

Monagu's Fall

PARLIAMENTS OF THE EAST AFRICAN STATES

Many Views

(FROM OUR LONDON CORRESPONDENT)
London, March 19.—The fall of the Monagu Government in the East African States has been a matter of considerable interest to the public in this country.

A further opinion was expressed by the publication of the "Daily Telegraph" which stated that the Government in the East African States was not strong enough to carry out its policy.

It is believed that the Monagu Government was not strong enough to carry out its policy in the East African States.

The Government was unable to carry out its policy in the East African States.

United States Tires are GOOD Tires

Watch Your Tires

Never run your motor car with the wheels out of alignment.

If wheels are out of alignment, they wear down unevenly, and increase your annual tire bills.

Take care of your tires now, before they have to be replaced so often.

IF YOU PLANT PLANT WELL!

With the Start of the Railway Construction Works an important local market for maize has been created. Take advantage of this by producing a remunerative crop promising a quick return. With the past dry season behind us we can look forward to plentiful rains in the future ensuring abundant crops if properly planted.

THE NEW HOOSIER PLANTER is the implement to use to secure satisfactory results, because (1) The grain will be dropped uniformly at any spacing required (2) It is light in draft and consequently permits the small East African Ox to plant a large area in a minimum of time. (3) It is strong and fool-proof suited to inexperienced native labour. A special leaflet will be sent on request.

the birds have got a head, or when they lay the egg, or when the chick is hatched, or when the bird is grown. For when these things happen, we always have a record of them. We record them in the book as they happen, and we also record the date when they happen, and the name of the bird, and the name of the person who saw them. We also record the name of the place where they were seen, and the name of the person who saw them. We also record the name of the person who saw them, and the name of the place where they were seen, and the name of the person who saw them.

HOW BAYING CAN HELP KEVYA.

THE PRESENT POSITION.

(By Hon. H. Scott, late Governor of Kenya District.)

The many and great advantages of the baying system have been pointed out in our last issue by the Hon. Mr. Scott, late Governor of Kenya District. It is a system which has been tried in many parts of the world, and it has been found to be one of the most effective means of increasing the production of milk from a herd of cows. It is a system which is well adapted to the conditions of Kenya, and it is one which should be widely adopted.

and made, and the milk is then sold to the market. The milk is sold to the market at a price which is higher than it would be if it were sold to the market in the ordinary way. This is because the milk is sold to the market in a form which is more attractive to the consumer, and it is also sold to the market at a time when the price is higher than it would be if it were sold to the market in the ordinary way.

There is a tendency, even in official circles, to encourage bay, and to try to go in for bay, but it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done.

There is a tendency, even in official circles, to encourage bay, and to try to go in for bay, but it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done.

There is a tendency, even in official circles, to encourage bay, and to try to go in for bay, but it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done.

There is a tendency, even in official circles, to encourage bay, and to try to go in for bay, but it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done.

There is a tendency, even in official circles, to encourage bay, and to try to go in for bay, but it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done.

There is a tendency, even in official circles, to encourage bay, and to try to go in for bay, but it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done. It is not going to be done because it is not going to be done.

Poultry

THE ORIGIN OF LAYING STRAIN.

The values of egg records have been brought into prominence by the numerous laying contests of the world. Whether commercial or amateur, these contests have led to the production of many fine laying strains. It is the purpose of this article to discuss the origin of these strains and the factors which have influenced their development.

The origin of laying strains can be traced to the early days of poultry raising. At that time, the primary concern was to produce birds which would lay a large number of eggs. This led to the selection of birds which were particularly good layers, and these birds were then bred together to produce a strain which would lay even more eggs.

Glue

THE CORRECT METHOD OF MAKING FOR THE INDIAN MARKET.

There is always a strong and a weak side to every business, and this is true of the glue business. The strong side is the demand for glue, which is constantly increasing. The weak side is the competition from other countries, which is also constantly increasing. It is the purpose of this article to discuss the correct method of making glue for the Indian market, and to show how this can be done in a profitable and efficient manner.

The correct method of making glue for the Indian market involves several steps. First, the raw materials must be carefully selected and prepared. This includes the selection of the best quality skins and the removal of all impurities. The skins are then soaked in water for several days, and the glue is then extracted and purified.

Glue
