THE SECOND TEST MATCH AT LORDS.

England Fighting A Heavy Uphill Battle.

MORE RECORDS MADE.

Home Country's First Two Wickets Lost By Risky Play.

It seems false that the present series of Test matches should be fought in a setting of memorials happening. From the very beginning of the match to the end, the two sides have been playing in a way that has not been seen for many years.

Monday was a fateful day for England. On Saturday the weakness of her bowling was simply demonstrated by the facts that in which the tourists treated it. The third day found the bowling not on one white ball, while a tendency to take risks on the part of the English opened up a pair save two valuable wickets lost in what must be a fighting innings so far as England is concerned.

So batsmen deserve victory, or has worked harder for it than the Australian batsmen. Both batsmen and bowling they have been superior to the Home team. There has been a marked disparity in the two teams. The English bowling has been weak; Chapman, for once, has not been the inspired leader, while batting has been brilliant. The batsmen of Australia, having their backs to the wall, as seemed likely to be the case at the close of the first innings the positions are reversed, and today we see England fighting an uphill battle.

Bradman's Brilliant Batting.

London, June 30. In Chapman's record of an unbeaten innings in Tests to go for his best, and it is interesting to return his admiration in the "Three Testings" by winning the second match of the series, on Wednesday it is one of the greatest are prompted by an incident that took place at Lord's. After recovering from a heavy defeat in the first Test, England went on to beat itself in a way which is being regarded as a fairly sound position. How stable was the batting in the first Test was shown as though these five wickets had been taken by England. Both batsmen and bowling they have been superior to the Home team. There has been a marked disparity in the two teams. The English bowling has been weak; Chapman, for once, has not been the inspired leader, while batting has been brilliant. The batsmen of Australia, having their backs to the wall, as seemed likely to be the case at the close of the first innings the positions are reversed, and today we see England fighting an uphill battle.

Tourists' Master.

On the other hand, all credit goes to the batsmen for their wonderful play. Both in the first and second Tests, England has been superior to the Home team. There has been a marked disparity in the two teams. The English bowling has been weak; Chapman, for once, has not been the inspired leader, while batting has been brilliant. The batsmen of Australia, having their backs to the wall, as seemed likely to be the case at the close of the first innings the positions are reversed, and today we see England fighting an uphill battle.

A Reputation at Bay.

An aspect of the Australian tour is the fact that the batsmen have been playing in a way that has not been seen for many years. The batsmen of Australia, having their backs to the wall, as seemed likely to be the case at the close of the first innings the positions are reversed, and today we see England fighting an uphill battle.

When he is inspired. He is always keen to do his best for his country. He is always keen to do his best for his country. He is always keen to do his best for his country.

QUESTION OF THE COMMONS.

THE CONVENTION OF ASSOCIATIONS.

Meeting To-day to Deal with Closer Union.

EXECUTIVE REJECTION MOTION.

N.E. Sir Edward Grigg Expected to Open the Session.

The Kenya Convention of Associations which opens its session in Nairobi to-day will devote its attention primarily to the closer union of the two territories as submitted by the Executive proposal.

Below will be found reports from several districts including the widespread agreement in this course.

The Convention will, however, discuss many other subjects and the agenda of resolutions is a long one.

THE EXECUTIVE THE GOVERNOR IS EXPECTED TO OPEN THE SESSION.

A VARIED AGENDA.

The Kenya Convention of Associations, which opens its session in Nairobi to-day, will devote its attention primarily to the closer union of the two territories as submitted by the Executive proposal.

The Executive proposal for closer union of the two territories is the main item on the agenda of the Convention.

The Convention will also discuss the proposed changes in the constitution of the Legislative Council.

Other items on the agenda include the proposed changes in the constitution of the Executive Council.

The Convention will also discuss the proposed changes in the constitution of the Executive Council.

'A NOTE ON CREAM PRODUCTION.

Livestock Officer's Useful Paper.

CLEARLY DEFINITIVE.

Mr. W. D. D. Jordan, Livestock Officer here, has under his hand many examples some extremely valuable information on the subject. He intends to produce a pamphlet dealing with the early dates, and daily farmers and crop-growers would be well advised to obtain a copy. A printed point in his note is the first one to be regarded as obtaining the most profitable result is responsible for the best quality of cream.

He explains that the Note in full. To produce first class butter a creamy milk must possess first class cream. It is idle for the farmer to blame his country for paying a low price for butter if he is supplying the market with inferior material from which only a second class of butter product can be produced.

- Points to consider:
- The whole milking operation should be kept as close as possible, avoid dusty and dirty surroundings, and keep the udder and teats clean.
 - Take the milk away as fast as possible, and get it into the separator as soon as possible.
 - Use the cream separator after separating.
 - Do not mix warm cream with cold cream.
 - Do not mix cream at least three times a day to avoid the development of undesirable bacteria.
 - Keep the cream cans cool with sprays, not with night stables, etc.
 - Keep the cream as long as possible, on a clean tray, by night spray from objectionable bacteria such as those which are the usual contents of a farm larder.

All strength and the separation of milk for best dairy production. Do not use any soap or disinfectant in washing udders as more effective means are available. Thoroughly clean the udder and teats before milking.

Keep the separator in good working order. Assemble the separator unit ready to use it. Do not expect to keep the separator dry and out of the dust in a well-stored place.

Do not try to produce a milk heavier than cream. A first-class product yields 25.00 per cent butter fat will be found necessary. Try and control the cream from the cow's eyes to teats, and deliver to the separator as frequently as practicable. Keep the cream separator clean and keep on the cream should be delivered to the separator.

First grade cream should not have an acidity test of more than 25. Cream cream kept at 70 degrees Fahrenheit will develop 20 acidity in 10 days. Cream kept at 60 degrees Fahrenheit will develop 15 acidity in 10 days. Cream kept at 50 degrees Fahrenheit will develop 10 acidity in 10 days. Cream kept at 40 degrees Fahrenheit will develop 5 acidity in 10 days. Cream kept at 30 degrees Fahrenheit will develop 2 acidity in 10 days.

How Rats Sting Plague!

AN EXPERT ADVICE.

It is a common belief that rats are the carriers of plague. This is not true. Rats are not the carriers of plague. The plague is carried by fleas which infest rats. Rats are only the carriers of the fleas which carry the plague.

The fleas are the carriers by which plague is conveyed from rat to rat or from rat to man. Should a human being be bitten with a flea which has sucked the blood of a rat, and after a period of incubation, the unfortunate being will be taken ill, and in about 10 days will die of plague. The incubation period of the plague is 10 days.

The best means of preventing plague is to keep rats away from human beings. Rats should be kept in cages and not allowed to roam about. Rats should be kept in cages and not allowed to roam about. Rats should be kept in cages and not allowed to roam about.

Dr. Williams said that he had been told that the best way of having a good crop of wheat was to use the best quality of seed. He said that the best quality of seed was the best quality of seed.

Major Gilling said that he had been told that the best way of having a good crop of wheat was to use the best quality of seed. He said that the best quality of seed was the best quality of seed.

At a meeting of a certain rural district council a discussion of farmers failed to be successful. They failed to agree on a plan of action to be taken. They failed to agree on a plan of action to be taken.

What sort of a chance is there of a young farmer, beginning at the bottom, being able to get on his feet? "Not much," said the old farmer, "but if you are willing to work hard, you may succeed."

On the hottest day an Amstel is cool!

AMSTEL BEER

SOLD EVERYWHERE.

He explains that the Note in full. To produce first class butter a creamy milk must possess first class cream. It is idle for the farmer to blame his country for paying a low price for butter if he is supplying the market with inferior material from which only a second class of butter product can be produced.

It is a common belief that rats are the carriers of plague. This is not true. Rats are not the carriers of plague. The plague is carried by fleas which infest rats. Rats are only the carriers of the fleas which carry the plague.

Do You Want Your Car To Drive.

Many interesting facts concerning the New Oakland Eight can be learned from its reading alone. It is the beauty of line, its marvellous interior can be appreciated as you view it on display. But you will never know what this 85-horsepower, eight-cylinder car has in store until you have actually ridden in it and driven it yourself.

through traffic, speeding over an open road, or climbing some steep, forbidding grade.

Remember this fact: Oakland's eight-cylinder engine develops the highest power to be found in any car of Oakland's weight, only racing cars excepted. Wouldn't you like to try a car so generously high powered!

Arrange now for a trial run on which you can put the New Oakland Eight through all its paces. We believe you will enjoy this experience more than you can guess.

WEATHER REPORT.

MEMORABLE SECOND TEST AT LORD'S.
Australians' Fine Win by Seven Wickets.

England's Game Display on Fourth Day.
By seven wickets England went to Australia in the second Test match at Lord's on Tuesday. For four days the two countries had been engaged in a memorable struggle, in which records after records were broken by the board, and set until a late hour on the last day of the game did the tourists earn a merited...

Chapman made amends for his failures in the match by a brilliant century. He alone of the Home country played throughout with any degree of confidence. It was a captain's innings, one which would have had enough to have carried the team to a victory had he not been hit in the middle of the innings...

KENT MAN MAKES AMENDS.
The English players opened up hill battles and died gamely. When all seemed lost they struggled on. Scores of the most intense enthusiasm marked the closing phases. Four straight brought victory, and the crowd cheered to the echo when the victorious Australians made their way to the pavilion after the winning ball had been made.

THE English players fought bravely but they were out of their depth in the last test, and they had to be helped to make the most of their own resources. It was a wonderful day for the English, and they were well served by their own batsmen and bowlers...

It was a magnificent game. On the whole, the English were well served by their own batsmen and bowlers. They were well served by their own batsmen and bowlers. They were well served by their own batsmen and bowlers...

WIRELESS IN EAST AFRICA.

RECEPTION RESULTS ON SHORT WAVES.

The "E. A. Standard" has arranged for the regular publication of the reception results on short waves.

It is evident, if one is to take the number of letters that come forward on wireless subjects, that wireless is taking an increased lead on the public of this colony. Letters on wireless subjects, have not been numerous, from the beginning, but since the introduction of the short wave sets, the wireless hobby has become a serious one of the hobby. It is presumably the case of the reader of all our papers, that being satisfied with driving his own car he must know how it would be able to do anything, or anything at all.

It has been suggested that these articles would reach a greater number of readers if a small report was given each week on wireless reception results on the long frequency (short wave) stations. These would, of course, only include broadcasting stations—some stations presumably having radio receivers in the average reader's home. In this set, through the courtesy of Messrs. Philips Radio the writer has had the opportunity of being supplied with one of their model 2000 receivers. Using the same aerial and wiring it will be possible to use the writer's own receiver as a standard, but up to the present, little has been done in this matter, and the writer is very anxious to see the results of other stations.

It is interesting to note that the N.Y. broadcasting bands have brought in a few stations that were transmitted, but unfortunately the one station WJLA (formerly) changed and is now on a standard, but up to the present, little has been done in this matter, and the writer is very anxious to see the results of other stations.

SAVES YOUR CLOTHES
SAVES HARD RUBBING

The constant expense of buying clothes makes it all the more necessary that they should be carefully washed. Don't rub the life out of your clothes with common laundry soap. Use Sunlight Soap instead. With Sunlight you need no hot suds, little rubbing, an empty dish, and a washing tub. The pure, rich Sunlight suds soak out every trace of dirt, every spot and stain, and make your clothes clean and soft to touch. Sunlight Soap has the largest sale in the world. Millions of women use it in preference to any other soap. Every table carries the Sunlight £1000 guarantee of purity.

We Want You To Drive.

Many interesting facts concerning the New Oakland Eight can be learned from reading about it. It is heavy of line, its construction of lighter cast has approximately as you view it on display. But you will never know what this 88-horsepower, eight-cylinder car has to offer until you have actually ridden in it, and driven it yourself.

through traffic, speeding over an open road, or climbing some steep, forbidding grade.

Remember this fact: Oakland's eight-cylinder engine develops the highest power to be found in any car of Oakland's weight, only racing cars excepted. Wouldn't you like to try a car so generously high powered?

Arrange now for a trial run on which you can put the New Oakland Eight through all its paces. We believe you will enjoy this experience more than you can guess.

After a ride—
You'll want a SIX!

Chevrolet's 6-cylinder performance is made smoother and more comfortable by Hydraulic Shock Absorbers and long-throw single springs.

There's a world of difference between the performance and comfort of a four and a six. Being you spend your money—take a ride to see. You'll want a six. In the Chevrolet Six, you get the advantage of higher priced cars at no more cost to buy and maintain than a four. From the moment the car begins to roll, you are spending less money. After 100 or 200 miles an hour—your 6 will be equipped with the greatest flow of power from its powerful 45-horsepower valve-in-head motor, and with the supreme torque provided by its smooth 144-tooth torque and motor chains. And when you compare upkeep expense, you'll be surprised to learn that Chevrolet has installed its reputation for economical maintenance. May we take you for a low demonstration ride to-day?

THE LONDON NAVAL TREATY.
 Outspoken Criticism by Earl Beatty.

A DEPLOABLE SILENCE
 Prevailed at Sea's Billings of the Past.

(By wireless.)
 July 1, 1936.

In the House of Lords Earl Beatty found the London Naval Treaty resulting from the recent Naval Conference which was the only treaty in which the great powers of the world, with the exception of the United States, had agreed to limit their armaments, and he expressed his indignation at the silence which prevailed on this subject in the House of Commons.

As a result of the Treaty the United Kingdom will save £10,000,000 annually, by 10 per cent, or 45,000,000 francs, and France will save £10,000,000 annually in any way reduced. France had £10,000,000 more than the United Kingdom, and the United Kingdom had £10,000,000 more than the United States.

Had Beatty criticized the agreement "silently" our warships would have a life of 20 years, whereas foreign ships would have a life of sixteen years.

Type Protection.
 Referring to the Singapore issue, Earl Beatty said that he was not a member of the House of Commons, but he had read the Bill which was introduced in the House of Commons on July 1, 1936.

By 1938, France would possess 24 submarines and the United Kingdom would possess 10,000 to 20,000 tons with 47 in in length. In Germany, we should have 10,000 tons with 47 in in length. In Germany, we should have 10,000 tons with 47 in in length.

Had Beatty criticized the agreement "silently" our warships would have a life of 20 years, whereas foreign ships would have a life of sixteen years.

CORRESPONDENCE

To the Editor: I was much surprised to find the letters appearing in the Standard and address the writer as a partner of gold fields. I am a resident of Nairobi and have no connection with any of the mines mentioned.

THE BATHYROOMS.

To the Editor: "E.A. Standard." Sir—In connection with the new office arrangements at the Hotel Kenya it is a great waste of valuable space to have a bath room at a central location for over 200 employees. It is better to have a central wash room for all the employees on the Government buildings on the Sixth Avenue island connected by a tramway track. (1) A monument to the power that has 20 structures passing through it must know exactly where they were.

Yours etc,
LOUGH CORRIGAN,
Nairobi, July 1, 1935.

PHILIPS CASAPHONE

... able to play your gramophone records with that lustrous and volume undebatable by any other means. The huge success of this remarkably compact model is fitting tribute to its outstanding performance.

The "after feeling" is the test of a Shaving Cream

How is your face after shaving? Is it ready to smile or has it that uncomfortable feeling left behind?

Gillette Shaving Cream or Stick leaves you with that smooth, cool, refreshing, comfortable after-shave feeling. The reason is that the cream has soothed every pore and left your skin in the best of health. That is in Gillette's after-shave cream.

Jumper Suits, Cardigans, Jumpers, etc., in Most Charming Colours.

BON MARCHÉ

Government Road - NAIROBI

TO THE EDITOR: "E.A. Standard." Sir—In connection with the new office arrangements at the Hotel Kenya it is a great waste of valuable space to have a bath room at a central location for over 200 employees. It is better to have a central wash room for all the employees on the Government buildings on the Sixth Avenue island connected by a tramway track. (1) A monument to the power that has 20 structures passing through it must know exactly where they were.

Yours etc,
LOUGH CORRIGAN,
Nairobi, July 1, 1935.
