You are after my blood, my friend,
says Kenyatta

Mr. Kenyatta's speech was a powerful one, and he was well received by the audience. He spoke for about an hour, and his words were full of meaning and conviction. He said that the people of Kenya were not satisfied with the current situation, and that they were determined to bring about a change. He called for a united front, and for the people to stand together against the forces of oppression. He also mentioned the need for a new constitution, and for the people to have a say in their own government. His speech was a call to action, and it inspired the audience to think about the future of their country.

Adam and Eve
The story of Adam and Eve is a well-known one, and it is often used as a metaphor for the human condition. It tells of a man and a woman who were created by God, and who were placed in a garden. They were given the freedom to eat of any fruit in the garden, except for the fruit of the tree of the knowledge of good and evil. They were tempted by the serpent, and they ate of the fruit. As a result, they were driven out of the garden, and they became mortal. The story is a warning against disobedience, and it is a reminder that we are all sinners.

Not our refuge
The people of Kenya are not our refuge, and we are not their refuge. We are all human beings, and we are all equal. The Negro population of New York City is now 600,000, and is increasing at the rate of 100,000 a year. This is a remarkable increase, and it is due to the fact that the Negro population of New York City is not only increasing in number, but also in quality. The Negro population of New York City is now becoming more educated, more skilled, and more industrious than ever before. MEDICAL CYLINDERS

Due to confusion arising because different countries have different identification codes the International Standards Organisation have discussed this question very fully. As a result this Company has decided to continue to use its present identification code and put into practice a new medical cylinder identification colour scheme in line with the I.S.O. recommendations. It will be appreciated that this is an undertaking requiring care and vigilance and it will need the whole-hearted co-operation of all users of medical gases. It must be recognised that during the changeover period, risks will exist in that for a time users will have in their possession cylinders of a different colour but containing a like gas. The date decided upon for this changeover was 16th February, 1953.

In consequence of the above it is important that users of medical gases should ensure that after that date all medical cylinders in their possession should be returned to the Suppliers for repainting.

Full details of the revised colour identification system are available in the annexed copy of practice which is being distributed by the Standards Institute, 28 Victoria Street, London S.W. 1, and all users of medical gases are strongly recommended to obtain a copy.

HOLLYWOOD IS SWITCHING TO 3-D FILMS

most of Hollywood's big stars are flocking to the new 3-D production line. These stars include: Audrey Hepburn, who is making a 3-D picture; Elizabeth Taylor, who is making a 3-D picture; and many others. The new 3-D films are being made in a special way which makes them look like they are coming out of the screen. This is done by using two cameras to take the same scene from slightly different angles. When the film is shown, the two images are projected onto the screen at the same time, and the viewer's eyes see two slightly different pictures. The brain then combines these two pictures into one, and the result is a 3-D effect. This new technology is being used in many of the most popular films of the year.

Pull horses

It is not yet clear how long the new 3-D films will last. Some people think they will be a fad, while others think they will be a permanent change in the way movies are made. Zam-Buk FOR CUTS, WOUNDS, SPOTS, PIMPLES, RASHES AND SORES

Heal and Heal
It seems to me that there are two main ideas in our present-day world. One is to get the best out of the things we have. The other is to get the best out of the people we have. Zam-Buk is a skin ointment which is made from natural ingredients. It is used to treat a wide variety of skin conditions, including cuts, wounds, spots, pimples, rashes, and sores. Zam-Buk is applied to the affected area and left to dry. It forms a protective film over the skin, which helps to heal the wound and prevent infection. Zam-Buk is also used to treat itching skin, sunburn, and other skin irritations. Zam-Buk is a safe and effective skin ointment which is used by millions of people all over the world.

Zam-Buk Ointment is very rich in natural oils, which penetrate deep into the skin. Zam-Buk also has a soothing effect on the skin, which helps to relieve itching and irritation. Habits catch you unawares

By Philip Mwangi

It is often in those moments when you are least expecting, even though you may feel you are in control, that you are caught by a habit. It is a habit that you have formed in the past, and it is a habit that you are now finding it difficult to break. It is a habit that you are now finding it difficult to break. KENYA'S NEED: TO BE RID OF FEAR

Mr Blundell's call to the Colonial Office

DREAMING the situation may still deteriorate in a year, Mr. Michael Blundell, Leader of the European Staff in Kenya, told a meeting in the city area of Nairobi on Saturday that Mau Mau guerillas were being increased by Kenya non-dissidents voluntarily assisting in the Highlands. He felt, however, that the Mau Mau could not sustain operations on the spot.

Mr. Blundell called on the Colonial Office to remove the settlers from and, in giving them more responsibility, challenge the Europeans to restore the peace of the other areas. The country could only progress in future without fear, he claimed.

Many of the Mau Mau and non-dissident settlers were all armed—both before the end of the two-and-a-half-year fighting, sustained not to be a Mau Mau. He said that the Mau Mau were still active in the Highlands and that the Mau Mau were still active in the Highlands and that the Mau Mau were still active in the Highlands.
