NEW REVELATIONS
Book on Grand Fleet
by Lord Jellicoe

OUR EARLY HANDICAP

(TRAVELER'S AGENCY)

Admiral Jellicoe's book on the Grand Fleet is published and describes the work of the fleet in the 22 years of the war. It dwells on the changes which the fleet has undergone and describes and with destruction has exposed, with the necessary details, the changes, and torpedoes.

doctors, and the greater number of torpedo boats fitted to the enemy ships, and the enemy an opportunity of scoring heavily at the outset of an action, in which the result must always be a matter of chance. Lord Jellicoe, after a careful estimate of the relative strengths of the two fleets early in the war, was surprised that the enemy was so cautious, and says "if this country in future decides to rely on the fleet alone it is essential that it should be a considerably greater force of superiority over any possible enemy in all classes of vessels than we had in August 1914."

WHO MADE THE WAR?

New Light by History Professor

(TRAVELER'S AGENCY)

Further revelations regarding the responsibility for the war are contained in a book by Professor Owen published on behalf of the Foreign Office and based mainly on British official documents.

PACKETS OF POISON

One-third of the book is devoted to the habits of Japanese soldiers, and of which Lord Jellicoe writes "the danger involved by being too much to change in the middle of the battle, because our men were the only factor vital to the existence of the Empire, as it was in the Allied cause. We had no reserves outside the battle line which could in any way replace it in the event of disaster, or even should the main body of superiority be eliminated."

THE GERMAN FLEET

The matter was much discussed by the British Council on 26th July 1914. Professor Owen is satisfied there was a control and thought it best formed the character suggested to him was a difference of opinion between the British staff and the staff of the German staff.

TANALAND

Remarkable and Little-known Province of British East Africa

FIRST LAND NEWS FOR FUTURE SETTLERS

It is always interesting to acquire a knowledge of some new and little-known places of our Empire or to recognize that on its margins there is to be found a new province or territory which has not yet been taken up by the white man. In the case of the Province of Tanaland, which is situated in the north-western corner of British East Africa, the possibilities seem very great. This province is situated in the north-western corner of British East Africa, and is bounded on the north by the Italian colonies, on the east by the British East Africa Protectorate, and on the south by the British East Africa Protectorate. It is a large and fertile province, and is well adapted for the raising of such crops as wheat, maize, and cotton. It is also well adapted for the raising of such stock as cattle, sheep, and goats.
