France and Japan State Their Views.

ITALY DEMANDS PARITY.

### French Programme Favours Further Building.

A new situation has developed in the Naval Con-ence following the publication by the Japanese delega-n of a memorandum setting forth their views in the light recent discussions, and a statement by M. Tardieu, on lalf of France, outlining the French point of view.

rance claims that she is the only great power to have ed her navy below pre-war figures. Further it is that no new ships were constructed between 1914 and Her claims therefore are considered to represent ding programme rather than a scrapping programme.

The Japanese memorandum attaches great impor-ce to eight inch gun cruisers, but otherwise generally ears to be conciliatory. It does not entirely agree with American point of view, but it is believed to be capable dijustment.

The Italians have issued a statement emphasising that solute parity with France will remain a cardinal prin-ple of Italy's naval policy. It is stated that if the illians persist in this demand, following on the French tement, then they will have to double the existing illan fleet.

# Proves what it IS by what it DOES

A Motor car proves what it is by what it does. For performance is tangible, definitesomething you can easily check for yourself.

When we say the new Multi-Range Chryslers are swifter in pick-up than other cars-smoother in flight-faster in climbing hills- easier to drive — we are simply stating facts you can prove.

This new Chysler lesdership in performance is the result of such advancements in engineering as the new Chysler Multi-Range four-speed transmission and gaze shift, with a new, quite Acceleration Range that combines the pick-up of "second" with the smooth, silent flexibility of "high." Shifting gears back and forth between forward speeds can be done at any car speed without clashing. Another fundamental is Down-Draft carburetion, which introduces the most advanced fuelizing practice.

In the midst of all today's claims and counterclaims, Chrysler suggests a de that you may learn for yourself why:—
