Britain's Responsibilities Being Observed.

THE SITUATION IN

PALESTINE.

INV WINELESS. Rugby, May 15.

At the meeting of the Council of the League of Nations this macraing, Mr. Henderson, the British Powigs Secretary, made a statement regarding the general situation in Palestine. He said the Council was away He said the Council was aware that the Commission of Enquiry into the disturbances of last August in Palestine had presented its report. That report would form the subject of a discussion by the Permanent Mandates Commission. A full statement would then be missio by an accredited the commission of the council of the cou

then be made by an accredited British representative but he wish-ed to be permitted to anticipate that the statement in certain res-pects would be of special interest to members of the council. On matters relating to the re-port, be would refer firstly to the primary duty of the Mandatory, as of any Government, namely, the preservation of order. The Bri-tish Government had increased the British military forces in Pales-tine. They had considered with their cerebility.

The Police Force.

Dowbiggin of Ceylon, was organisation of the police. His full report had not yet been recaived but certain interim recom-mendations for better protection of the Jewish Colonies had been of the Jewah Colonies had been adopted and were being put into force. The British section of the Police had been increased by 400 men and a further increase of 79 men was now being made. The Commission in their report bad laid special emphasis on the problem relating to land and immi-gration and the British Govern-ment had selected Sir John Hope

Simpson to proceed forthwith to Palestine in order to confer with the High Commissioner and report on land settlement, immigration and development. Mr. Henderson then referred to the presence in England of an Arab delegation from Palestine with whom a discussion regarding with whom a discussion regarding the future policy in this country, had taken place. It was enough to say of these discussions that they had placed the British Government in full possession of the views of the leading Arabe re-

the entertained.

Mr. Handerson added be proposed to change of the proposed to propo

A Wheat Pool. It was forcibly emphasised, by

several speakers, that the present trend of low, and still lower prices for wheat, is fast ruining the Kenya wheat producer, and after considerable discussion of various alternatives it was decided that the only way to save the Kenya wheat grower is to follow the example of other countries to-day and demand that Government introduce legislation, immediately troduce legislation, immediately, to institute a compulsory wheat pool for the whole of Kenya and then to fix the minimum price at which wheat shall be bought and sold locally—a price which shall show a profit to the producer.

minimize their wheat prevent, in each way of market, and unless the way of market, and the way of the market way o

man stated that he personally wished to discuss that maker as he was of the opinion that the general notice of the tenders for graving rights in Kilelashva, published in the "Gazette" of October 15, 1929, stated that tenders from registered dairymen that the was a minerorem. be entertained. He pointed out that this was a misnomer, as the Act—Milk and Dairy Ordinance, 1925—which provided for register-ed dairymen, was not promol-gated for application within the Nairobi Municipality until January

King of the Highway

In this great automotive age the success of International Trucks stands like a beacon on the horizon. Coming into prominence like a thoroughbred destined for victory, International Harvester has scored a triumph in truck engineering and in popular approval throughout the world. The basic reason is twofold: International trucks are soundly built on twenty-five years' experience in automotive manufacture - and International performance is safeguarded by a Company-owned truck service organization without a peer in the industry.

International Trucks include the 1-ton; the 12 ton Six-Speed Special; Speed Trucks, 12 and 2-ton; and Heavy-Duty Trucks to 5-ton. Catalogues on request.

perimentation and tangible results bearing the impress of scientific authority can reasonably be ax-

ently a convenient excuse for an ission to visit The East African Agricultural Research Station at Aman: The facts are these Aman lies from Muhesa in a parth westerly direction a distance westerly direction a distance of some wenty miles by road. As the crow files this distance would be considerably reduced as the station itself is sited near the top of a spur on the Eastern Usani-baras and is nearly 3,000 feet above Muhesa, a station on the Tanga line connected by rail and road with the Port and distant

about twenty-twe-unites.

The main road from Tanga is like usted all dispiret speak in Tanganyika, hazardous in wet weather. But even here there can be engageration for with the scaep-of boing easily and cheeply remedied, the road is well constructed and capable of maintaining traffic even during the rains. The road, however, from Muheas to Amazi has in the main been reconstructed and maintained by the Research Station and is one of the

best constructed roads in the ter-ritory. Muhesa is situated in the hot and humid coastal belt and it the each humid control bein and at some of the control was a control to the control was a control with a control was a control was a control was a control was a constitued the control was a control was a constitued the control was a constitued the control was a constitued the control was a contr

There are few more delightful spots to be found in Tanganyika for the purposes of congenial living conditions; the bracing upland air is invigorating and healthful. The Station itself consists of a series of central buildings housing labora-tories, libraries, and offices, which dotted here and there at sufficient Research Station, that blend with the forest scenery. The natural beauty of the indi-

genous forest has been enhanced by the large number of beautiful by the large number or beautiful exotic trees that stand to-day as a reminder of the previous German occupation and experimentors who have introduced varieties of trees and shrubs. Indeed the trees and shrubs. Indeed the kind in Africa. He would indeed to a hard man to please who could not find at Amani an atmosphere conductive to close study which research work of all kinds

objectives that Amani was intend-ed to strive for were indicated and so in street for were inclusional and, a shience in the Mineys test was emphasined; that its resident that was contained, that its resident that was contained and the first test of the first t

always centrod round the problems of soil deterioration and economic exploitation but if wide progress is to be made, the aim of the research worker is to obtain comremarch worker is to obtain com-mand over all soil problems pre-sent and future and to attain this-section of the control of the collection of the collection of the collection of the collection of the ment. Once this position, of a function of the collection of the problems can be more authoriti-tally a geomet survey of the East problems of the collection of the collection of the collection of the only a geomet survey of the East with the necessary recommissative and frevailing must be made. The other problems of oresign-

EAST AFRICAN

The East African novel has become a definitely established addition to the booksheives.

In the following reviews two widely different stories are solected—Margaret Peterson's delightful adven-ture story for boys and a settler's convention of the possible development of Tanganyika politics in 1933.

There is also noticed a "thriller" by a new author-

THE WORK OF THE CHURCH

IN KENYA

A Great Need For More Clergymen.

F- STANDARD - CORRESPONDENT.

THE MARKAN CONTROVERS OF THE BIRD REVENUE AND THE B

faced and dealt with Psiliticians had their problems and so had the course. They had a particular type of problem with which to deal, for African and European work was going on side by side. He stressed the need for realising that all were part of one whole and all minst work together and

The Bashey then referred at some length to the rebuilding of Nursh Catheil. The first stage finished in August served back there. May questions had been asked as to whether the stage of t

In connection with mission work he mentioned one important piece of work which had come to the European community. At the last Synod meeting Mr. Asquith, one of the European chaplains, backed by a number of European should be supported in the support of the sup done by the Mission for dealing with Africans who were on out-tying farms all over the country. That was part of the mission work in which, through lack of men and anna, they had failed badly. The Borane Catholies had been much how successful in sending out tancher to these outlying dis-tricts, and those same people had begged for the Mission to send larged for the Mission to send

stagged for the Masion to send us teacher to their farms. It had now been decided to built a Mission house at Nakuru, and Mr. Pitwole was getting to work amongsit has been received a surface of the sur School Work.

piece of work but it was progressing showly. The capital secosary was 640,000 in order to make the school efficient and to equip it thoroughly. For this reason he asked arrores who was desired of helping this cases, to take some debearance and 6 per centimered, by which means he hoped to raise \$20,000.

The Bishop was particularly pleased that Mr. Low was going back again, to continue the splendid work in which he was to successful workers.

Shortage of Clergy Bhortage of Ulergy.

The Bishop then turned to the Kenya side of the Diocess work, and referred to the shortage of clergy and to the Divinity School at Limuru. He said there was a

They had made another imp

ant move in the Diocese, the Bishop said, and this, the sudience would be pleased to hear, did not involve them in any money. This involve them in any money. This was the new boys' school at Mombasa upon which they were spending about £12,000 but which it was hoped would pay for itse'd. The school was it be in the less street in Mombasa, they bound to the unstructiveness of the exist-ing buildings. The only financial help they had received was a lean from the Society for the Prosagation of the Gospel. The Indire' Mission House was also to be moved from its old site to the new one on the other side of the Island.

Native "Unrest."

The Bishop then turned to another subject. He said that there had been unrest in Kenya recently, especially in Kikuyu. They had hard about the mutilation of had he ard about the mutilation of women and girls. This was an extremely difficult problem to deal with. They were in close col-laboration with the Governor and the Chief Native Commissioner, and they had had a long talk as to what should be done. The Kenya Government was quite pre-

soil. It was strongheining the lowers in the contention and in which the preferred of list the Chimb van sheining performed. But the Chimb van sheining performed. First the Chimb van sheining performed. First the Chimb van sheining performed. First the Chimb van sheining van sh

Kenya's Difficulties.

His Lendblig then saked taken to pray that these on leave might be guided to give a fair impression of Kenya. If was very difficult to de their he missions were attient were certainly not always to treated, and now was the Orevenment. Those on leave had to try to set both the traditions truck in view of the years to come. The Charleman then thanked the Bishop of Mombassa the his address and said that they had based for the present the set of the present the present the set of the present th Kenya's Difficulties

dress and said that they had heard enough to make them realise the difficulties to be faced in Kenya and to make them pray intelligent-ly. He felt that this was just a beginning of things in the Renya Church Aid Association.

Church Ald Association.

The Secretary then mentioned that there was a Missicary Sale in the Autumn and urged the addingtone to do what sheep for the country and recorded measure to the country and recorded measure.

The meeting then closed with a lymn and a proyer, the Blabop of Mombata procounting the Blassing. a hymn shape procouncing the Blessing. fymg, it is said, that it is larger than the leopard and that it is, in fact, seither leopard nor hyanna (Note: Dr. Church, in his article

RECENT KENYA MURDERS.

Isolated Cases of Crime.

STANDARD . CORRESPONDENT. London, May 22.
In the House of Commons to-day in reply to a question by Brig-General H. Cilithen Brown. (Cons., Newbury). Dr. Drummond Shiels, Under-Secretary for the Colomies said the Secretary of the Colomies said the Secretary of State believed that the second neutral property of the Colomies and the Secretary of the Colomies of t London, May 22. a settler in Kenya were isolated and exceptional cases and that there was no ground for thinking that the Kenya Government consider it necessary to take special

steps.

Replying to a supplementary question, he said that he knew that there was some apprehension among settlers, but the latest information was that the iatest information was that the reserves were quiet, and there was no sign of anything to justify this apprehension.

WEDNESDAY, MAY

If soil is damp and undrained, it should be drained. If it is on the first and the result of the surface in the procedure of trunching, as on this similar of soil, deep looks are only basing of much and water during the present weather. The objects of the result of th presence of iron or humus. latter renders soil greyish dry and blackish when wet-red soil is due to exide of iron ing the present weather. Ine co-ject is not to bring the sour soil to the surface but to increase the depth of porons earth, and to make an opening for the surface water to drain away, below from the roots of the crops: red soil is due to oxide of iron, and blue tints in beavy soil to irot sulphide, and red and blue to the amount of humus contained in the

the roots of the crops:

If the heavy soil is naturally ging high, no drains will be need, d, but deep tenebring will supply the deficiency if carried out to shere; the ground begins to decline. When the earth becomes more frible and workable, and the water smartniss quickly, its surface by comes warm and more or engently the well-being of young plants, d crops in general,

and crops in general.

The next step is to improve the sature or texture of the soil by seavily measuring and lightening it by applications of farres of stable manue, and by applying liberal treasings of burns garden refuse grit before turning over previous a grit before turning over previous

will be the result On neavy solls, fresh lime will disintegrate the soil making is pliable and less adhesive, promote nitrification and free the potash, improving year by year until is in the perfect soil. Cantinual and deep working is the main factors.

Loam of course is the best of lipoils. It may vary, vis., heavy andy, or clayery or loam full of there and hums; all these are very well adapted for growing al-nost anything. The best of all oil in fingland, used by all the seat growers of pot plants, comes-tions; chrysanthemums, and roases the London market, comes-rom the downs at Banatead which or fix wellowish thaki colours and Hyou have finished planning, keep a good look out for deatrry-ing insects and grubs.
