A Call to the Convention to Act for the People

ASIATIC GLAZES TO BE REBUILT AT ALL COSTS.

The East African Standard understands that the dispatch, referred to in the preceding column, containing certain proposals with regard to the Indian colonies for equal representation in the United Kingdom.

It is to be feared that the people of this country have taken matters too much for granted. It may be assumed that while the country has been waiting for the promised proposals from the Home Office, the Indian party has not been idle.

The recent visit from the South African Trade Commissioners is a matter which should be made the most of in respect of the Indian question. From one side of the Continent of Africa to the other, a fair cry today has to be raised with the approval of rapid communication.

Significant Remarks. Sir Charles Lucas met a well-known member of the Indian community in Nairobi on the 11th inst. He said he was glad of the opportunity of meeting him and that he was glad to see the future state of the Indian community in Kenya.

A Duty. In such a situation, it is a duty on the part of the Indian community to be prepared to meet any situation that may arise.

General Remarks. It is a duty on the part of the Indian community to be prepared to meet any situation that may arise.

This is the fifth half yearly meeting of the Association, which was formed on September 4, 1920.

UNEMPLOYMENT.
Prime Minister Refuses to See Trampers.
LABOUR EXTREMISTS.

(From Our Own Correspondent.)
London, November 11.—The one great problem before the country at the present time is not that of unemployment, but the only way which really counts in the attention of the Government and the other duties set of a very particular nature.
The problem came to a head with the call of the unemployed tramps to London. These were about 2,000 selected tramps from all over the country who gradually concentrated on the Midway, immediately with the object of meeting the Authorities. The Prime Minister, and said that they would never go back into the streets; but he said that they should be taken to the workhouses to receive them, because he had had enough of the tramps of Britain and Labour.

A striking monument, representing a section of a stork, with the letters 'S' and 'M' on its body, was unveiled on December 11, in front of the new bridge at Chiswick, by a substantial group of storkers.

CRITICISM.
Considering that Ministers have only just one week and devoted general sessions for two days, the criticism is hardly justified even when the localisation of Government contracts is so much work, because definitely someone has to pay for it, and the payment comes out of the Exchequer. Thus, in accordance with the office and men on duty preventing its operation, and so you have the old vicious circle of the dog trying to live by eating its own tail. Perhaps the true picture there is not an improvement; there is an improvement; there is an improvement.

U.S. Royal Cord

the Individual Tyre

PERFECT in grace of design, in balance, in beauty of appearance—the individuality of U.S. Royal Cord is apparent on sight.

And if you could cut a U.S. Royal Cord into sections, you would see the same individuality in the construction of the tyre—members of manufacture that make the performance of Royal Cord industries, too.

Strength and mileage is built up with layers of nitro cords, each insulated from the other by a coating of live rubber, and each successive layer—laid at right angles to those above and below—insulated in the same way. This internal friction stimulates an enduring resistance to lateral wear built into the tyre.

Built into the tyre. That is the point. Thus every Royal Cord shoe good and are some—giving greater mileage, more riding ease and perfect freedom from tyre-worries.

WHAT MAKES a Good Tyre? A Tyre is not necessarily a good Tyre just because it is a Cord or Tread Tyre. Good Cutters? Best rubber? Good construction at the hands of good workmen? A manufacturer might have all of these things and still present a poor Tyre. If he lacks the one thing vital—experience. U.S. Rubber Cord and Nobby Tread Tyres were first introduced many years ago, but years before they were spent in research, in experiments, and in tests. It took experience to build the first Regatta Cord and Nobby Tread Tyres and to place them at once in the past time of leadership. It is the experience of to-day that has built and consolidated that position.
