One might say that because one electric lamp locks the same as another, it is just as good. But such is not the case.

The great firm of Westinghouse has succeeded in making a metallic filament lamp that lasts and gives service. They have succeeded in constructing a stronger and more sturdy electric lamp that is not susceptible to breakage by the slight shocks that break the ordinary electric lamp.

Look for Westinghouse Lamps. Use them and you will readily appreciate them.

LOWER COSTS OF PRODUCTION

THE FORDSON CAN HELP

The comparative cost of upkeep of

OXEN and TRACTOR

IS OVERWHELMINGLY IN THE TRACTOR'S FAVOUR.

Oxen work an average of only 100 days a year and at for 365 days a year. A Fordson can do 365 days a year—and consumes only when it is earning. A Fordson can do more work than oxen. It can plough 4 to 6 acres a day. It can cultivate 10 to 12 acres a day. It can Disc, Drill or Harrow 20 acres a day. It can shell and grind; fill the Silo, saw-lime the bin, work a lighting plant. Pump the Water—Not only does it save money but it takes the drudgery out of the farmer's life.

THE FORDSON IS A SOUND INVESTMENT AT GILT EDGE SECURITY.
