## TASK OF EDUCATING THE NATIVE.

Suffering from Lack of Headquarters Staff.

Dealing with the organization of the education of natives, the Education Department's accounts for 1926 state that for the year 1926 the number of natives in the primary schools in the rate of growth is estimated at 100 per cent. This rate was probably more liberal than that of any other Colony in the Empire.

It is therefore understandable that the Education Department should be suffering from a shortage of headquarters staff. This is a fact which has not been brought out in the Report in the Education Department's accounts for 1926. It is a fact which has not been brought out in the Report in the Education Department's accounts for 1926.

INDIANS IN KENYA.

To the Editor, "E.A. Standard." Sir.—I am glad to hear that a few of the resolutions passed at the recent session of the Indian National Congress, held at Madras in December, 1927, have been adopted by the Indian Council, the Hon. Mr. O'Shea, M.L.C. for Plateau North, who has set the example in your daily issue of even date, in which he proposes an Indian representative body, especially one which has been instrumental in the demand for direct native representation on the Legislative and Executive Councils of the Kenya Colony.

I do not desire to draw the Hon. Mr. O'Shea's attention to the findings of the Economic Commission, in their report of March, 1919, and to the resolution passed by the Convention of Associations in January, 1919, which are almost homogeneous in character and analogous to the wording of the speech of Mr. O'Shea in the House of Assembly at Eldoret, on 11/1/28.

The Hon. Mr. O'Shea's attitude towards education in Kenya seems to lay in a dualism as an educational development, the suggestion or proposal for the direct native representation on Councils should cause such an indignation to the Hon. Mr. O'Shea's country? It is because it would impede the development of the native race to exploit the natives of the country?

The Hon. Mr. O'Shea's attitude towards education in Kenya seems to lay in a dualism as an educational development, the suggestion or proposal for the direct native representation on Councils should cause such an indignation to the Hon. Mr. O'Shea's country? It is because it would impede the development of the native race to exploit the natives of the country?

Under the circumstances I would request Mr. O'Shea's indulgence in necessarily deep, the intergroup movement started by him, may help to put the Kenyan mind into a state of mind, and to make and walk into a harmonious condition, and to within the full of manufacturing industry. A copy of them goes, if you.

"The Sincerest form of Flattery"

Over three years ago Chrysler gave to the motoring world a new type of motor car, which embodied power, speed, acceleration, dynamic and stable balance, braking power and riding comfort hitherto unknown even in cars costing double the price.

Ever since, the industry has been striving first in one model, and then in another, to produce cars that could compete with the Chrysler in these vital attributes. Yet Chrysler sales records and Chrysler Road Records prove that to-day Chrysler still maintains the unrivalled supremacy.

WHEEL WOBBLE.

Inter-Action of Engine and Frame.

Motor cycle wheel wobble is well met with, although the problem is presented here as though it were a new discovery. It is, however, a very old one, and more and more as the pressure and the weight of the engine and bearings more resistant to force. Thus, the wobble is not a new discovery, but a well known one, and it is not a new discovery, but a well known one.

A War Veteran.

A DODGE CAR WILL IN OVER

Amid the glances and remark that characterized the reception of the Dodge car at the Legion in Freetown, one has the impression that the Dodge car is a very good one, and that it is a very good one.

# TASKS OF CHURCH AND STATE INTER-DEPENDENT.

## Governor's Address at Opening of Diocesan Synod.

### CIVILING INFLUENCES.

Desirability of Regular Prayers for the Government.

### "THE WORLD"!!

The Bishops of Salisbury and St. Albans have been active in calling attention to the side of the Church's work, and last summer in London a great gathering was assembled to consider what was meant by the phrase "the world"!!

### HIS EXCELLENCY

His Excellency, Sir Lancelot Dalglish, Clerk and Secretary of the Mountain Diocese of Natal.

I was very glad to accept your invitation to the African Synod which I have now only been successfully accomplished by the aid of the Church and State. Church and State have both in the past and in the future, established and fostered the civilization and development of Africa.

I should like to take this opportunity of expressing my thanks to you for the honor which you have conferred upon me by your kind invitation to be present at the opening of the Diocesan Synod.

But first I do so let me turn aside for a moment to wish God-speed to the new Diocese of Orange, Transvaal and the new Diocese of Tzaneba and the new Diocese of Tzaneba and the new Diocese of Tzaneba.

You, your Lordship, in your address to the Synod, spoke of the side of the Church's task in East Africa. It is my duty to refer to the side of the State's task in East Africa.

It is my duty to refer to the side of the State's task in East Africa. It is my duty to refer to the side of the State's task in East Africa.

It is my duty to refer to the side of the State's task in East Africa. It is my duty to refer to the side of the State's task in East Africa.

BRITISH TRADE IN EAST AFRICA.

American Competition in Machinery Group.

Mr. C. Kemp, the British Deputy Commissioner in Nairobi, in a report on the trade in machinery in East Africa in 1926-1927 (issued by the Department of Commerce) states that in regard to the iron and steel industry the heavy machinery of the United States is being imported in large quantities by the American firms. He also mentions that the American firms are being encouraged by offers of long credit from their banks and are endeavoring to stimulate the production of iron supplies, but largely owing to the decrease in offers of long credit from the iron industry.

Naturally the effects of the British embargo hindered for some time the progress of British machinery, and competition from Continental sources, particularly Germany and Belgium, has always to be expected in the iron, wire, nails, screws, rivets, and rail trade, especially in countries such as the Italian Colonies, Madagascar, which are developing rapidly, and where fine iron and steel plants are being built. It is possible profits upon requirements here will be small, but the British should be made of the light rail imports.

Transport Policy.

Laborer distribution, the growing concentration of agricultural industry, and the grouping or concentration of certain areas of growing an increasing output for all modern means of transporting the cost of transport from the nearest point on the general transport system. The general policy in certain parts of the continent, particularly in Kenya and Tanganyika, is very largely to concentrate means of cheap transport of exports over as the expense of high rates upon imported goods.

Again British manufacturers have been less successful in penetrating their share of the trade in railway carriages, motor vehicles, and motor cycles, and again largely at Continental expense. There has been some development, however, in importations from the United States of America, largely, of course, in those articles which American factories supply exclusively. It is to be expected that American will secure a largely growing share in these trades. Special attention naturally began, and in some cases is being given, to the British and German manufacturers in the machinery group.

In regard to non-ferrous manufactures, the British have been successful in maintaining their share of the trade at the expense of both the United States and Germany. The latter was not unopposed in view of the change in the material supplied by Continental supplies, but the coming of a certain volume of trade from India has not been without its effect. It is to be expected that the United States will continue to be the main source of supply for that country to the extent of its available resources.

The competition for the iron and steel industry has been increasing in Kenya, and it is to be expected that the American firms will continue to be the main source of supply for that country to the extent of its available resources.

The report adds: In the machinery group the results of 1926-1927 are not so encouraging as in the case of the other groups. The machinery group has been the least successful in the year.

AMERICAN MANUFACTURERS, ALMOST ENTIRELY IN THE AGRICULTURAL IMPORTATION LIST.

British manufacturers are very efficiently represented in the East African market, but with the growing mechanization of the agricultural industry, and particularly the growing import of such items as tractors, motor cars, and other agricultural machinery, it is to be expected that these articles are becoming more and more important. The American firms are being encouraged by offers of long credit from their banks and are endeavoring to stimulate the production of iron supplies, but largely owing to the decrease in offers of long credit from the iron industry.

A very careful watching of the market during the past three or four years leads some experts to believe that the American firms are being encouraged by offers of long credit from their banks and are endeavoring to stimulate the production of iron supplies, but largely owing to the decrease in offers of long credit from the iron industry.

Naturally the effects of the British embargo hindered for some time the progress of British machinery, and competition from Continental sources, particularly Germany and Belgium, has always to be expected in the iron, wire, nails, screws, rivets, and rail trade, especially in countries such as the Italian Colonies, Madagascar, which are developing rapidly, and where fine iron and steel plants are being built.

Again British manufacturers have been less successful in penetrating their share of the trade in railway carriages, motor vehicles, and motor cycles, and again largely at Continental expense.

In regard to non-ferrous manufactures, the British have been successful in maintaining their share of the trade at the expense of both the United States and Germany.

The competition for the iron and steel industry has been increasing in Kenya, and it is to be expected that the American firms will continue to be the main source of supply for that country to the extent of its available resources.

The report adds: In the machinery group the results of 1926-1927 are not so encouraging as in the case of the other groups.

leaders for a common roll. And mark you this—that demand is not for a small number of professional men and a few of the leading traders who are doing essential business. The overwhelming majority of the Indian and native do not get a brass farthing about public or private affairs. They are allowed to make money—mostly by the sweat of their brows. If they were allowed to play a part in the Government—

CONFLICTING VIEWS ON KENYA GAME.

Sir S. Henn on Mammals to Life and Crocs.

The game of East Africa has been the subject of a most interesting and a very general review of the conditions in which they are to be hunted in the country.

Can anything be done to prevent the extermination of game in the game reserves? It is a question which has been asked by many of our sportsmen.

It is not difficult for the owner of private land in the absence of regulations governing the hunting of game on his land to exterminate the game on his land.

It is not difficult for the owner of private land in the absence of regulations governing the hunting of game on his land to exterminate the game on his land.
