The tin defies the weather

Good tea is so sensitive to changes as a delicately adjusted meter. A very short course of humid atmosphere and leaves it stale and tasteless. Only by insisting on Brooke Bond tea in the vacuum can be absolutely sure of absolute freshness, retaining up to the minute the same quality as when it was first packed. This patent tin is air-tight. It preserves its fragrance for any length of time and in any climate.

**REVISION OF FINANCIAL POLICY IN BRITAIN**

**FINANCIAL POLICY**

The Committee has been asked to consider the financial policy of the Government in relation to the war. It has held several public hearings and has received many suggestions from the public. It has also conducted extensive research into the financial situation of the country.

The Committee has found that the financial policy of the Government has been largely successful in maintaining the stability of the pound and in financing the war. However, it has also found that there are certain areas where the policy could be improved.

One of the main areas of concern is the issue of taxation. The Committee has found that the current tax system is complex and difficult to understand. It has suggested that the Government should consider simplifying the tax system and increasing the transparency of the process.

Another area of concern is the issue of public expenditure. The Committee has found that the Government has been successful in controlling public expenditure, but it has also found that there are certain areas where expenditure could be reduced without affecting the war effort.

The Committee has also considered the issue of the money market. It has found that the Government has been successful in maintaining the stability of the money market, but it has also found that there are certain areas where the policy could be improved.

The Committee has concluded that the financial policy of the Government has been largely successful, but it has also found that there are certain areas where the policy could be improved.
