public to the public by the public by the public by the public by the public bisesses.

To-morrow there will be set out details of the powers the Corration already possess in law to deal with abuses of the water

FIRING " " DIRECT

- a vital reason for Buick's unmatched power

Just as all the force of exploding powder in a can-non is concentrated directly behind the shell—so all of the force of the exploding gas in Buick's engine is concentrated directly behind the piston.

This is the "direct firing" principle—a vital reason why the famous Buick Valve-in-Head engine develops more power for its size than any other automobile engine.

The result of this direct and efficient application

of power is an unmatched brilliancy of performance. Buick for 1928 is off like a flash on the gat-away—has power in reserve for the steepest hills—and stamina to survive the roughest going. And because of its superior engine efficiency. Buick for 1928 is a remarkably economical car-to operate.

Drive a Buick for 1928 to-day. You'll be quick to acknowledge the advantages of the direct firing "Valve-in-Head engine.

INDIAN CONGRESS MEMORANDUM FOR THE COMMISSION.

Opposition to Federal Council and European Elected Majority.

ALTERNATIVE PROPOSALS FOR CLOSER UNION.

Increasing Association of Immigrant Communities in Responsibility for Government.

The Indian National Congress has submitted a ngulty memorantum to the Closer Union Commission of seeks to justify the claim for a more important size in political changes by the past record of the com-unity in the official, commercial, industrial and pro-sidual life of the country.

They are opposed to a Federal Government as practure and recommend a continuation of the system of the recording to reference. They are also opposed to any iterference with the Mendate of Tanganyika. They a, however, in sympathy with stretchion of closer with the system of the recording the system of the recording the system of the stretchion of the system of the

They are strongly of the opinion that the time has not yet come when the official majority on the Kenya Legislature can safely be abrogated and would view any constitutional change with dismay as fraught with disastrous consequences to the natives and with danger to themselves.

They do not, however, dissent from the principle of increasing association of the immigrant communities in the responsibilities of Government.

the responsements of towerment. Suggestions to this and thoulds, Indian representation on public bodies, the creation of an advancement of the result of the

Finally they maintain their claim to a common roll as the only method of bridging the gap between the two communities.

FIRING " " DIRECT

- a vital reason for Buick's unmatched power

Just as all the force of exploding powder in a can-non is concentrated directly behind the shell—so all of the force of the exploding gaz in Buick engine is concentrated directly behind the piston.

This is the "direct firing" principle—a vital rea-son why the famous Buick Valve-in-Head engine develops more power for its size than any other automobile engine.

The result of this direct and efficient application

of power is an unmatched brilliancy of performance. Buick for 1928 is off like a flash on the get-away—has power in reserve for the stepest hills—and stamina to survive the roughest going. And because of its superior engine efficiency, Buick for 1928 is a remarkably economical car to operate.

Drive a Buick for 1928 to-day. You'll be quick to acknowledge the advantages of the direct firing "Valve-in-Head engine.

SECRETS OF THE KENYA EARTHQUAKE.

Director of Public Works Conducts a Personal Examination.

NO VOLCANIC ACTIVITY.

Sabukin Valley and Luikipia Eccarpment, the Centre of Strata Fracture.

The Director of Public works, Mr. H. L. Sikes, has examined the "locus" of the recent earthquake and his discoveries and conclusions have been disclosed to the "East African Standard" in the interview below.

There was no volcanic activity and the earthquake was due to a local fracture of strata accompanied by settling movements sufficient to cause vibrations which were felt all over the Colony.

The fracture of the strata is believed to be due to the gradual loss of heat by a vast mass of volcanic rock, setting up a tension which became so great that the fracture in the strata resulted.

e centre of the earthquake was the Sabukis Valley and a ten miles crack appears on the face of the escarpment overlooking the walley while subsidies took place in the valley itself.

The Director of Public Works considers the absence of earthquakes in the Ritt Valley in recent years remarkable having regard to the character of the area.
