Tonics for the Motorist.

An Ingenious Braking System. Suction-Operated Mechanism Worked off the Accelerator Pedal.

Years of an ingenious nation-
operated brake has been the result
of the motorist's need of a
motor car with satisfactory results.
The demand for a car which will
decide itself from this paper
describes the new braking system.
We have recently seen one of
the most ingenious suction-operated
braking systems ever devised.
It is a simple mechanism, but
ingenious in its design, and
without shifting the foot. The
operator simply depresses the
accelerator pedal, and the
brakes are automatically applied
by means of a simple lever,
which is released the throttle is closed
and then there is a short addition-
al stage of travel, during which
the pedal rises under the action
of a light spring to open the suction
valve and operate the brakes pro-
gressively.

Although we were somewhat dis-
satisfied at the number of the
tests at the outset, a test on the
road served to show that the
new system was a very successful
one. The test was made on a
road of the length of which it
is never necessary to shift the
foot from the accelerator pedal.
The test was made on a road
of the length of which it is never
necessary to shift the foot from
the accelerator pedal. The test
was made on a road of the length
of which it is never necessary to
shift the foot from the accelera-
tor pedal. The test was made
on a road of the length of which
it is never necessary to shift the
foot from the accelerator pedal.

Spring Action on Hills.

Another point is the way
retarder. It is a simple mecha-
nism, but ingenious in its design,
and without shifting the foot. The
operator simply depresses the
accelerator pedal, and the
brakes are automatically applied
by means of a simple lever,
which is released the throttle is closed
and then there is a short addition-
al stage of travel, during which
the pedal rises under the action
of a light spring to open the suction
valve and operate the brakes pro-
gressively.

been effected without the lifting of
the foot from the accelerator pedal.
The test was made on a road of
the length of which it is never
necessary to shift the foot from
the accelerator pedal. The test
was made on a road of the length
of which it is never necessary to
shift the foot from the accelera-
tor pedal. The test was made
on a road of the length of which
it is never necessary to shift the
foot from the accelerator pedal.

We carried out two tests of the
device, first on a level road, and
secondly, on a well-known 10 h.p.
car, and the results were most
satisfactory. The test was made
on a road of the length of which
it is never necessary to shift the
foot from the accelerator pedal.
The test was made on a road of
the length of which it is never
necessary to shift the foot from
the accelerator pedal. The test
was made on a road of the length
of which it is never necessary to
shift the foot from the accelera-
tor pedal. The test was made
on a road of the length of which
it is never necessary to shift the
foot from the accelerator pedal.

Turning to the construction of
the device, the suction motor
is a simple mechanism, but
ingenious in its design, and
without shifting the foot. The
operator simply depresses the
accelerator pedal, and the
brakes are automatically applied
by means of a simple lever,
which is released the throttle is closed
and then there is a short addition-
al stage of travel, during which
the pedal rises under the action
of a light spring to open the suction
valve and operate the brakes pro-
gressively.

The Roads of Zanzibar and Pemba.

An Arterial System Built to Foster an Industry.

The following article reported
from "Imperial Highway,"
issued by the Shell Company,
South Africa, gives details of
the progress which has been
made in road construction in
the islands of Zanzibar and Pemba.
The article states that the
roads are being built to
transport within the islands.
The article states that the
roads are being built to
transport within the islands.

The main roads are of
concrete, and are
constructed on a
foundation of
concrete. The roads are
being built to
transport within the islands.

The VICTORY SIX

Engineering Victory of the Decade

Dodge Brothers Victory Six is
the only car of its kind in the world.

Its chassis frame is the full width of
the body—for the first time in motor
car history! And the body has only
one major part.

A car that is lighter yet sturdier—
another yet tender—designed yet better in-
lines and design—the most remarkable
Engineering Victory of the decade!

The Ties for Co-Operation.

Progress reports of the progress of the campaign inaugurated some months ago by Government for the destruction of unimproved houses, has prepared the Colony for the detours which have been taken by the Government of Kenya, in its action with the leading commercial and agricultural interests in the country. Special Provisions passed yesterday, announce the intention of Government to prohibit the operation of certain important foodstuffs from February 22 and the preparation of legislation to establish a Food Control Board which will have wide powers in requisitioning supplies at prices based on current market values, in distributing such supplies among the affected areas, in obtaining the use of transport for the purpose and in restricting the actions of dealers. At the same time Government has no desire to interfere with the normal export trade of the Colony particularly in regard to the adjoining territories and where contracts exist and shipping space has been booked. It will be apparent generally that Government has displayed wisdom in taking steps to forestall the influence of the market has materialized. At the present time we are indicated only a few days ago, some rumours prevail in many large native areas in the Coast and in the Highlands and the provision of immediate relief measures through a private agency which must be found. The task of fighting hoards of locusts may be more formidable than we can imagine or more strikes on the part of the community than one of hoards that have been calculated by some. Whether we may be the measure of the threat of disaster, we appeal to the Colony to develop the ties that connect with her, in lesser areas, enabled it to overcome the difficulties and to progress. The very magnitude of the task should be an incentive to call forth the best that is in the character of the people of the Colony. Added to ourings we suggest the value of national co-operation. The fight against the pest will be the first instance to be dictated by the instinct of self-preservation, but it is the activities of the individual in his own interests have a direct bearing on the welfare of the whole. Surely any form of inactivity, development to disaster and we hope that the League Committee which have been instituted in the districts of the Colony, in those areas in which they propose to inaugurate will serve the full measure of their neighbourhood. It is difficult for any form of pressure to be carried by any legislation that can be devised, and the assumption of responsibility becomes a personal one. No man should be left to fight his own battle. The trials which have happily occurred from the manner of initiation should not be content with such a procedure for their deliverance but should urgently seek every means of providing assistance for those in a less fortunate situation and every detailed matter be presented to expedite the value of the energies at the danger point. In the intention of the Colony there must be as little interference as possible with the normal trade, upon which its commerce depends and that can only be secured by the fullest measure of co-operation. Government is prepared to use the full power to maintain the threat but it can only succeed if every individual is every ready to sacrifice self-interest for the good of the whole. Co-operation, determination and an unflinching will go far to reduce the actual of the measure to the property of the country and that may have the greatest before. The present is a serious time for their display in a righteous cause.

measure of the threat of disaster, we appeal to the Colony to develop the ties that connect with her, in lesser areas, enabled it to overcome the difficulties and to progress. REDUCING THE COST OF LIVING.

Some East African Recipes that will Help.

No. 15: Economical Cakes.

BI-A-MENTA HOUSEWIFE

No. 15, to complete, whereas others make the paste of the milk. Cream with sweetener. Butter Cake: Beat in three tablespoons of melted butter before adding the egg whites, and use only 1 cup of milk.

A GOOD STANDARD RECIPE.

- 3 eggs, 1 cup of sugar, 1 scant cup of milk, 2 teaspoons of baking powder, A pinch of salt.

Cream the sugar and beaten egg yolks. Lift it some, beat dry the cream, add a few drops of the milk, mix by hand, mix together and add alternately with the milk to the egg and sugar mixture, beating well after each addition.

VARIATIONS.

Vanilla Cake: Flavor with vanilla and cover with vanilla meringue. Lemon Cake: Add the grated rind of a lemon to the batter, and use with lemon icing.

Orange Cake: Substitute orange in place of lemon in the above.

Chocolate Cake: Take out 4 tablespoons of flour and add 4 tablespoons of cocoa. Cover with white icing.

Meringue Cake: Divide meringue in half and to one part add 4 tablespoons of cream, meringue with a little acid meringue. When putting in the pan, alternate 3 tablespoons of the meringue and 2 of the cake.

Caramel Cake: Add 1 cup of developer to one of the batter and another 1 cup to the top, with dry caramelous cream.

CHOCOLATE ICING.

Mix 1 tablespoon of butter, 6 tablespoons of milk, 1 teaspoon of vanilla, 4 tablespoons of flour of cocoa, and enough icing sugar to spread.

MOCHA ICING.

Made as above but substitute 4 tablespoons of strong coffee in place of the milk.

LEMON ICING.

1 tablespoon of butter, 2 tablespoons of lemon juice, 4 tablespoons of water, and enough icing sugar to spread.

ORANGE ICING.

1 tablespoon of butter, 2 tablespoons of orange juice, 4 tablespoons of water, and enough icing sugar to spread.

BOILED ICING.

1 cup of sugar, 1 cup of water, and 1 egg white. Put water over sugar and stir until dissolved. Beat until it "breaks" and pour slowly over the stiffly whipped egg white, beating vigorously all the time. Continue to beat until thick enough to spread.

CARAMEL ICING.

1 cup of milk, 5 cups of brown sugar, 2 tablespoons butter, 1 teaspoon of vanilla. Cook all together until smooth and thick.

Services in Paris.

A TANGANYIKA BILL'S OBJECTS.

The Tanganyika "Official Gazette" contains the text of a Bill which the Government has introduced for the Council of Public Service.

This Bill is designed to effect by legislation the principle that the service of the public service within the meaning of Article 7 of the Mandate, which provides that the Mandatory shall be bound to organize such services as such and conditions as he considers fit.

In accordance with this principle the Bill, in the Government's Bill, contains a list of all services performed in connection with the handling and lighting of cargo in any port to which the law may be applied. So far as such services might continue to be performed by private enterprise, they would be performed under license and subject to such rules as might be made under clause 22. But it would be within the power of the Government, if it so wishes, to take over in any particular port any business which is now being carried out by private enterprise, and the service of the port should be undertaken directly by the Government itself.

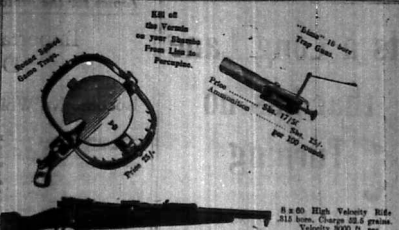

In consequence of any action which may be taken under the Bill, any person who shall have maintained a public service in any port before the commencement of the law is prevented from continuing to do so, subject to the conditions laid in the limits of time which the Bill declares, reserving the Government to purchase from him the tools, machines and fixtures which he shall have used in the performance of that service.

All rights which arise under the International Convention of 1901, relating to Belgium, and which are not transferred by clause 11.

Tanganyika Appointments. The following Tanganyika appointments are gazetted:—To be Chief Secretary to the Government—D. J. Jardine, O.B.E.

To be Deputy Chief Secretary—S. R. B. McCallister, C.B. To be Acting Chief Secretary—S. R. B. McCallister, C.B.

To be Acting Deputy Chief Secretary—F. J. Partridge, Assistant Secretary, Tanganyika Railways—F. T. Dawson, Assistant Secretary, South Tanzania District—C. P. Ribby, Cade.

World's Greatest Value

ESSEX Super 6

The outstanding fact in the Essex Super-Six is not performance alone, nor appearance and finish but rather the unequalled combination of quality and value offered. It is built-in quality and advanced engineering design that has made Essex the outstanding "Six" in its field. To the famous Super-Six motor and rugged Essex chassis has been added a beautiful new line of bodies.

Topics for the Motorist.

Important Developments in Diesel Engines.

Locomotive Which May Affect Road Transport

Local engines are giving many people seriously to think as to how far the following article is "Motor Strangers".

Despite the fact that appeal to manufacturers and users of road transport vehicles, it is not so satisfactory to other interests as appears at first sight. The subject is of general application represented by engines produced by Messrs. Rover, Napier and Co. Ltd., Napier-Trust, whose name has worldwide fame, and the construction of these locomotives, of all sizes, gives the general. Examples of the new type are being applied for use in the motor, and the application of the new type is of public service in Britain was demonstrated in the White Highways, a series of motor roads (D.M.) track which runs from these lines (London) to the main power and weight reduction of footpaths of footpaths, and which will shortly be the sphere of its use for goods and passenger service.

Anti-Chamber Combustion.

This Kerr Steam production has a reputation for producing the type engine built by J. & H. McClean, Ltd., Dundee, who have adapted the extra-durable system introduced into this machine. The fact is that the process of ignition does not in the least impede the increase of pressure forces and charge into the main combustion chamber, where combustion is complete.

One of the advantages arising from this scheme are that it obviates the need for a separate fuel feed, and that the pressure is kept up to as possible every drop of the waste cooled area of the cylinder head, remains at a higher temperature throughout the cycle, thus resulting in the certain, uniform and complete combustion of the fuel. It can be said without fear of contradiction that this comparatively recent development in Diesel engine construction has been well demonstrated by the fact that the "Kerr Steam" engine is a feasible power-plant for road vehicles and light commercial vehicles of the type under review.

Engine Characteristics.

The engine developed for the motor and stroke of 2 1/2 x 3 1/2 inches and is rated at 60 h.p. its maximum speed is 1,800 r.p.m., which is being a greater value upon the stroke of the fuel pumps, and which is needed to drive the cylinder. Speed regulation is by varying the location of the fuel injection, thus being in "variable" in the speed range, though the governor control level or pull is done at the accelerator, as the petrol engine practice.

Speed Champion of America.

TRAIL RECORD OF LOUIS METZER.

Louis Metzer, a virtually unknown racing driver well known in Indianapolis circles, has been jumped into national prominence by winning the American Automobile Association speed championship for 1922.

The statement was issued by the Contest Board of the A.A.A., on the basis of official records, the major events run during the season by Metzer were: a 200 mile motor body, which surpassed and equalled the record of the United States.

Knob of Philadelphia, who captured the world's speed record in the 200 mile motor body at Daytona Beach, was second and Louis Metzer, who piloted a Buick in a gear type pump; four gears were used for the motor body, which operated the overhead exhaust and intake valves, and the fuel pump. Water circulation is effected by a pump, attached to the front of the cylinder block, driven by extension of the fan pulley shaft.

There is no air pump, none being used for the fuel delivery, an already mentioned, which is drawn into the cylinders through the intake by the fan-pulley shaft of the pump; the latter is also an oil scraper.

This air-pump, equipped with the fuel pump unit, is on the side of the cylinder block, and is removed in less than 10 minutes without disturbing the motor as a whole or any other motor part. The assembly consists of two pumps, one for each cylinder, with a total capacity of 1.100 c.c. They are operated through motor levers from a camshaft, a variable stroke being obtained by the quantity of fuel stroke according to the requirements as to speed and load. It is by varying the fuel pump that the governor and accelerator control take effect. A rigid control cable, which is removed almost as readily as a tracking clip for cleaning or other attention.

The World's Greatest Tyre

THE GOODYEAR

DOUBLE EAGLE

Entirely Different.

The Double Eagle Tyre should not be confused with any so-called "Heavy Duty" tyre - it is much more than that. It is non-competitive, by design and intention a super-tyre, in the highest meaning of the term.

Made Regardless of Cost.

The Goodyear Double Eagle tyre was designed and made regardless of cost, without thought to competition. It is a tyre that transcends all previous standards. Goodyear engineers worked with a free reign for two years - without consideration of cost or selling price - to develop this tyre masterpiece. The results is - the new Double Eagle, the most remarkable tyre the world has ever seen.

Great Tyre Mileage.

Creation of the Double Eagle Tyre was based upon the knowledge that there was a definite demand for a tyre that would give 30,000 and more miles of service and at the same time represent a greater factor of safety against abuse, rough roads, rocks and thorns than is ordinarily necessary. These amazing new tyres put on a new car will last as long as the average owner drives it. Owing to the special tread rubber used and the massive

construction, the danger of punctures is practically eliminated.

Special Construction.

Wherever additional material or extra quality could possibly add to the service abilities, they were used extravagantly. The only limitation observed by Goodyear was the maintenance of the tyre within the established standard of proper design.

The "Supertwist" cords are especially heavy. The tread compound is the toughest ever used on any tyre heretofore, and is approximately double the thickness of ordinary types.

There has been an extravagant use of rubber between the plies of cord, and the side walls are unusually thick to resist abrasions from ruts and rocks.

Exhaustive Tests.

Because this tyre was to be offered as Goodyear's greatest achievement tests were imposed upon it such as no other tyre has ever been asked or expected to endure.

Under most adverse conditions as far as the tyres were concerned, the Goodyear fleet of test cars, equipped with Double Eagles were driven on abusive cross country, dashes from the Atlantic to the Pacific coast and return on improved and unimproved roads. Speed and endurance trials were held back and forth across the rocky mountain roads of New Mexico, across the Arizona deserts, where a combination of harsh roads, trails, thorns and extreme heat contrives to break down any tyre if weakness exists. No tyre has ever before endured successfully such tests as were showered upon the Double Eagle. Bigger, stronger, infinitely more enduring, these new tyres will change all previous conceptions of tyre performance.

It is made for those who demand and require superlative service, particularly under severe conditions. Built for those who drive over thorns, rocks and rough trails, and also for those who drive at high speeds.

DOUBLE EAGLE PRICES.

Size.	Cover.	Tube.
30 x 4.50	187 50	21 50
30 x 5.00	192 50	25 50
31 x 5.00	198 50	28 00
31 x 5.25	215 50	30 00
30 x 5.50	229 50	31 00
30 x 6.00	235 50	33 50
31 x 6.00	241 50	34 50
32 x 6.00	250 00	35 50
32 x 6.50	259 00	37 00
32 x 6.50	256 00	40 00

Double Eagle tubes are made extra heavy in gauge and tests have proved that air diffusion through the walls is practically non-existent.

Fit Double Eagle and eliminate tyre trouble for the next two or three years.

If Your Dealer cannot Supply You with Double Eagle Write Direct to Us.

Double Eagle are obtainable in low pressure sizes only and are sold only in pairs.

CORRESPONDENCE

Colonial, international and imperial questions.

They were the appointments of the British Empire Commission every country.

most surely be because our London lawyers are incapable of composing our letters in the usual and different manner.

They have been advised by some of our best lawyers, and now say by law persons, and the necessary steps were taken, even though a poor country.

Colonial Commission may be a good thing, but it is a most serious position at its present work, and we are sure that it will be a success.

It is the main subject of the Commission's report, and (1) Native Policy; (2) The Indian Question; and (3) Colonies.

The principle of nationality law has to be admitted and accepted in the broadest and most liberal sense, and, under it, must be understood that the main object of the Colony is to be a part of the Empire, and that it is the duty of the Government to see that it is so.

It follows, therefore, that highly placed, distinguished and experienced men should be appointed to cope with this important question, and that such an authority should be responsible to the Secretary of State for India or elsewhere, by K.C.I.A. In the case of the Indian Commission, it is a good thing that it should have this vital question on its mind, and that it should be able to report on the subject of the Indian Commission.

The wisdom and expediency of the Indian question is the subject of the Report, and it is a good thing that it should be so. It is a good thing that it should be so, and it is a good thing that it should be so.

It is a good thing that it should be so, and it is a good thing that it should be so. It is a good thing that it should be so, and it is a good thing that it should be so.

INDIAN BURNING ISSUE

In the Editor "E.A. Standard" Sir—I have read the letter you published last Saturday on the above subject, and I am sorry to see, but before saying it, I am sorry to see that you have not mentioned the fact that the report of the Indian Commission is a good thing, and that it is a good thing that it should be so.

The wisdom and expediency of the Indian question is the subject of the Report, and it is a good thing that it should be so. It is a good thing that it should be so, and it is a good thing that it should be so.

It is a good thing that it should be so, and it is a good thing that it should be so. It is a good thing that it should be so, and it is a good thing that it should be so.

CLOSER UNION REPORT

In the Editor "E.A. Standard" Sir—The resolution passed by the Indian Commission, published in today's daily Standard, is a good thing, and it is a good thing that it should be so.

The wisdom and expediency of the Indian question is the subject of the Report, and it is a good thing that it should be so. It is a good thing that it should be so, and it is a good thing that it should be so.

It is a good thing that it should be so, and it is a good thing that it should be so. It is a good thing that it should be so, and it is a good thing that it should be so.

Scotland's Best!

Love and Justice to Every Living Creature.

A column devoted to the interests of the Junior Branch of the Redemptive Army, U.S.A.P.C.A. Edited by the Editor.

There is a man in the house taking the greatest interest in and care of his needs. They were certainly real animals.

"GET-THERE"
Screw and Nut Holder.

Hands a helping hand on every job! This advanced job demands the highest efficient and handy new tool. It grips screws and nuts while insuring them in otherwise impossible places, gives ready maintenance when fingers aren't all thumbs, and is quite as good as a hand hand.

For SCREWS—Push spring blades together and insert into screw slot.
For NUTS—Bring nut holder into position, open blades and insert nut.

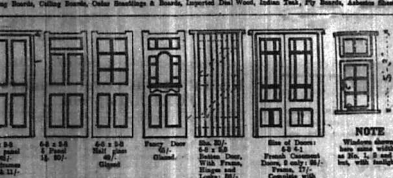

Retail Price—Cycle Size, 25¢; each Garage size, 50¢; 3/4" each 75¢.
