COWS & CALVES

ONE OF THE BULLS

SOME OF THE COWS

We are informed that as a result of demobilisation the herd of approximately 100 Cows which were imported for the purpose of supplying the Military Hospitals with milk will come under the Auctioneers' hammer about the end of March at Nairobi, on the same day as the Annual Government Fair Sale. The great majority of these are high grade "Friesian" especially selected on account of their deep milking qualities, and some have yielded up to 25 gallons of milk per day. The milk records for the best Cows will be shown in this sale catalogue. Two pedigree Bulls were also imported and with the exception of a few calves from Cows recently arrived in East Africa, all those are used by these Bulls and the "in calf" Cows have been carried by them. The animals were tested with Pictorialising prior to shipment from South Africa, and again be tested before they are sold. All the Cows offered are believed to be regular breeders and those which were found to be non-breeders were slaughtered for 7 days prior to average dressed weight was 220 lbs. One of the best used from which it will be seen that they are Cows of weight and substance. The land has now been so "disinfectant" for 12 months, and during that period has kept remarkably healthy and free from disease. All these cattle will be on view at Nairobi during March.

**RANCHING BULLS

HEREFORDS.**
