**CREDIT ASSOCIATIONS OF DENMARK.**

**Basis Used for the Kenya Proposals.**

**LENDING TERMS.**

The following statement is the Credit Association of Denmark in the first Appendix attached to the Memorandum submitted by the Board of Agriculture to the Kenya Government and published recently in the "Standard."

Co-operation in Denmark is very generally regarded as the basis of the financial and the basis of the financial structure in the Credit Association (Credit Forening) of Denmark. Financial institutions lending money for the first time in Denmark. These Credit Associations are now being formed in Denmark, and it is worthy of comment that no member of the Association has been formed in any of the colonies.

A Credit Association is a voluntary organization of owners of real estate desiring to raise money on the security of their property, and their buildings for the purpose of giving security to the borrower of the money, together with the interest thereon, and the interest on the other members of the Association. The Association is formed by the whole of the loan made to it.

The interest is guaranteed by the financial arrangement. Funds are guaranteed by a law authorized by the Government. The interest is paid by the borrower.

**Method of Raising.**

The Association is formed by the whole of the loan made to it. A land owner desiring to become a member of the Association in order to borrow money, applies to the Association for a loan. The Association has its office in the town where the land is situated, and agrees to advance him a certain sum of money on the security of his land. The landowner then mortgages his land to the Association, and the Association issues a certificate of mortgage to the borrower. The Association then issues a certificate of mortgage to the borrower. The Association then issues a certificate of mortgage to the borrower.

**VOLCANIC ISLAND ON RUDOF.**

Lake Connexions with the Lower Nile in Pluvial Period.

(Special to the "East African Standard" by the R. S. Workington Editor of the Cambridge Expedition to the East African Lakes.)

The expedition has now been at work in the country for some two months. Lake Rudolph has been treated as a base, and the lake has been explored in all directions. The results of the work are as follows:

The three lakes form the largest water bodies in the East African Lakes region. Lake Rudolph is the largest, and is situated in the north-west. Lake George is the second largest, and is situated in the north-east. Lake Rudolf is the smallest, and is situated in the south-east.

The Cambridge Expedition to the East African Lakes is a joint venture of the British and American Governments. The expedition is led by the British naturalist, Mr. Workington, and the American geologist, Mr. H. H. Henshaw.

The expedition has been successful in its preliminary work. It has discovered the existence of a large lake system in the East African Lakes region, and has established the fact that the lakes are connected with the Nile in the pluvial period.

The Cambridge Expedition to the East African Lakes is a joint venture of the British and American Governments. The expedition is led by the British naturalist, Mr. Workington, and the American geologist, Mr. H. H. Henshaw.

KENNEL NOTES

Margaret Collyer

Miss Collyer, Oh! to whom all correspondence in connection with "Kennel Notes" should be addressed, then we hold her responsible for the accuracy of the notes for which she is, in this case, made, based on information supplied by her correspondents.

There has been some grieving for a spring for which the Annual Order had been dropped off of London and that is the reason why the first three arrivals there were the first three from the West. The British show were held on the 17th and 18th of the month and the first three were the first three to be shown in the West. The first three were the first three to be shown in the West. The first three were the first three to be shown in the West.

LOCUST SWARMS IN KENYA. Another Invasion Reported.

Locusts are again reported to be swarming over the country, and several swarms have been seen in various parts of the country. The Government is taking steps to protect the crops and the people from the damage caused by these insects.

The following official notice is published in the Kenya Gazette of the 21st January 1921. In the early part of January several swarms of locusts were seen in the districts of Mandera, Wajir, and Lamu. The Government is taking steps to protect the crops and the people from the damage caused by these insects.

Further information as to the movements of these swarms is required. Any case of locusts seen in any part of the country should be reported immediately to the Agricultural Department. The Government is taking steps to protect the crops and the people from the damage caused by these insects.

It is possible that some of the swarms seen in the early part of the month were the same as those seen in the early part of the month. The Government is taking steps to protect the crops and the people from the damage caused by these insects.

FLOWERS AT THE SHOW

The flower of the agricultural show at the Horticultural Society of Kenya held in the Exhibition grounds at Nairobi was the most successful yet. The show was organized by the Horticultural Society and the Kenya Horticultural Society. It was held at the Exhibition grounds at Nairobi on the 29th and 30th of January. The show was a great success and attracted a large number of visitors. The Horticultural Society of Kenya is a body which was formed in 1922. It has since that time been active in promoting horticulture in Kenya. The show was a great success and attracted a large number of visitors. The Horticultural Society of Kenya is a body which was formed in 1922. It has since that time been active in promoting horticulture in Kenya.

The show was not an good success. The Horticultural Society of Kenya is a body which was formed in 1922. It has since that time been active in promoting horticulture in Kenya. The show was a great success and attracted a large number of visitors. The Horticultural Society of Kenya is a body which was formed in 1922. DOES YOUR CAR "PINK"? Doubtless it does on certain occasions. It's not your car, it's the fuel that causes the "pink." Present day design, with its tendency towards higher compression engines, necessitates the manufacture of improved fuel to take care of this condition. This has been accomplished by The Texas Company in that TEXACO ANTI-KNOCK PETROL is positively knockless—all of it is power! Therefore stop-to-day at the Silver Pump bearing the sign of the Red Star with the Green T. A trial will convince you—it costs no more. TEXACO ANTI-KNOCK PETROL. The Texas Company (South Africa) Limited. Texaco Petroleum Products.

HELP FOR TANGANYIKA SIAL INDUSTRY.

Recommendations by Sir Donald Cameron.

A DIFFICULT PROBLEM.

# THE UGANDA OXFON CUP.

Games Working Night and Day.

(Continued from page 1.)

As regards the Uganda side, it is difficult to say what the crop will realize but we certainly were more sure up to the end of the planting. We have a pretty hefty store about now a week but that is sufficient for the needs of the season. However, we must not allow the store to get too low. It is difficult to say what the crop will realize but we certainly were more sure up to the end of the planting. # GOOD EQUIPMENT MAKES

## A GOOD FARMER BETTER

For Hard Plowing

**McCormick-Deering**  
No. 33 TRACTOR DISC PLOW.

If you study this plow you'll see why it does its job so smoothly—regardless of the soil it's up against. Its weight is distributed so that when it cuts into the soil it uses every pound to advantage. It has roller bearings which assure friction-free operation and minimum wear. Improved hitch, power lift, 56 in. inside-burled disks, these are features of this remarkable plow which help it do your plowing just the way you want it done.

McCormick-Deering Disc Plow No. 33 is available in 3, 4, and 5-furrow sizes.

Save Time & Labour

**McCormick-Deering**  
6 & 9 ft. HARROW-PLOW.

The Harrow-Plow does a real job of wheat-ground preparation. Get right in after the grain is taken out and harrow-plow your ground. In addition to the time you will save you will find that harrow-plowed ground holds moisture and that it leaves the stubble part out, which is a big help in holding the soil against blowing. Thousands of progressive farmers are adding the Harrow-Plow to their necessary equipment. It's a real cost-reducer, and a real crop-maker.
