Such a clean, fresh, lovable fragrance... No wonder dainty women all over the world regard it as an indispensable item of their toilet.

No other Lavender can equal the whif-ful charm—the quiet unassuming beauty of the Yardley Lavender; and who luxuriously refreshing is a little on the forehead when hot and tired.

The Yutley Lavender Toilet Powder is exquisite for Nursery, Toilet and General use; it is so cooling—and soothing.

PROBLEMS OF THE DAIRY INDUSTRY.

Combined Experience of 40 Years in the Colony.

"INTENSIVE" vs. "EXTENSIVE." Dairying Regarded as the Country's Biggest Thing.

Following is the last of the series of articles on the Dairy Industry based on interviews obtained by the Correspondent of the "East African Standard" on a tour of the dairy districts.

No. 8: Two Laikipia Farms.

(By Major J. J. Oller, Revenue and Laikipia, in a joint interview.)

Two types of dairy farming, the intensive and the extensive method both being based on the same basic principle, namely, the raising of cows on the Laikipia country.

The intensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The extensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The intensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The extensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The intensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The extensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The intensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The extensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The intensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The extensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The intensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The extensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

The intensive method is based on the raising of cows on the Laikipia country and is the most profitable method of dairying in the country.

It is impossible to get actual records without it. But a great deal more advice and assistance is needed than this. In the opinion of Government the raising of this, as handling with knowledge and by experience in this business and the result is what is to be expected to be. He pointed out that many of the men had to rise early in the morning but had not had the usual knowledge and have been with the area. Major Oller and Major Lantford agree that dairying is a very profitable industry.

There is no real problem of dairying in the country. It is a matter of the extension of the dairy industry to the whole of the country. The main problem which is to be solved is that of the extension of the dairy industry to the whole of the country.

In reply to a question on the subject of dairying in the country, Major Oller said that the industry is a very profitable one and that it is a matter of the extension of the dairy industry to the whole of the country.

Major Oller said that the industry is a very profitable one and that it is a matter of the extension of the dairy industry to the whole of the country.

Major Oller said that the industry is a very profitable one and that it is a matter of the extension of the dairy industry to the whole of the country.

LANDKUI CRICKET SEASON.

Nyaza vs. Njoro Closing Match.

The Landkui cricket season closed with a match between Nyaza and Njoro last Sunday. Heavy rain having prevented a first in the Nyaza side from being able to reach the ground from Njoro. They were lucky in eventually securing together sufficient players to get a game. A. Mayers headed very well for Nyaza, wearing spin and pace with judgment, and took 6 wickets for 60 runs. Weston hit well for 20, which included a splendid pull. G. Njoro was dismissed for 10, but made little of it. He was left at 51, having done a return to form. Njoro had scored 100, but this was won by 35 runs. Crawley and Workman were Njoro's most successful bowlers, but the former had not much luck.

Score:—
K. F. Crawley 6 and A. A. Mayers 11.
M. Weston 20 and C. H. A. Mayers 15.

STATE BOOBY.

To the Editor, "E.A. Standard."—It is a great deal to be written to-day about retrenchment in the public service. The present world depression has not only affected the public service but has also affected the private industry. During the war some thousands of millions of money were expended as usual, but that money was not spent on the public service. It was spent on the war, and that money was not spent on the public service. It was spent on the war, and that money was not spent on the public service.

CORRESPONDENCE.

To be found through some of the correspondence. It is a great deal to be written to-day about retrenchment in the public service. The present world depression has not only affected the public service but has also affected the private industry. During the war some thousands of millions of money were expended as usual, but that money was not spent on the public service. It was spent on the war, and that money was not spent on the public service.

ECONOMIC PROBLEMS.

To the Editor, "E.A. Standard" - I am writing to you about the economic situation in Kenya... The Government has to find a way to increase production and to improve the standard of living.

In this interesting article, written by the author of the book "The Kenya Crisis" it is high that we must take advantage of this period for the country to rise.

If we have a bullock it must go back to work... It will reap the benefits in the country... The only way to stop the people of Kenya from being cheap labourers is to improve their standard of living.

The Government appears to be in a position to improve the standard of living... It has to find a way to increase production and to improve the standard of living.

It is a pity that the Government has not taken any steps to improve the standard of living... It has to find a way to increase production and to improve the standard of living.

It is a pity that the Government has not taken any steps to improve the standard of living... It has to find a way to increase production and to improve the standard of living.

GOOD EQUIPMENT MAKES A GOOD FARMER BETTER

FOR COFFEE FARMERS

**A Drill you cannot do
without for planting
Green Manure**

**The McCormick-Deering
One-Horse 5-Disc Grain
Drill.**

The 5-disc grain drill is designed for drilling green manure in orchards of coffee, etc. It is suitable for seeding wheat, rye, oats, beans, etc.

The drill is easy for the operator to handle. Two drive gears supply the power to operate the seeding mechanism, which is fluted feed type. It is also equipped with a fertiliser attachment.

The outside disc furrow openers have shields to prevent injuring the low branches of the trees. Openers are adjustable for 6, 7, or 8 inch spacings. The width of this machine is 36 inches.

**A Mellow seed bed
means greater yields.**

**The McCormick-Deering
No. 2 Tractor Orchard
Cultivator.**

This Cultivator is designed for use in orchards, vineyards, etc., but is also used in open field work for throwing up beds, breaking hard crusted soil, and similar work to a depth of 9 inches and thereby increasing the moisture-holding ability of the soil. The 5 foot size with 9 teeth is equipped with reversible teeth and shanks, which are adjustable up and down.

The No. 2 Cultivator is regularly equipped for tractor use, the power lift devices of dirt-proof design are provided on both wheels. Both clutches are put into action simultaneously by pulling on the trip rope attached to the tractor seat.
