With Three-Point Cantilever Spring Suspension New Overland 4 Motor Car Seems to "Sail Over the Roads"

THE new Three-Point Cantilever Spring Suspension of Overland 4 permit the wheels to go up and down, but protect car and passengers from ordinary road jolts. Bumping, twisting, swaying and vibrating are wonderfully lessened. The blows of the road seldom reach you. There is less tendency to bodily fatigue after long rides.

The springs of Overland 4 attached at the ends of a 130-inch (3.3m) Springbase gives the riding comfort and road steadiness betetofore possible only with cars of long wheelbase and great weight, yet Overland 4 retains the light weight and economy advantages of 100-inch (2.54m)

Three-Point Cantilever Spring Suspension protects the engthen its life and reduce upkeep costs.

Equipment of Overland 4 is dependable and complete from Auto-Lite Starting and Lighting to Tillotson Carbu-

ANNOUNCEMENTS.

MOTOR DEPARTMENT.

Hints to Ford Owners .- The whole ignition system is designed with the one object of producing a spark in the right evlinder at the right

On all other makes the electrical equipmen necessary to achieve this simple object is apparently so involved that, invariably the owner having neither the time nor inclination to acquire a technical knowledge of electricity has to depend to a great extent upon the local garage.

A technical knowledge of electricity is un necessary for the Ford owner, It is sufficient to say that the current generated by the Magneto flows through the primary winding of the coils (in the coil box on the dash) to the Commutator (at the front of the engine under the oil filler and from the Engine to the Magneto

This completes the primary circuit of the dagneto current. The high tension current introduced in the secondary windings of the coil is led from the Sparking Plug- to the Cylinders as

should be periodically examined, say every 1,000 niles, and the platium points cleaned, and, if necessary, filed with a fine file until they meet securely and evenly. One coil only should be taken out, cleaned, put back, and adjusted, before the next is removed otherwise some difficulty in starting may be experienced if all the coils are out of adjustment. To adjust the coils, un-screw the adjusting out outil the vibrator ceases t buzz, then, with the engine running at a moderat speed, screw down carefully until the engine can

ENGINEERING

SPEEDO FLAX

In a country like this, where have to depend so much in the Native for labourer, it is essential machinery should be more or simple and safe

THE "SPEEDO."

Flax Scutcher can work under conditions with the utmost case only alfew hours are necessary to truct the Native to turn out the fin

The First "Speedo" outfit is day the s.s. "Director" arriving at Mous on August 3rd and will be ins MR. Tod's Farm, near Naivashales

DELCO-LIGHT

Day by day the farmer is conto a fuller realization of the fact a he farm as well as the factory must un on business lines if farming is be made really profitable. The firm is becoming more up-to-date and to on farms where the pumping, church sweeping, washing milking and a be dred other tiring duties were done hand in time outside of the rea ing hours, we now find the farmer his wife and family enjoying thele that their hard work entitles the Electricity, furnished by dep little light and power p'ants, has been the household servant on thousand farms all over this country. Of co ligat is the first thing one think when electricity is mentioned and it true that Delco-Light is unive used wherever it can be obtained: many a farm family is finding that work electricity does through the electric power appliances now avai for home use, is even a greater so than the furnishing of light.

CLEARING AND FORWARDING, STORAGE, SHIPPING.

Forwarding. We have no trading department and consequently have no consignments of our own to clear before depunents for upcountry clients. Our European staff has had 7 years' experience in the Customs and Railway Departments

Our storage accommodation is unrivalled in East Africa. We have thirteen godowns with a storage capacity of 13,000 Tons. Our private siding enables us to handle exports at a minimum of expense to up-country planters. Produce is offloaded direct our godowns pending arrival of steamers, and again loaded into trucks for railage to the Pier for direct shipment,

Enquiries Invited.

MAYE BEEN REPRESENTED FOR 30 YEARS

NO SCORE

A arge crows surned to witness the second semi-final for the John Boyes Cup between Ca'edonians (the holders) and Parklands.

A good deal of interest was cen-tered upon the contest, as it was well-known, that these two clubs were equally strong and that both ere out to get into the final at

were out to get into the final at all costs.

As it was, however, neither adqualified for the final on Saturday, for jaffer a glorious enifiblion of lookall, as a pace which says much for the condition that the players must have been in, the match ended in a goal less draw. From the kick off to the whistle for time, there was not a slack mo-ment. Interest in the game was sustained throughout, and a number of spectators were of the opinion that this was easily the best match of the season

What pleased the spectators most was the rapidity in which the ball was slung about the field. One moment the ball was at one goal but the next moment saw the other goal in danger. The combination of both teams was excellent, al. though a bit disappointing in front of goal. A draw is a fair criterion of the balance of the play. CRITICISM OF TEAMS.

For Caledonians, Bell was the for Cajedonians, Bell was the star turn, his goal-keeping being little short of marvellous; he cer-tainly saved his side from defeat, with one or two of his saves. The haives and backs, each and every one did fine work, particularly Moodie and Stewart, who gave ex-

with one or two of his away. The history and backs, who and every two dated from work, particularly and the second of the second
