 "Ladies' Setting a Speciality"

Writing in "THE BRITISH MEDICAL JOURNAL" April 23rd 1921, The President of the Tuberculosis Society of Great Britain said:—

"The amount of tuberculosis conveyed to infants and young children in milk derived from dairy cows suffering from tubercle is enormous. It is suggested that over one million dairy cows in the country alone are tubercular, and there seems to be no improvement in the degraded state of dairy. Standard and proprietary milk are equally safe, and free from tubercle, and should be used in preference to unboiled cow's milk."

A motor lorry eventually called for us at 7 am one morning and took me down to the beach. I had seen on Letta's forehead that I had told that the road which I had taken was again very good, and the weather was fine. The top of the mountain through was very beautiful. The view from the top of the mountain looking over the bay and the beach was very beautiful. The view from the top of the mountain looking over the bay and the beach was very beautiful.
