FORD LUBRICATION.

In that Africa, many FORD Car owners, who
are influenced by the climatic temperature rather
than the actual requirements, make a serious
mistake in the selection of their lubricating oil.
The operating temperature is the only heat
factor which need be considered when determining
the correct lubricant for an car engine. The effect
of the climatic temperature upon the operating
temperature is so slight that it does not in any way
influence the selection of the correct oil.

Moyle Mobiloil "E"
Having lubricated under all conditions,
fully satisfied as to the demands of the special
oil of the FORD car.

MADE IN ENGLAND

Even if summer frosts have not
yet set in, you will find it well worth
your while to get a good supply of
this material now. It is a very
valuable material for making
clothing for the winter. It is
very strong and durable, and
will stand up to the most
severe weather. It is also
very cheap, and will give
you a good value for your
money.

Children and Bay Coughs.
You know well that a baby
who is suffering from a cough
or cold, is very liable to
develop a serious illness.
This is because the child's
system is so weak, and
it is so easy for the
cough to become a
chest infection. It is
therefore very important
to give the child a
good supply of
this material, as it
will help to
strengthen the
child's system,
and will help to
prevent the
cough from
becoming a
serious illness.

Home Tips.
Have the second window
cleaned. The second window
is the most important of the
three, and it is very
important to have it
cleaned. It is also
important to have the
other two windows
cleaned, as they will
help to keep the
house bright and
cheerful.

Maize, Posho and Crushed Maize

To all Employers of Native Labour.

Why do you think you must buy your Maize and Posho requirements from the most old or best known mill in the Great Market, but you will also be enabled to obtain the most up-to-date information regarding the various types of maize, posho and crushed maize available. The advantage of this method over that of buying from elsewhere is that you will be able to see the quality of the maize, posho and crushed maize before you buy it.

FORD LUBRICATION

In East Africa, many FORD Car owners, who are influenced by the climate temperature, make a serious mistake in the selection of their lubricating oil.

The operating temperature is the only factor which need be considered when determining the correct lubricant for a car engine.

Gargoyle Mobiloil "E" is a new flowing lubricant under all conditions, which fully satisfies all the demands of the special features of the FORD car.
