We told the Treasury that we would request the Dept to send home a copy of this report, when we asked them to approve of a supplementary expenditure of \$5000 on combating stock diseases in 1909-10 (see par. 9(d) of our letter of 11th Jan'y on ^{Gov.} 151/09-10). We had better now send them a copy of the report with ref to par 9 (d) of that letter. The report does not show exactly how the money provided was to be spent. But it does show what a very serious thing to be

The Royal Society have already
had the first 8 of the recommenda-
tions of the Conference (p. 71) in our
letter on Gov.
38653. We ought to have the
Capt's observations on all the
recommendations, & a description of
any action which has been taken, or
which is suggested, for the purpose of
carrying out the recommendations.

With regard to nos 7 of the
recommend^{ns}, the question was discussed
with Sir D. Bruce at a meeting of the Royal
Society's Committee which was held a few
days ago. It is not proposed to have a
full-blown Commission at once, but to
send out a medical - entomological expert
to ~~attend~~ work at the subject for the present from
the entomological side. Sir D. Bruce, Sir P. Munn,
Prof. Ross, S. Ross Bradford, & S. Bayliss are
opined as to the desirability of this. We
seem to have found a very suitable man
