STRANGER than FICTION

Unusual combination—diamond—laboratory—diamond. The stone Corona has had the diamond in the center. The stone Corona has had the diamond in the center.

NO ORDINARY typewriter can stand the hardship of the employer's life. This is why usually every employer carries a Corona in preference to any other machine.

Corona went to Africa with Col. Roosevelt in 1899 and to Brazil in 1916 when he explored the "Mystery River." Corona was with Sir Ernest Shackleton on his last fatal dash for the pole—and spent 270 days in ice and snow with the MacMillan Arctic Expedition.

If you want a typewriter that will stand hard treatment, buy the one typewriter with proved durability—Corona. Please us for a demonstration.

POULTRY NOTES. Hatching and Rearing Turkeys.

(Continued from Feb. 21-23) If the turkey eggs are to be hatched under an ordinary hen, the best method is to set them in the puller stage on the sitting nest, and to leave them there until the paterine of a young hen, and she will do the best.

DANGER FROM PARASITES.

Whether the eggs are to be hatched by turkey hen, special provision is necessary to prevent the possibility of insect parasites of any kind being in the nest or on the body of the hen. Some that are very common are the turkey mite, the turkey louse, the turkey tick, and the turkey flea.

THE SHOWING POULTS.

If by the most different part of the turkey, it is to be shown, it is to be shown in the puller stage, and the turkey mite, the turkey louse, the turkey tick, and the turkey flea.

READING.

There are many methods of reading in this country that will do least when having perfect freedom of movement without being in the least cramped.

Half grown poults. There is a tendency with turkey rearing to regard all poults as chicks, but they are not chicks until they are about three weeks old.

Removal to rearing ground. When the chicks are dry and ready for removal from the hatching tray, they should be taken out and reared in a separate enclosure.
