Farming at a low ebb

LITTLE WAGE, LITTLE PAY FOR BUSH BERSHORN

(From the Own Correspondent)

London, April 11
Mr Lloyd George has started on the country and a different story is being told. It will not be long before the conditions of the country will be such as to enable the farmer to get a better price for his produce than he has been getting for some time past. The farmer is now being asked to produce more than he has been producing, and the price for his produce is being asked to be lower than it has been for some time past. The farmer is now being asked to produce more than he has been producing, and the price for his produce is being asked to be lower than it has been for some time past.

FORD LUBRICATION.

In East Africa, many FORD Car owners, who are influenced by the climatic temperature rather than the actual requirements, make a serious mistake in the selection of their lubricating oil.

The operating temperature is the only factor which need be considered when determining the correct lubricant for a car engine. The effect of the climatic temperature upon the operating temperature is so slight that it does not in any way influence the selection of the correct oil.

Gargoyle Mobiloil "E"

is a free flowing lubricant under all conditions, which fully satisfies all the demands of the special features of the FORD car.
