## Excessive perspiration is a sign of weakness

Not, of course, the perspiration due to heavy exertion or heat, but the "Cold perspiration" and nightsweats which accompany weakening diseases, such as Tuberwhich accompany weakening diseases, such as I uber-culosis. These nightsweats are not only a sign of weak-ness, but they also weaken the body. To conquer this weakness you should build up your forces right from the core by strengthening the body-cells with calcium, their vital constituent. Kalzana will do this for you.

Kalsana tableta contain calcium in a special chemical con hination, which causes the calcium to be readily, absorbed by the body and retained. The strengthening influence of Kalzana will be noticed even after a few days by a lessening of nightawests.

In Tuberculests. The attempthening effect of Kalsana is of special importance in Tuberculosis. The fortified cells are more easily able to resist the attacks of the bacilli, while an excessive content of calcium in the organism causes calcium to be deposited in and around the infected places in the

## If Slipping Belts Made a Noise

IF slipping belts made a noise—louder and louder as they slip ped more and more—belt slippage wouldn't waste so much

The minute a belt began to screech, you'd mark it for a take-up

at the first opportunity.

It wouldn't have to go on slipping—a little worse every day—
till it got so loose it had to be taken up, even if the whole plant
shut down. shut down. Now and then you meet some lucky man who says he never had
