POWER ADJUDICATE FROM NAIROBI

Interest in Scheme in Southern Highlands.

A National Survey.

The following article on power adjudication for use in the Southern Highlands has been very much in the news in recent months. The subject is one which is naturally of interest to the farmers of the area. It is an additional land matter for a special class of the apparently complex subject, and it would be well to refer to this matter in the columns of the Standard and give a short summary of the same carried out in the Southern Highlands by the Government.

A Government survey was appointed to conduct this work. A Commission was set up to advise the Government on the subject. To submit a fair plan was the first step. It was necessary for the Commission to find out what the conditions were in the Southern Highlands. It was necessary for the Commission to find out what the conditions were in the Southern Highlands. WAGES PROBLEM IN TRANS NIOIA

Discussions at Meeting of Local Members of K.F.A.

THE NATIVE GROWER.

Investigating the Production of Power Alcohol.

["STANDARD" CORRESPONDENT]

The General Manager and Directors of the Kenya Farmers' Association held a meeting for members at Kisumu on November 10th. This was specially arranged for the benefit of the members of the Plateau and Trans Nioia at opportunity of discussing questions connected with the Development in view of the fact that comparatively few of the members up here could attend the time and space difficulties in attending the annual meeting at Nairobi.

The chairman, Mr. Mackay, in opening the meeting very briefly referred to the passing on of Kenya's most outstanding agricultural leader, A. G. D. de la Motte, a vice president of the Association, to a condition of relative weakness, necessitating standing for some months in hospital.

A short review of the Association's work recently published, including lists and statements of accounts for the year was presented and Mr. de la Motte's work was highly commended and warmly appreciated. Standing for some months in hospital, he was the mainstay of the Association.

With growing attention at the coast over the subject of striking severe penalties for those who export goods to the interior, it was pointed out that the present improved conditions on the coast were being maintained and gradually improved. It was in this matter the Director's providing for the establishment of a stop or 'tag' and the utmost vigilance was to be exercised to ensure that goods forwarded to the coast were not tampered with, and the issue of the 'tag' was to be strictly enforced, and the issue of the 'tag' was to be strictly enforced, and the issue of the 'tag' was to be strictly enforced.

"ON THEIR DAY"

The Association has passed through a very trying time, and it is a common mistake to suppose that a little whisky is a suitable drink only at this or that time of day. Of course there are occasions that call for whisky and nothing else. And if you are weak, and as in the White Horse, you will find some corners of the day when this whisky is especially appropriate, in an appetizer or as a liqueur, or when the day's work is done.

THE DANGER OF INDIGESTION

Very few people realize that danger lurks behind this seemingly innocent dinner after supper. Nevertheless it is true. For indigestion does not only cause discomfort and pain, but it may also cause serious illness. It is a common mistake to suppose that a little whisky is a suitable drink only at this or that time of day.

is quite clear that a proper decision must be taken between "entertainment" and "recreation" and it is the intention of Government to review the application of taxation to both of these categories in which the Government may include individually or a group of persons in the Bill will be a more reasonable one. It is hoped that when the Bill comes before the House it will be placed on the taxation side of a proper budget. It is also intended that the Government should be given the expenditure of money on the Bill in an organized and systematic manner.
