THE LEIPZIG SPRING FAIR.

Arrangements for This Year.

A SUEVY.

The technical fair evoked a magnificent exhibition. The halls as well as the large open space flat had been placed at the disposal of exhibitors very early in the last. Nearly all technical exhibits were presented in the form of industrial products, large electric machinery, instruments of all kinds.

The technical fair evoked a magnificent exhibition. The halls as well as the large open space flat had been placed at the disposal of exhibitors very early in the last. Nearly all technical exhibits were presented in the form of industrial products, large electric machinery, instruments of all kinds.

all shape of least technical machinery had apparatus for food, study, lecture, and the chemical industry also brought their most interesting apparatus, fuel, and electrical machinery, and machinery for them. Within the sphere of the exhibition for machinery and apparatus for application and transportation of fuel, the most interesting was the large number of internal combustion engines on display; there were, however, also following various other engines for industrial purposes, large electric machinery, instruments of all kinds.

The attendance of foreigners at the fair was very striking. All nationalities were represented and the fair was very successful. The arrangements for the Leipzig Fair were generally highly effective. When the specially arranged programme of lectures, exhibitions and amusement was arranged it is a noteworthy fact that the participation of these lectures was very successful. The industrial programme of the fair was very successful. The arrangements for the Leipzig Fair were generally highly effective.

able and in the emergency rather than the risk to find a hand brake lever which is unlikely to get at; while such parts as the electric horn, which is essential for dimming right control, are usually placed in such positions that they can be reached with the least delay. It is not necessary to add that the use of adequate size and good quality materials is made large having to command a good view of the road in the event of a breakdown. The principle of fitting over this window is blind which can be controlled from the driver's seat, as, on grounds of safety, a sound mirror would be a useless reflection on the road to either side of the vehicle. The following are the most important points which still remain to be solved, and until we get some form of standard lighting and a more satisfactory method of controlling the difficulty will be controlled over.

Signalling Devices.

Mark the vehicle may be used as a signal to other drivers which may be considered effective by day and night, not only for indicating the position of the vehicle but also for indicating the speed of the vehicle. The use of a flashing light for this purpose is a definite advance on the present system of signalling. It cannot be too strongly emphasized that the use of a flashing light is not intended to be used as a signal to other drivers, but as a means of indicating the position of the vehicle. The use of a flashing light is not intended to be used as a signal to other drivers, but as a means of indicating the position of the vehicle.

Anti-Dust.

The great demand for a greater measure of safety in connection with the prevention of dust is met by the use of a dust filter in the engine. The use of a dust filter in the engine is not intended to be used as a signal to other drivers, but as a means of indicating the position of the vehicle.

erty, is again a consideration of the use of a hand brake lever which is unlikely to get at; while such parts as the electric horn, which is essential for dimming right control, are usually placed in such positions that they can be reached with the least delay. It is not necessary to add that the use of adequate size and good quality materials is made large having to command a good view of the road in the event of a breakdown. The principle of fitting over this window is blind which can be controlled from the driver's seat, as, on grounds of safety, a sound mirror would be a useless reflection on the road to either side of the vehicle. The following are the most important points which still remain to be solved, and until we get some form of standard lighting and a more satisfactory method of controlling the difficulty will be controlled over.

Brake Efficiency.

The efficiency of the brakes of the car depends in large measure upon the degree of maintenance and the condition of the road. There are no better methods than those adopted on British production cars. On one or two occasions of regulated the drive from the rear while the car is in motion. This scheme is ideal, not only in its simplicity, but also in its economy, but also in its safety. With the coming of the wheeling system, however, an even more important aspect.

The use of driving is mainly in the use of the hand brake, and this is the only method of controlling the speed of the vehicle. The use of a hand brake is not intended to be used as a signal to other drivers, but as a means of indicating the position of the vehicle.

The use of a hand brake is not intended to be used as a signal to other drivers, but as a means of indicating the position of the vehicle. The use of a hand brake is not intended to be used as a signal to other drivers, but as a means of indicating the position of the vehicle.

Heavy Duty Vehicles

and wear TYRE CHAINS. Motor an absolutely necessary. Trucks, Buses, Motor Lorries, etc., plowing their way through soft mud, rough roads or clay soil, need the safe positive traction that West Chain's offer. West Tyre Chains get right down to bed surface—they grip and hold.

West Tyre Chains are made especially rugged to withstand the severe requirements of heavy vehicles of all types. They are furnished for all types, whether passenger or auto—single or dual.

Order from your dealer. Standard of quality for wear a quarter of a century.

IS EXPENDITURE IN KENYA ON TOO PRETENTIOUS A SCALE?

Notable Visitor's Doubts on the Future of White Settlement.

INEVITABLE "POOR WHITE" PROBLEM

Fearful Deterioration in the Physical Quality of European Inhabitants.

"Settlement in Kenya is still in the first generation that quality can hardly be maintained. But genuine there will be many Europeans not suited to agriculture nor fitted for the skilled trades in commerce and industry. For them Kenya will hold out no prospects as unskilled workers or as unskilled tradesmen. Kenya it will have to deal with that problem in an acclimatized form."

The above is a striking passage from a penetrating analysis of Kenya written by the late Administrator and referring particularly to the £80,000 expenditure House before which our country is now standing.

Discussing the scale of public and private expenditure and referring particularly to the £80,000 expenditure House before which our country is now standing, the writer wonders if it is wise in a country which is still at an early stage of its development in general with a bell-curve, of which only one wall and the future of Kenya?

UNFINISHED CATHEDRAL A SYMBOL

Mr. J. H. Robinson, late Administrator of the Transvaal who recently visited Kenya in an expedition to the Victoria Falls, has recorded his impressions in the columns of the "Daily Mail." After referring to the physical position of the country, he says that the country has drawn on the Union for many of its necessities. He says that the country has drawn on the Union for many of its necessities. He says that the country has drawn on the Union for many of its necessities.

But of chief interest to the visitor from South Africa is the impression of the unfinished cathedral which dominates the landscape. He says that the country has drawn on the Union for many of its necessities. He says that the country has drawn on the Union for many of its necessities.

And there is another problem—a fundamental problem for Kenya is that in South Africa the problem of how best to develop the agricultural resources of the country. Kenya is not a uniformly fertile land but it has a few areas with soils of great depth and high fertility.

Thus of Expenditure

Yes Kenya is a land of great opportunity. At Nairobi a population of 15,000 Europeans has spent £80,000 in a year. It is a fact that in Kenya, before the war, we were glad to have a few in the Province. At Nairobi, a population of 15,000 Europeans has spent £80,000 in a year.

Stray Thoughts of a Pioneer

VI. "THE RIDING OF LIFE."

The "East African Standard" has arranged for the publication of a series of articles under the title of "Stray Thoughts of a Pioneer." The first article is "The Riding of Life."

A brave and helpful little book has recently appeared under the title of "The Riding of Life." It is a collection of essays by various authors, including the late Administrator of the Transvaal.

A "Spells Adventure" is a collection of stories and adventures. It is a collection of stories and adventures. It is a collection of stories and adventures.

HOW IS THAT MALARIA IS NOT STAMPTED OUT?

Because quinine only removes the fever producing germs from the blood, and an apparently healed person remains a definite source of infection to his neighbors.

The actual malarial germs are destroyed only by giving the new, reliable malaria vaccine.

FIRST NON-STOP FLIGHT TO INDIA ACCOMPLISHED.
Fairey Monoplane Lands at Karachi.
FAILS TO BEAT WORLD'S RECORDS.
Machine Comes Down Owing to Shortage of Petrol.

It is announced that the R.A.F. Fairey monoplane, flown by Squadron-Leader James Williams and Flight-Lieutenant Jenkins, which was attempting to establish a non-stop record in a flight towards India, landed at Karachi having covered 4,139 miles in 50 hours 38 minutes.
This is the first non-stop flight to India, but is not a world's record, being some 300 miles under that established last year by two Italian men, which was to have broken the duration record, which were in the air for over 60 hours.
It is understood that after flying for about two hours beyond Karachi, the airmen found it necessary to return to the ground occasionally to refuel with petrol and approaching darkness. Headwinds also appear to have been encountered after leaving Bagdad.

OVER 4,000 MILES IN 50 HOURS.
The Air Ministry states that Squadron-Leader James Williams and Flight-Lieutenant Jenkins, who flew the Royal Air Force Fairey monoplane, landed at Karachi at 1.10 p.m. British summer time, today about two hours after take-off. Apparently they had done a fast Karachi for about two hours, but returning owing to the approach of darkness and presence of a storm of altitude.
The first non-stop flight to India was this morning accomplished by the British previous long distance flight. The flight was made by the R.A.F. Fairey monoplane, which was flown by Squadron-Leader James Williams and Flight-Lieutenant Jenkins, who flew the Royal Air Force Fairey monoplane, landed at Karachi at 1.10 p.m. British summer time, today about two hours after take-off. Apparently they had done a fast Karachi for about two hours, but returning owing to the approach of darkness and presence of a storm of altitude.

Apparently they had done a fast Karachi for about two hours, but returning owing to the approach of darkness and presence of a storm of altitude.

A Popular Effort.
Great assistance has been given by the Flying Airmen's Club of Squadron-Leader James Williams and Flight-Lieutenant Jenkins, who flew the Royal Air Force Fairey monoplane, landed at Karachi at 1.10 p.m. British summer time, today about two hours after take-off. Apparently they had done a fast Karachi for about two hours, but returning owing to the approach of darkness and presence of a storm of altitude.

RETURN OF THE SIMON COMMISSION.
Further Interviews to be Held in London.
WORK NOT YET CONCLUDED.

Members of the Simon Commission, who are expected to return to London for further interviews, were interviewed by the Indian Central Committee in London, which is expected to be completed by the 15th inst.
The Indian Central Committee is expected to be completed by the 15th inst. The Indian Central Committee is expected to be completed by the 15th inst.

PRUNES

HERE is something new--prunes as tempting as the "sugar plums" of your childhood fancy. They're DEL MONTE Dri-Pak Prunes--not stewed and canned--but choicest new-cured prunes packed in a new way that preserves every bit of their natural, exquisite flavour and fragrance, and renders them delicious when eaten as a confection, just as they come from the can, or enables you to cook them in half the usual time.

At the height of the prune season--when all the Santa Clara Valley is filled with the perfume of Nature's rich bounty, the finest, most luscious prunes in this famous region are selected, cleaned and packed--under vacuum--by our own special process--in clean, enamel-lined tins. Slow, dry cooking makes them moist and tender--and sealed within the can they retain every bit of their original freshness and delicacy.

— but be sure you say *DEL MONTE*

Why Dental Science Endorses Gibbs Dentifrice

BRUSH MOUTH.

Because its fragrant foam purges into every tiny crevice of the tooth-killing germs, removing "film."

Because Gibbs Dentifrice polishes the teeth to lustrous, round-like beauty without scratching or wearing—most even at the danger line where the tooth meets the gum and the enamel is thinned.

Because Gibbs Dentifrice makes the gums firm, rosy and healthy. To use Gibbs Dentifrice thrice a day is to have sound, pretty teeth for a lifetime.

You'll enjoy the delicious flavor and refreshing effect of Gibbs Dentifrice—so will the kiddies.

YOUR CHEMIST STOCKS IT.

WHAT IS WRONG WITH CONVENTION?

Why Landwa Association Succeeded.

THE EXECUTIVE

Suggested Head for New Head.

(STANDARD CORRESPONDENT), Nairobi, April 28.
A correspondent's members of the District Commission in last week's issue bring to mind the question of the position of our Farmers Association. In the old days, only a few months past, before the advent of Lord Goddard, our Association had at least the consolation of the members of the District Commission. Under the new regime we have lost this protection, and the fact is that we are almost entirely forgotten in the District, we have kept any and every power we have had by sneaking from Convention. Our Association has had a considerable amount of complaint in various quarters, and it is quite clear to us that we have only a surface knowledge of our position.

May I say to all those that our Association defines itself as being one of the oldest in the country, and boasts that there are none that exceed it in loyalty to Convention. Our members are, with not exception, energetic, and we have watched Convention develop the political side, almost to the exclusion of matters of purely farming interest. But I guard it not with Convention. I will do my best to improve. You and I, in the same members, go about on a "fencing" course, and it is, in our view, inevitable that we should have a more serious state of affairs, a great one, if it is admitted that representative members are hardly to be expected to travel to Nairobi ten or twelve times a year at their own expense for the purpose of attending meetings of the Executive; and the futility of Convention, as at present constituted, do not admit of the payment of expenses by members of Executive.

with controlled, do not admit of the payment of expenses by members of Executive.

A Suggested Solution.

Our Association feels that a solution might be found by altering the constitution of Convention in such a way that members Executive meet completely every year at a fixed time of year, but at some new head. A fundamental principle is that it is inadvisable, and that its effectiveness would be materially increased if the membership were considerably reduced. The matters of the famous memorandum, read of the recent stock at the Secretary of State need hardly be dealt with here.

Plan Development.

The development of the Nairobi area goes on and there is preparation for the building up plans. The only drawback now is the advanced price of land, even undeveloped. That course is bound to happen all over where settlement begins to find western to be no exception. They are waiting for the first western to see whether they can still hold their cards as Kapsalis under the Lord Government's scheme, or whether they will be required to make a hasty departure to Mukono and other places, or longer trip to Eldoret.

Nyasia Notes.

UNPROTECTED SLAUGHTER OF CATTLE.

(STANDARD CORRESPONDENT), Mwan, April 21.
For the first time this year we have had a real deer-popper and that was last December. The Government has killed the ground in this district. All the best heavy owners have been going round the Plains and things are looking much better in consequence; but still the stock is only about one-third of what it was 20 years ago in a normal year, so that it is hoped that the present time will continue for weeks to come.

I saw three cattle slaughtered and cut up and the carcasses sold from the place where they were killed and their skins cut up and sent to the same place.

made and certainly no M.O. gained that time. Government officials of training, the department's bygone and each matter and yet has in a case may be removed to control. I have been assured that the same people will every day be made in one case two or three times a week and one that will have to do cheaply and that others than natives buy it. I would not do anything to interfere with this trade of other than to get the natives and others but something should be done to get the natives and their killing of only small cattle.

North Baines' Stone Milling and Grinding works in the district takes place. It is a common custom to do so, and one that will have to be brought under supervision or later.

Plan Development.

The development of the Nairobi area goes on and there is preparation for the building up plans. The only drawback now is the advanced price of land, even undeveloped. That course is bound to happen all over where settlement begins to find western to be no exception. They are waiting for the first western to see whether they can still hold their cards as Kapsalis under the Lord Government's scheme, or whether they will be required to make a hasty departure to Mukono and other places, or longer trip to Eldoret.

PHOTOGRAPH BY WHAT IS CALLED THE "HONEY"...

To the Editor, "E.A. Standard," Sir—

I have no authority to speak for Mr. Hume, but I am sure that he is just as anxious as most of us to have the industry in Kenya that will help "Hume" to underwrite his position.

There can be no doubt that your correspondence must have in mind that while it is easy to obtain reliable prices of wheat and other commodities in a market where there is a heavy going on all day, it is bound to be more difficult to get this information in such a small market as this, where the volume of business, when viewed from the world's point of view, is trifling.

I am afraid I cannot understand the "Honey" description as a "logical deduction." He argues that if Kenya wheat cost £100 in London at 18/6 per bag and the market of wheat into Kenya have to pay 10/6 per bag, then the farmer in Kenya ought to get 20/ per bag for his wheat.

Let me apply this "logical deduction" to his last letter, and on which there hangs the "Honey" description into Kenya, I can sell Kenya No. 1 wheat in London at £28.10.0 per ton, which we can sell the home price. There is no import duty to add on and I might just as well sell Kenya No. 1 wheat at £28.10.0 per ton plus the import duty—all this freight, etc. Obviously this is quite impossible.

The import duty chargeable on any of these articles brought into this country obviously has nothing whatever to do with the price at which these articles can be sold in the world's markets. Kenya wheat has to stand on its own feet against Canadian or Argentine wheat in the markets where these commodities are bought by

the countries requiring them. They may have higher prices for very few or no wheat, but they will be charged in the contract of production.

It would not be surprising to find "Hume" in the position of a man who has been told that the wheat in Kenya that these merchants in Europe are prepared to pay previously the same price for Kenya wheat as they pay for Argentine wheat.

The wheat in Kenya that these merchants in Europe are prepared to pay previously the same price for Kenya wheat as they pay for Argentine wheat.

At every other country, there has been a steady improvement in the industry to be established and to get to the very best by improvement in methods of production, harvesting, marketing, etc.

OUR WOMEN'S PAGE

A Letter from Paris

(By Frances Bodley)

The outer portion of the podiatric, lower, lower, and still are all used. Appropriate finishes are monogrammed, admitted leather, and lead. Appropriate finishes are monogrammed, admitted leather, and lead. Appropriate finishes are monogrammed, admitted leather, and lead.

The new and popular Italian leather, too. Modern or leather finishes are on an elastic mesh, and range from the most to the most. The combination, or the pure white finish, very appealing in a bold leather in a soft, shining finish.

Real gems of great value. How new seem, but they are actually in keeping with the fashion they adorn. Typical of these elegant, long leathers or ornaments, with matching bracelets of diamonds or diamonds and colored stones. Bracelets may be worn in more or less profusion, in taste and taste, but only in case of the obvious rule is that costly jewels must not be overabundant in magnificence by ultra-modern fashions. Their ideal background is the expressive simplicity of a one-color clothes or satin gown. Prefer all-black or grey to cream or white.

The jeweller an elaborate lady with her husband. Some of the latest in the market, the feminine touch in fashion is more and more pronounced. Daily imperia trimmings, neckties, jackets, scarves and gloves are important features of the dress shown. The designer now favors, in fact, that we cannot be too feminine, especially in the matter of evening wear. Pillbox hats, rather than wide-brimmed and adding in large bows at waist, all feet, hair, or any side, are everywhere prevalent.

Brightly printed chiffons, laces, tulle and organdies are all in fashion. Ready are they mixed with plain materials even of their own colors, though they are used in allusion with slightly stiffer materials printed in exactly the same pattern.

Even military shows a rather less intensely printed trend, and is "helped" by the texture with a wavy and or so, and a suggestion of fringe.

Navigating in handkerchiefs for sports and semi-sports use are among the attractive accessories. Larger and more to evidence, quite plain as fitted. The blouse is a very smart skirt affair, with two-over collar completed by a navy style tie.

Levonia are in coral, amber, sapphire, aquamarine, and other semi-precious stones, topped with diamonds.

SAVOURY DISHES THAT PLEASE.

(By Martha Magnus)

Here are four little recipes for savory dishes which will make the housewife famous in her own home at least.

Chesse Tomatoes: Mix together about a quarter of a pound of grated cheese, an egg, and a little pepper. Cut some pot jelly into squares, above grated cheese on each, and add a spoonful of the mixture. Turn over the sides of the pastry, pinch them down, brush the top of each turnover with beaten egg, sprinkle with fine cheese, and bake golden brown.

Roast Cheese: Grate three ounces of cheese and mix with the yolk of two eggs, four ounces of grated bread, and three ounces of butter. Beat the white well in a mortar with a little spoonful of salt. Beat some slices of bread, remove crusts, spread each slice thickly with the paste, and place in a dish cover covered with a cloth, till heated through. Remove the top dish and allow the cheese to brown slightly before serving as a hot snack.

Grated Macaroni: Break small macaroni into equal lengths and put it into plenty of boiling water to boil until quite tender, strain, leaving just a little of the water stock in it. Add a tablespoonful of every possible, a tablespoonful of flour, a tablespoonful of butter, half a tablespoonful of cheese, pepper, and a little salt, stir, and allow to boil for a few minutes. Serve very hot with tomatoes.

Savory Stewage: Skin and broil mackerel and cut into slices an eighth of an inch thick. Mix together a tablespoonful of butter (two and a little tomato sauce, season with pepper, and heat through. Have ready some finger-shaped pieces of toast, arrange slices of mackerel on each and spread the sauce over them. Put little pieces of butter here and there on each one, place under the grill for a few minutes, and serve very hot.

The most engaging of all feminine dinner-dresses is, perhaps, the one developed in New York last. A model of outstanding attractiveness has long, lightening sleeves terminating in "mittens" over the hands, delightful for emphasizing the fairness of a white skin.

put it into plenty of boiling water to boil until quite tender, strain, leaving just a little of the water stock in it. Add a tablespoonful of every possible, a tablespoonful of flour, a tablespoonful of butter, half a tablespoonful of cheese, pepper, and a little salt, stir, and allow to boil for a few minutes. Serve very hot with tomatoes.

FOR THE HOME COOK When Making Buns: Always fill the bladders of milk with the flour when you are making a batch of scones. If you put salt in the milk, it does not get distributed evenly through the dough, and you lose some of the strength of safety, salt, to give good and soft looking tines.

STEAMED PUDDING MIX.

A steamed pudding made with butter instead of milk is as delicious to eat cold as hot, and indubitably more digestible. Two ounces each of sugar and butter and four ounces of flour make a very good foundation for a pudding of this kind. A cup sugar may be used if fruit-sauce or raisins or chopped dates or other sugar is added.

To every boy making a purchase of over 10¢ value in our store during the month of April, we will give a numbered coupon.

At the month end a number corresponding to one of these coupons will be drawn at random, and to the holder of the coupon bearing the number, we will give, if a lady, an Electric 5 cell flashlight; if a gentleman, a 416 shot gun.

The lucky numbers will be published in the Weekly Standard of May 4th in our usual advertising space.
