Much is heard on all sides amor planters of German East Africa about called "labour question," and the au lied "labour question," and the autoquently discussed at length and often frequently discussed at length, and often veronscherable neart, in the cosmiss of the Conial newspapers which are published at I see-Salaam and Tanga. If considering this difficulty, it must be born in mind that European undertakings are al-present concentrated in a comparatively smal-arca, at a few centres, such as Usambara Moschi, and on the Pangani River, and tha natives will not be induced to leave their fa listant bomes to the interior to work on t plantitions, unless they are convinced they will benefit their condition by so do It is obviously absurd to convert their they will benefit their condition by so doing It is obviously absurd to contrast the vas population of the country with the compara-tively minute needs of the European planters and to Jeduce therefrom the fact that the and to deduce therefrom the fact that the native is incorrigibly lazy, and should, there-fore, be compelled by constraint or force to work on the plantations. The first step, therefore, in the solu-tion of the so-called "takour question" must be the more combinates to the constitution. be the more considerate treatment of mative labourers by planters, who, faced as they are by all kind of difficulties, may, perhaps be excused, though not justified, in regarding the native as existing merely for the satisfaction of his own needs, and, when the native does bakirs as detuning morny nor the accumpants of the notice of the country of the c
